

## Heat pump chillers 2022 / 2023

# Panasonic environmental vision 2050

To achieve “a better life” and “a sustainable global environment,” Panasonic will work towards creation and more efficient utilisation of energy which exceeds the amount of energy used, aiming for a society with clean energy and a more comfortable lifestyle.

**2050**

## Energy used < Energy created

One initiative in the Panasonic environmental vision 2050 is offering products with greater energy efficiency. In 2018, we celebrated the 60th anniversary of our Heating & Cooling Solutions business. Our expertise gained over the years has helped us launch a range of products that contribute to a more carbon-free society.

### Current status of energy used and energy created

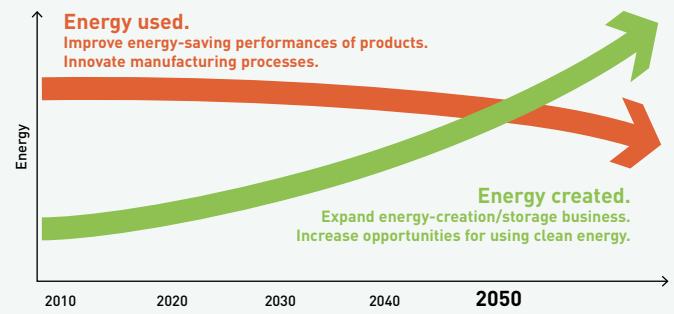

Energy used by Panasonic business activities and products.

**10** Energy used

Clean energy created and / or made available by Panasonic products, etc.

**1** Energy created

### Working to realise environmental vision 2050

# Projects and case studies of Panasonic Heating & Cooling Solutions

Panasonic, a partner with the knowledge and experience to achieve your objectives and green needs.

## Integrated technology that permits better work, easy installation, high efficiency performance, and energy savings

Our main targets are the distributed services and B2B-integrated solutions.

Panasonic provides a single point of contact for the design and maintenance of your system, making things easy for you. Given our experience in processes, technologies and complex business models, we can offer you effective solutions that reduce costs, whilst also being efficient, user-friendly, reliable and innovative. Another advantage we offer to our clients is a support service for systems integration projects, which we provide through our wide range of services and solutions. As a global company, we have at our disposal the financial, logistical and technical resources to develop complex and wide-ranging solutions, both at country and international level by implementing them both on-time and on-budget.

# A desire to create things of value

**"Recognising our responsibilities as industrialists, we will devote ourselves to the progress and development of society and the well-being of people through our business activities, thereby enhancing the quality of life throughout the world."**  
Panasonic Corporation's Basic Management Objective, formulated in 1929 by the company's founder, Konosuke Matsushita.

# Vitalize the future with air

These are times of exceptional challenge.

If the world is to move forward confidently, it must overcome the serious threats of the new global pandemics and the degrading of the environment. It must find ways large and small to reduce the stresses that affect people's health and the stability of their communities.

At Panasonic, we're utilizing the power of air to create positive change.

Air that benefits body and mind.

Air that energizes the places where people gather to work and play.

Air that reduces our burden on the Earth.

With more than a century of research and expertise to guide us, we're using air to open a more hopeful and vital future for all.

# 100 % Panasonic, the DNA of Japanese craftsmanship

Applying advanced technologies that truly make life better, we live by an unparalleled commitment to product quality.

Panasonic is building on the Japanese tradition of uncompromising quality control worldwide, developing and manufacturing fine products and delivering them to customers everywhere.

JAPAN  
QUALITY

## At Panasonic, we believe that the best air conditioner is one that works quietly and effectively in the background whilst minimising its impact on the environment

People who use our products can look forward to long years of high-quality performance without the need for constant service. As part of our rigorous design and development process, Panasonic air conditioners undergo a variety of stringent tests to ensure their effectiveness and long-term reliability. Tests for durability, waterproofing, shock resistance, and noise are conducted on component parts or on the finished products themselves.

As a result of all of these time consuming efforts, Panasonic air conditioners meet industrial standards and regulations in every country where they are sold.

### International Standard Quality

To uphold the company's reputation around the world, Panasonic strives continuously to offer quality with minimized environmental impact.

#### **Reliable parts that meet or exceed industrial standards.**

In every country where they are sold, Panasonic air conditioners comply with all required industrial standards and regulations. In addition, Panasonic conducts stringent testing to ensure the reliability of parts and materials. The strength of the resin material used in a propeller fan is confirmed by a tension test.

#### **Compliance with RoHS / REACH substance restrictions.**

Panasonic products and used materials strictly comply with chemical substance restrictions as defined by RoHS or REACH. During the development and production of parts, stringent inspections are conducted on over 100 materials to ensure that no hazardous substances are included.

#### **Sophisticated production process.**

Panasonic's air conditioner production lines employ state-of-the-art factory automation technologies to ensure products are manufactured with high attention to quality to meet expectations of reliability and trustworthiness.

### Durability

At Panasonic we know the importance of a long service life with minimal maintenance. That's why we subject our air conditioners to a wide range of stringent durability tests.

#### **Long-term durability test.**

To ensure durability and stable operation for many years, we conduct a long-term continuous operation test under conditions that are much more severe than actual operating conditions.

#### **Compressor reliability test.**

After the continuous operation test, we remove the compressor from a selected outdoor unit, disassemble it, and examine the internal mechanisms and parts for potential failure. This helps ensure reliable long-term performance under harsh conditions.

#### **Waterproofing test.**

The unit - which is subject to rain and wind - complies with IPX4 waterproof specifications. Contact sections on printed circuit boards are resin-potted to prevent adverse effects caused by exposure to water (an unlikely occurrence).

## A globally trusted air conditioning brand

Panasonic – leading the way in Heating and Cooling.

With more than 50 years of experience, selling to more than 120 countries around the world, Panasonic is one of the leaders in the heating and cooling sector.

With a diverse network of production and R&D facilities, Panasonic delivers innovative products incorporating cutting-edge technologies that set the standard for air conditioners worldwide.

## From, for and by Europe

In 2018 Panasonic initiated the production of air to water heat pumps in its factory in Pilsen, Czech Republic. Keeping an excellent combination of highly skilled human resources and production automation the big demand growth foreseen in Europe can be met with outstanding quality standards.

Factory in Pilsen, Czech Republic.

## More than 40 years of experienced organization in Europe.

At Panasonic, we know that the best is always yet to come. This is why our air conditioning and heat pump solutions are constantly upgraded. Panasonic is committed to offering our customers innovative products in the heating and cooling market across Europe, and has the ambition to not only meet but also exceed their requirements. Our Technology and Design teams anticipate the needs of tomorrow. We look to produce smaller, quieter, efficient solutions - with better technological features – that can reduce energy consumption while providing suitable temperature conditions for the user.

## 38 Training Center in 19 countries in Europe

### The Panasonic PRO Academy.

Heating and Cooling business is changing rapidly, new technologies, new regulations, new solutions that require continuous update for professionals. Panasonic takes its responsibility to its distributors, specifiers and installers seriously and has developed a comprehensive training programme with 38 Training Center in 19 countries in Europe.

# PRO Club. The professional website of Panasonic

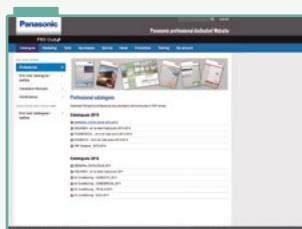

Panasonic has an impressive range of support services for designers, specifiers, engineers and distributors working in the heating and cooling markets.

Panasonic PRO Club ([www.panasonicproclub.com](http://www.panasonicproclub.com)) is the online tool which makes your life easier! You just have to register and a lot of functionalities are freely available to you, where ever you are, from your computer or smartphone!

- Print catalogues with your logo and contact details
- Access to the extensive library of professional design, selection and calculation tools (Aquarea Designer, VRF software, chiller selector, etc.)
- Get documents of conformity and all other documents you may need
- Download all the service manuals, end user manuals and installation manuals
- Download energy labels in PDF format using the energy label generators

- Download Revit and CAD files and specification texts
- Know what to do with error codes (error code search by error code or unit ref.)
- PRO Academy: register for training
- Download product images in high resolutions, advertisements, deco guidelines
- Get to know special offers and promotions
- Find out about the latest news first

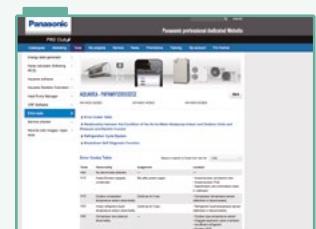

Easy download Panasonic service documentation and brochures.

Customise leaflets with your logo and contact details. Save and print the PDF.

Energy label generator. Download Energy labels of any device in PDF format.

Error Code on your smartphone and your PC: Search by error code or model reference. Online version + downloadable version for offline use.

Panasonic PRO Club is fully compatible with tablet computer and smartphone.

Visit [www.panasonicproclub.com](http://www.panasonicproclub.com) or connect simply with your smartphone to the PRO Club using this QR.

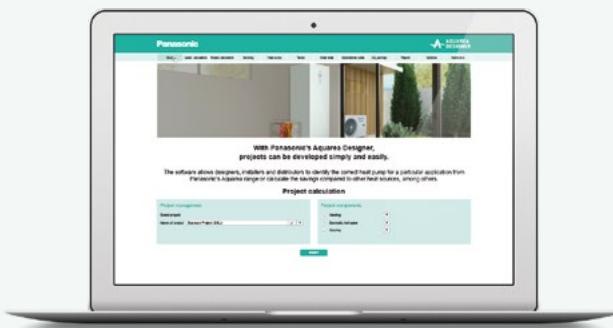

**PRO Club**

Panasonic provides bespoke software and tools helping system designers, installers and dealers to very quickly select, design and size systems or create wiring or hydraulic diagrams at the push of a button.

### Aquarea Designer - online tool

With Panasonic's online tool, projects can be developed simply and easily. The newly developed tool is optimised to help HVAC professionals easily identify the most appropriate Aquarea air to water heat pump for a particular application.

### VRF Designer

Building on the success of the ECOi VRF Designer software, this package provides air conditioning system designers, installers and dealers with a program to design and size projects for Panasonic's VRF ranges.

### Chiller configurator

This online software solution offers a complete tool to allow the user to accurately calculate the performance at specified conditions, select and configure our range of commercial chillers, heat pumps and fan coils. It also provides a comprehensive report to share with customers and clients alike.

### Domestic AirCon Quick Selector

This user-friendly online tool for our domestic range allows to choose the best split or multi-split system for each project needs and get the specifications of that particular application.

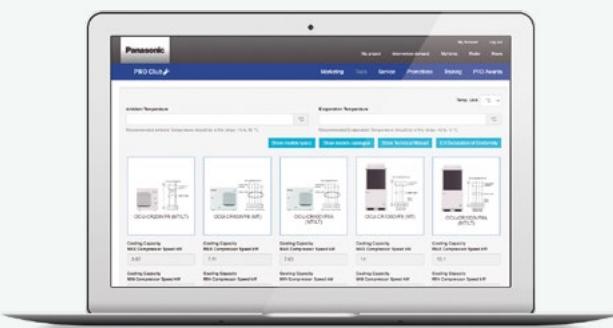

### Open BIM

Design, analysis and BIM modeling of Panasonic VRF and Air to Water heat pump systems. Generates documents, 3D model, schematics and drawings. This application is integrated into the Open BIM workflow via the BIMserver.center platform.

### Refrigeration tool

Panasonic has launched a new online calculator to support engineers, installers, and technicians to quickly make calculations when specifying solutions for commercial refrigeration systems.

# ECOi-W R32, the new range of sustainable chiller solutions to suit a variety of commercial and industrial applications

ECOi-W provides the optimal performance in any climatic condition.

## 1 High efficiency level

- High efficiency levels thanks to an efficient compressor's performance, specially designed for R32 refrigerant.

## 2 R32 Refrigerant

- Thanks to a GWP (Global Warming Potential) of 675, this refrigerant is 3 times less polluting than the standard R410A.

## 3 High flexibility

- Capacity range from 50 to 170 kW
- Customisable design
- Operating range: -15 °C (heating) to 48 °C (cooling)

## 4 High quality

- Defrost limiting coil design
- Optimised design for service and maintenance
- Compact footprint

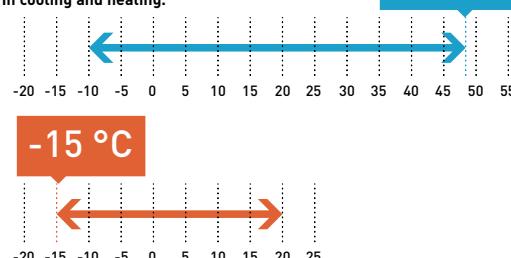

### Operating conditions

Panasonic ECOi-W provides a wide operating range from -15 °C in heating to 48 °C in cooling.

### Water outlet temperature in cooling.

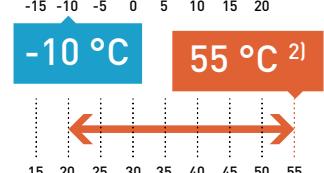

A water outlet temperature of -10 °C in cooling offers a uniqueness to the ECOi-W Series, which can ensure the operation temperature of the process equipment in factories.

Ambient temperature.  
In cooling and heating.

Cooling: Outside air temperature (°C (DB)). Heating: Outside air temperature (°C (WB)).  
1) 47 °C (models 150 - 170). 2) 53 °C (models 150 - 170).

Water outlet temperature.  
In cooling and heating.

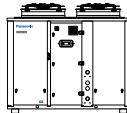

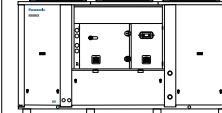

### Compact units

The ECOi-W R32 range has been designed in a compact manner to ensure the smallest possible footprint. The first chassis measures 2,53 m<sup>2</sup> and the third chassis features **one of the smallest footprint on the market** with an average ratio of 37 kW/m<sup>2</sup>.

### Super low noise versions

For the entire range, customers can choose between a standard unit or a super low noise version. The super low noise version features EC fans and compressor sound jackets for improved sound levels.

1) Those are the data with variable flow. 2) Following Eurovent and COMMISSION REGULATION (EU) No 811/2013 for low-temperature heat pumps. Scale from A+++ to D, as of 26th September 2019.

## Outstanding water pump configuration

Units can be equipped with a variable speed pump that automatically adjusts its speed according to the required capacity.

Compared to a fixed-speed pump, and depending on the operating profile of a pump working at partial load, the annual energy consumption of the pump can be reduced.

## Key points

- 10 sizes - 4 chassis
- Cooling only or Reversible units
- Low GWP R32 refrigerant
- High efficiency
- Wide operating limits
- Low footprint
- New advanced control system
- Easy maintenance
- Standard or Super low noise versions
- Remotely controllable with ECOi-W Cloud
- 100% factory tested

R32  
675

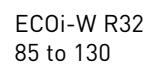

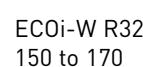

GWP - Measurement scale.

1) Comparison made between equivalent units operating respectively with R410A and R32 refrigerants. Impact only considers the refrigerants and not the units as a whole. 2) U-150 R32 Cooling Only. 3) U-130 R32 Heat Pump Chiller.

OPTIONS FOR R32 OUTDOOR UNITS

## ECOi-W R32 cooling only outdoor units.

- High seasonal efficiency
- Water outlet temperature range: -10 to +18 °C
- Optimised design for service and maintenance
- Simple user friendly control as standard
- Modbus RTU & TCP/IP, BACnet MSTP & IP as standard
- Electronic expansion valves

### Technical focus:

- Chiller type: cooling only
- Compressor type (number): Scroll compressors (2)
- Refrigerant type: R32
- Heat exchanger: stainless steel plate heat exchanger
- Flow switch, water safety and air purge valves included
- Water filter included (mandatory to be installed on site)
- Night mode setting to save energy and reduce noise level
- Water compensation curve control

## U - 050/060/070/075 CQ, CR, CS

- Ambient temperature operating range: -15 to +48 °C
- Optional acoustically insulating compressor jacket

OPTIONS FOR R32 OUTDOOR UNITS

# Features of ECOi-W R32 heat pump outdoor units

## ECOi-W R32 heat pump outdoor units.

- High seasonal efficiency in cooling and heating
- Optional acoustically insulating compressor jacket
- Optimised design for service and maintenance
- Simple user friendly control as standard
- Modbus RTU & TCP/IP, BACnet MSTP & IP as standard
- Electronic expansion valves

### Technical focus:

- Chiller type: heat pump
- Compressor type (number): Scroll compressors (2)
- Refrigerant type: R32
- Refrigerant circuit: 1
- Heat exchanger: stainless steel plate heat exchanger
- Flow switch, water safety and air purge valves included
- Water filter included (mandatory to be installed on site)
- Night mode setting to save energy and reduce noise level
- Water compensation curve control
- Bluefin anti-corrosion coating

## U - 050/060/070/075 CM, CN, CO

- Ambient temperature operating range: -15 to +48 °C in cooling, -15 to +20 °C in heating
- Water outlet temperature range: -10 to +18 °C in cooling, +20 to +55 °C in heating

### Technical focus:

- Fan type (number): axial fan (1 for 50/60, 2 for 70/75), optional EC and high pressure EC fans

## U - 085/100/115/130 CM, CN, CO

- Ambient temperature operating range: -15 to +48 °C in cooling, -15 to +20 °C in heating
- Water outlet temperature range: -10 to +18 °C in cooling, +20 to +55 °C in heating

### Technical focus:

- Fan type (number): axial fan (2), optional EC and high pressure EC fans

## U - 150/170 CM, CN, CO

- Ambient temperature operating range: -15 to +47 °C in cooling, -15 to +20 °C in heating
- Water outlet temperature range: -10 to +18 °C in cooling, +20 to +53 °C in heating
- Victaulic® water connections

### Technical focus:

- Fan type (number): axial fan (3), optional AC, EC and high pressure EC fans
- Remote LAN connection as standard

## Available options

Options					
Pump	Pump drive	Hydraulic options	Ambient options	Control options	Electrical options
Single pump low pressure	Fixed speed	Low water pressure sensor <sup>1)</sup>	Finned coil treatment - epoxy	Energy meter	EC fan(s) option
Single pump high pressure	Variable twin speed (single pump)	Desuperheater	Finned coil Blygold treatment	Digital input for: Cooling/heating or Night mode or Load Shedding	Power factor correction capacitors <sup>3)</sup>
Double pump low pressure	Variable twin speed (double pump)	Water isolation valves	Outdoor coil protection grid		Soft starter
Double pump high pressure	Constant outlet pressure (single pump) <sup>2)</sup>		Rubber pads (supplied loose)		
	Constant outlet pressure (double pump) <sup>2)</sup>		Spring damper (supplied loose)		
			Container transport		
			Acoustically insulating compressor jacket		
Refrigerant options					
					Refrigerant gauges (HP and LP manometers)

1) Low water pressure sensor is supplied loose when selected as an option without pump and hydraulic kit. To be installed on site. 2) Available on special quotation, please contact your local sales representative. 3) Only for U - 150/170 CM, CN, CO.

**U - 050/060/070/075 CM, CN, CO****Cooling capacity: 49,9 to 75,3 kW****Heating capacity: 53,5 to 80,0 kW**

High seasonal efficiency in cooling, maximum SEER 4,54 in this range. ECOi-W Series offers a variety of options to meet your needs.

# ECOi-W R410A, the solution for hotels, offices and industry

ECOi-W provides the optimal performance in any climate.

## 1 High energy saving and comfort

- High SEER / SCOP
- Quiet operation
- Integration with ECOi VRF systems via BMS control
- Centralized remote management system

## 2 High flexibility

- Capacity range from 20 to 210 kW
- Customisable design
- Operating range: -17 °C (heating) to 50 °C (cooling)
- Wide range of hydraulic options
- Wide range of communication protocols

## 3 High quality

- Defrost limiting coil design (140 to 210 kW)
- Optimised design for service and maintenance
- Compact footprint

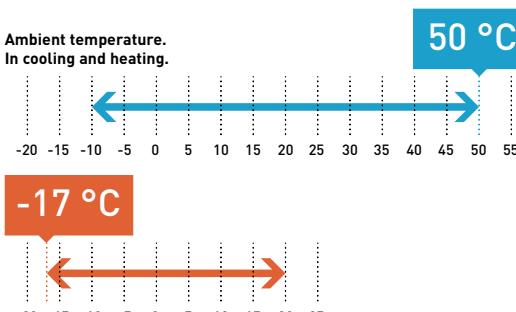

### Operating conditions

Panasonic ECOi-W provides a wide operating range from -17 °C in heating to 50 °C in cooling.

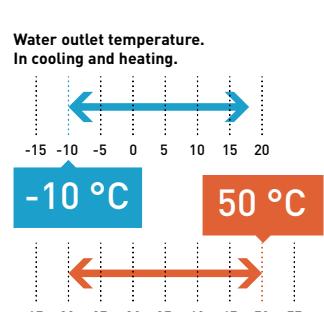

### Water outlet temperature in cooling.

A water outlet temperature of -10 °C in cooling offers a uniqueness to the ECOi-W Series, which can ensure the operation temperature of the process equipment in factories.

Ambient temperature.  
In cooling and heating.

Water outlet temperature.  
In cooling and heating.

Cooling: Outside air temperature [°C (DB)]. Heating: Outside air temperature [°C (WB)].

### Class A pump

Units can be equipped with an efficient pump. A wide range of single and double pump, plus pump drive option is available.

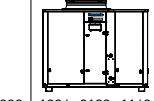

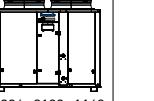

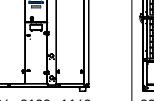

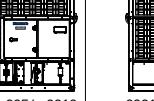

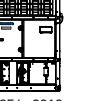

### BP heat exchanger

Very compact & long durability Braze Plate Heat Exchanger.  
Unique design for the size 140 - 210 improving frost protection and efficiency.

### Axial AC

The microprocessor control automatically adjusts the fan speed as a function of the operating conditions.

1) Those are the data with variable flow. 2) Following Eurovent and COMMISSION REGULATION (EU) No 811/2013 for low-temperature heat pumps. Scale from A+++ to D, as of 26th September 2019.

## Simple user friendly control

In addition to basic control functions...

- Intelligent logic control for inlet water temperature
- Night setback operation to reduce electrical consumption and noise
- Automatic test operation at the push of a button

## Victaulic® grooved connection

Victaulic® Installation-Ready™ couplings assure proper piping installation.

Optimised design to reduce installation effects, including noise and vibration attenuation.

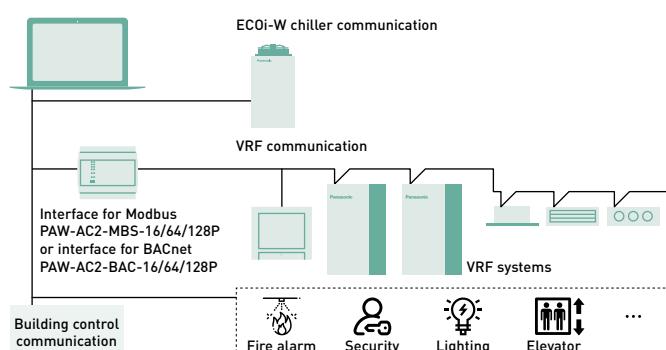

Model type supplied may vary.

## BMS integration

Modbus RTU as standard.

Modbus TCP/IP, BACnet IP and BACnet MSTP as optional availability.

Integrated systems with ECOi-W Chiller, VRF and BMS control can be offered.

## Bluefin for more durability

Bluefin hydrophilic coating improves defrost performance and reduces damage for a longer life time.

\* Available in heat pump range.

## Low noise

ECOi-W series is equipped with the compressor phonic insulation box as a standard.

\* Standard in 20-40, 140-210. Optional in 45-125.

# Features of ECOi-W R410A cooling only outdoor units

## ECOi-W R410A cooling only outdoor units.

- High seasonal efficiency
- Ambient temperature operating range: -10 to +50 °C
- Water outlet temperature range: -10 to +18 °C
- Optimised design for service and maintenance
- Simple user friendly control as standard
- Modbus RTU as standard

### Technical focus:

- Chiller type: cooling only
- Refrigerant type: R410A
- Heat exchanger: stainless steel plate heat exchanger
- Flow switch, water safety and air purge valves included
- Water filter included (mandatory to be installed on site)
- Night mode setting to save energy and reduce noise level
- Water compensation curve control

## U - 020/025/030/035/040 CV

- Super quiet operation

### Technical focus:

- Compressor type (number): Scroll compressors (2)
- Refrigerant circuit: 1
- Fan type (number): axial fan (1)

## U - 045/055/065/075 CV

# Features of ECOi-W R410A heat pump outdoor units

## ECOi-W R410A heat pump outdoor units.

- High seasonal efficiency in cooling and heating
- Eurovent certified
- Ambient temperature operating range: -10 to +50 °C in cooling, -17 to +20 °C in heating
- Water outlet temperature range: -10 to +18 °C in cooling, +20 to +50 °C in heating
- Optimised design for service and maintenance
- Simple user friendly control as standard
- Modbus RTU as standard

### Technical focus:

- Chiller type: heat pump
- Refrigerant type: R410A
- Heat exchanger: stainless steel plate heat exchanger
- Flow switch, water safety and air purge valves included
- Water filter included (mandatory to be installed on site)
- Night mode setting to save energy and reduce noise level
- Water compensation curve control
- Bluefin anti-corrosion coating

## U - 020/025/030/035/040 CW

- Super quiet operation

### Technical focus:

- Compressor type (number): Scroll compressors (2)
- Refrigerant circuit: 1
- Fan type (number): axial fan (1)

## U - 045/055/065/075 CW

- Optional extra-low noise kit available

### Technical focus:

- Compressor type (number): Scroll compressors (2)
- Refrigerant circuit: 1
- Fan type (number): axial fan (1 for 45/55, 2 for 65/75)

## U - 090/105/125 CW

- Optional extra-low noise kit available

### Technical focus:

- Compressor type (number): Scroll compressors (2)
- Refrigerant circuit: 1
- Fan type (number): axial fan (2)

## U - 140/150/170/190/210 CW

- Smart defrost: Defrost limiting design to ensure a constant water outlet temperature even at very low temperatures

### Technical focus:

- Compressor type (number): Scroll compressors (4)
- Refrigerant circuit: 2
- Fan type (number): axial fan (4)
- Remote LAN connection as standard

**1 DEFROST CYCLE  
EVERY 130 MINUTES.**

**Heating Capacity: +22 %  
Integrated COP: +15 %  
Improved SCOP Class**

- Super quiet operation
- Victaulic® water connections
- Modbus TCP/IP as standard

## U - 140/150/170/190/210 CW

Cooling capacity: 128,3 to 207,9 kW

Heating capacity: 144,0 to 218,0 kW

Heat pump chiller series with powerful operation by 4 scroll compressors. Maximum water outlet temperature in heating is up to 50 °C. Defrost limiting design ensures to provide stable hot water even at low ambient conditions.

1) The system may be supplied without a pump, but in order to meet EU ErP compliance, the installation must include a variable speed pump.

2) Fixed speed pump drive on cooling only chiller, is only suitable for installation outside of the EU due to ErP compliance.

3) Variable twin speed drive is supplied as standard with models 20 - 40, when selecting single pump option. Please select alternate pump drive if required.

4) Constant differential pump drive option is only available on a special order basis, and requires additional production time. Please contact your local sales representative.

5) Low water pressure sensor is supplied loose when selected as an option without pump and hydraulic kit. To be installed on site.

6) Electrical backup heaters can only be selected when combined with buffer tank option.

7) Power supply without neutral is only available on a special order and requires additional production time. Please contact your local sales representative.

8) High pressure fan is not available on model 20 due to body design.

Std: Standard item included.

•: Optional item that can be selected.

SO: Special order item.

# Explore the new range of fan coils. Designed to fit with your environment and enhance comfort

Designed to provide performance, comfort and seamless integration within your environment.

## Fan coils highlighted features.

Available in a wide range of designs, the fan coils are perfectly adapted to fit within almost any location.

### 1 Innovation for an optimum comfort

Range of fan coils for heating and cooling with capacities from 0,5 to 21,9 kW in cooling and from 0,6 to 21,5 kW in heating. Bring full year comfort with water based systems.

### 2 Energy efficient and low noise fan

Dynamically balanced and specially designed fans, reinforced acoustic insulation and optimised fan speed staging for lower noise levels.

Improved efficiency with optional EC fan motor.

Offering a great range of capacities and performance, available in a wide range of designs, the fan coils are perfectly adapted to fit within almost any location. Whether the requirements are for cooling only, or for both heating and cooling, there is a fan coil to suit. With a variety of piping and fan configuration, the range is capable of meeting the most stringent of requirements. Line up available in AC and EC fans, it is possible to achieve both powerful performance, but with sustainability in mind.

### 3 Quality and efficient coil

Constructed from staggered copper tubes, mechanically expanded into aluminium fins, providing maximum heat transfer efficiency, durability and hygiene.

### 4 Flexible installation

Various types of unit to fit your needs with flexible installation options. A choice of service side for hydraulic connections, piping configuration and horizontal or vertical installation for ducted units.

**Controllers with sophisticated designs, provide a user friendly interface while enabling an easy and low cost integration to building management systems.**

Optional wired remote controller for AC fan, 2-pipe and 4-pipe application.

PAW-FC-RC1

Optional wired remote controller for AC fan 2-pipe application.

PAW-FC-903AC

Optional wired remote controller for EC fan, 2-pipe and 4-pipe application.

PAW-FC-907AC

PAW-FC-903EC

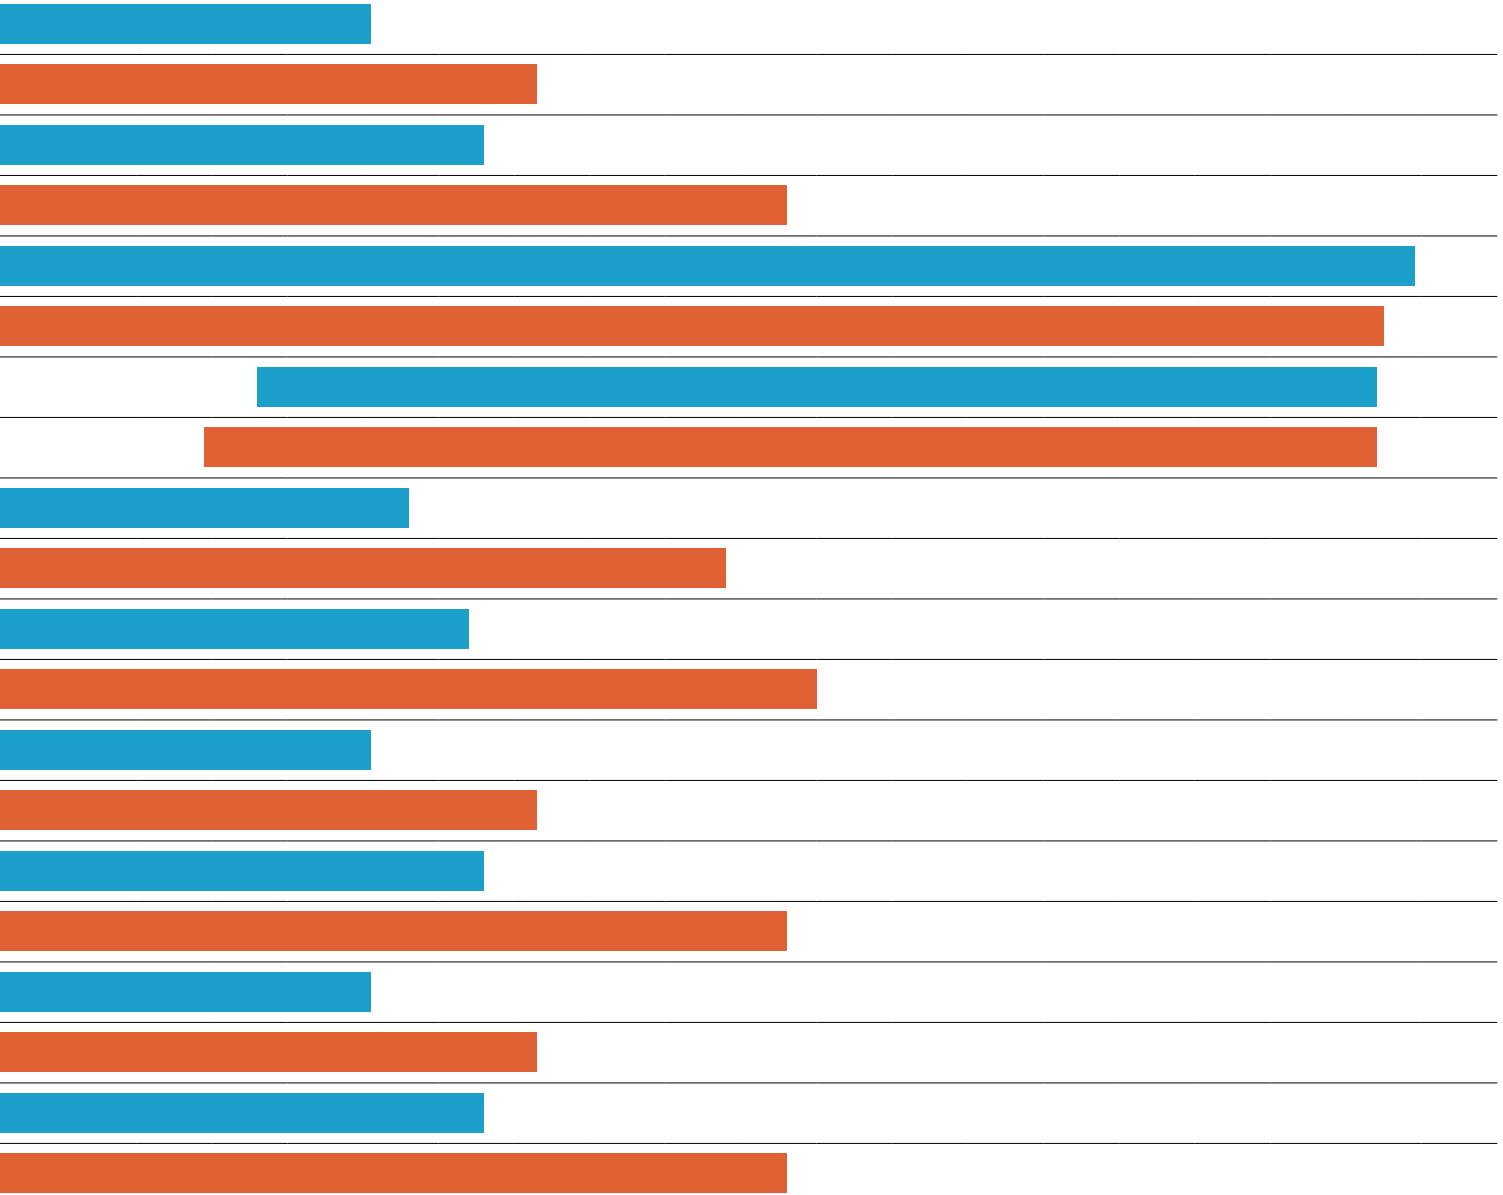

PAW-FC-907EC

1) According to Eurovent standard. Air: 27 °C DB / 19 °C WB. Water in / out: 7 °C / 12 °C. 2) Air: 20 °C. Water in / out: 50 °C / 45 °C. 3) The sound pressure levels are based on [NR] characteristics of a room having volume of 100 m<sup>3</sup> with reverberation of 0,5 seconds.

Values indicated are for 0 Pa external static pressure, for additional pressure characteristics, please refer the selection software.

**Technical focus**

- Cooling capacity from 0,7 to 8,1 kW
- Heating capacity from 0,7 to 10,3 kW
- 5-speed AC fan motor(s)

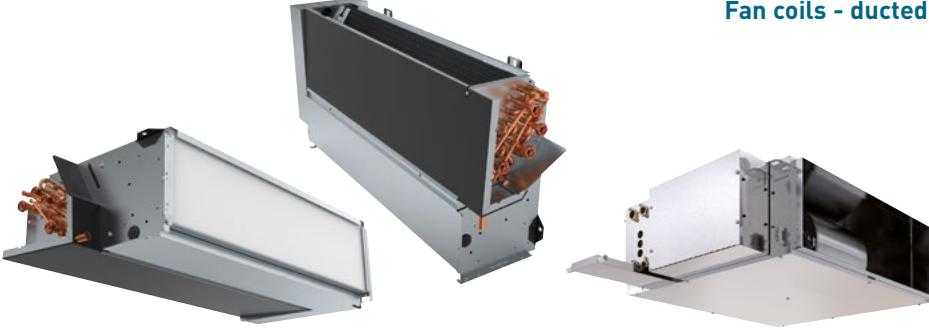

**Operating limits**

Entering water temperature	From 5 to 90 °C
Indoor air temperature	From 5 to 32 °C

**Main features and accessories**

- 2 and 4-pipe configurations
- Left or right hand arrangements
- Ease of installation
- Very low acoustic levels
- 2 way or 3 way ON / OFF valves
- Auxiliary drain pan
- Air intake with removable grid
- G2 filter

1) According to Eurovent standard. Air: 27 °C DB / 19 °C WB. Water in / out: 7 °C / 12 °C. 2) Air: 20 °C. Water in / out: 50 °C / 45 °C. 3) The sound power levels indicated are from return and radiated measurements. 4) The sound pressure levels are based on (NR) characteristics of a room having volume of 100 m<sup>3</sup> with reverberation of 0,5 seconds.

Values indicated are for 0 Pa external static pressure, for additional pressure characteristics, please refer the selection software.

## Technical focus

- Cooling capacity from 0,5 to 9,6 kW
- Heating capacity from 0,6 to 13,6 kW
- Low energy consumption EC fan(s)

## Operating limits

Entering water temperature	From 5 to 90 °C
Indoor air temperature	From 5 to 32 °C

## Main features and accessories

- 2 and 4-pipe configurations
- Left or right hand arrangements
- Can be installed both horizontally and vertically\*
- Ease of installation
- Very low acoustic levels
- 2 way or 3 way ON / OFF valves
- Auxiliary drain pan
- Air intake with removable grid
- G2 filter

\* PAW-FC2E-F040 and PAW-FC4E-F040 may only be installed horizontally.

## Fan coils - high static pressure ducted (AC)

1) According to Eurovent standard. Air: 27 °C DB / 19 °C WB. Water in / out: 7 °C / 12 °C. 2) According to Eurovent standard. Air: 20 °C. Water in / out: 45 °C / 40 °C. 3) Information data considering an hypothetical sound attenuation of the room and installation of -9 dB(A).

## Technical focus

- 6 sizes\*
- Cooling capacity from 1,4 to 8,6 kW
- Heating capacity from 1,1 to 12,8 kW
- 3-speed AC fan motor

## Main features and accessories

- 2 and 4-pipe configurations
- Very low acoustic levels
- Quick access, by simply removing the front grille
- All connections: located at the same side
- Galvanized steel sheet with thermal and acoustical insulation, avoiding condensation on the casing and providing good sound attenuation
- Cleanable synthetic-type air filter

## Operating limits

Entering water temperature From 5 to 90 °C

Indoor air temperature From 5 to 32 °C

\* 5 sizes available for 4-pipe configuration.

1) According to Eurovent standard. Air: 27 °C DB / 19 °C WB. Water in / out: 7 °C / 12 °C. 2) Air: 20 °C. Water in / out: 50 °C / 45 °C. 3) The sound pressure levels are based on (NR) characteristics of a room having volume of 100 m<sup>3</sup> with reverberation of 0,5 seconds.

## Technical focus

- Cooling capacity from 0,5 to 9,6 kW
- Heating capacity from 0,6 to 13,6 kW
- Low energy consumption EC fan(s)

## Main features and accessories

- 2 and 4-pipe configurations
- Left or right hand arrangements
- Ease of installation
- Very low acoustic levels
- 2 way or 3 way ON / OFF valves
- Auxiliary drain pan
- Air intake with removable grid
- G2 filter

## Operating limits

Entering water temperature	From 5 to 90 °C
Indoor air temperature	From 5 to 32 °C

## Fan coils - floor-standing chassis (AC)

**Technical focus**

- 4 sizes
- Cooling capacity from 1,0 to 3,9 kW
- Heating capacity from 1,4 to 4,1 kW
- Version: 2-pipes, AC fan

**Main features and accessories**

- 2 way or 3 way valve ON / OFF
- 3-speed AC fan motor
- Silent unit for optimum customer comfort
- Aesthetic design suitable for residential and hotel applications
- Compatible with IR controller (supplied with IR versions)
- Coil with hydrophilic fins to improve the condensate flow

**Operating limits**

Entering water temperature	From 5 to 60 °C
Indoor air temperature	From 6 to 40 °C

## Smart fan coils

Built-in  
advanced  
thermostat.

\* Smart fan coils is produced by Innova.

## Accessories

**PAW-AAIR-LEGS-1** Kits of 2 legs to protect the water pipings

## Accessories

**PAW-AAIR-RHCABLE** Motor connection cable for units with hydraulic connections on the right

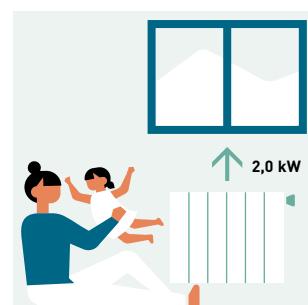

## Stylish floor-standing fan coils with advanced controller

The slimline of Smart fan coils delivers high efficiency climate control.

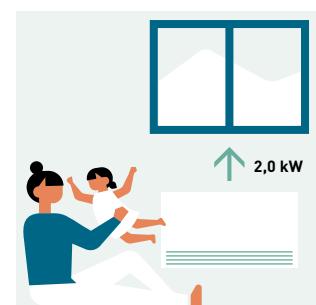

With a depth of just under 130 mm they are at the cutting edge of the market. Blending easily into the home, Smart fan coil's elegant design and product refinements are clear to see in every detail.

Exceptional ventilation efficiency means the motor uses considerably less energy (low wattage). The fan speed is continuously modulated by the temperature controller with proportional integral logic, with undoubted advantages for regulating the temperature and humidity in summer mode.

With standard cast radiators.

With Smart fan coil.

## Technical focus

- 4 operation modes (auto, silent, night-time and maximum ventilation speed)
- Exclusive design
- Extremely compact (only 129 mm deep)
- Cooling and dehumidification functions possible (drain is needed)
- 3-way valve included (no overflow valve needed on the installation if more than 3 units installed)
- Touch screen thermostat

All temperature curves and capacity are available on [www.panasonicproclub.com](http://www.panasonicproclub.com)

**PRO Club**

# Control and connectivity

## Simple user friendly control for outdoor units

A control panel with intuitive design is equipped on all ECOi-W systems as standard. The microprocessor based control has a new IHM logic and implements a smart handling for your demand.

### Basic operation.

- ON / OFF setting
- Cooling / Heating mode setting

### Energy Saving.

- Intelligent logic control for inlet water temperature
- Night setback operation to reduce electrical consumption and noise
- Part load operating mode
- Maximum discharge temperature control

### Service / Maintenance.

- Automatic test operation at the push of a button
- Alarm notice with the latest 10 alarms
- Counter for operating hours of compressor and pump
- Compressor operating limits saved in a flash memory

### Others.

- BMS compatible (RS485 ModBus RTU or BACnet MSTP protocol)

## Remote control kit

### PAW-SYSREMKIT for R410A models

### PAW-SYSREMKIT1 for R32 models

Simple remote control for the need to be installed remotely from the units.

#### Features:

- 8 lines of display with selectable blue and white back light
- Push-and-roll knob for easy operation
- Schedule function
- Alarm button with LED indicator
- Firmware can be upgraded via USB interface

## New remote monitoring service ECOi-W Cloud

### PAW-CM000SP041

Remote access in real time to optimise the service and maintenance work.

Alarm notification via e-mail.

Reporting and graph visualization with 300 varieties.

Various LED signals on the hardware to check the status on site.

#### Technical focus:

- Maximum 10 outdoor units connectable
- Modbus RTU is required
- History of data interval up to 5 minutes
- 4G SIM card fitted
- IP65 casing
- Optional antenna is available in the case that 4G signal is not good enough

# Wired controllers for AC and EC fan coils

## Advanced wired remote controller (AC)

### PAW-FC-RC1

This advanced controller provides a higher level of comfort in heating. The sensor can be used as a water flow sensor, stopping the fan when the water temperature is low, avoiding cold drafts in winter.

#### Features:

- For 2-pipe and 4-pipe, AC fan
- Change Over function (cold draft prevention)
- Room thermostat
- 3 outputs, 230 V relays for fan control
- 2 outputs, 230 V relays for heating / cooling control
- Connection to BMS - Modbus RTU slave
- 1 DI for presence detection (key card switch)
- 1 AI for sensor

## Wired remote controller (AC/EC)

Stylish and sophisticated design with backlit LCD display, is suitable for installation within a wide variety of locations such as office, hotel and residential applications. By connecting the controller to the range of AC/EC fan coils, the user can take advantage of the improved performance, higher levels of efficiency and thus improved energy savings.

### PAW-FC-907AC

#### Features:

- For 2-pipe, AC fan
- Back lit LCD screen with touch control
- 3 speed control relay, for fan
- Economizer

### PAW-FC-907EC

#### Features:

- For 2-pipe and 4-pipe, EC fan
- Back lit LCD screen with touch control
- Adjustable range EC fan control
- Economizer
- Connection to BMS via Modbus
- 1 DI for presence detection (key card switch)

## Wired remote controller (AC/EC)

Feature rich and perfectly adapted to control AC/EC fan coils, the PAW-FC-903AC/EC is the addition for any fan coil. With intuitive user interface provided by the push button control and large LCD display, it will fit seamlessly with almost any location.

### PAW-FC-903AC

#### Features:

- For 2-pipe, AC fan
- Back lit LCD screen
- 3 speed control relay, for fan
- Economizer

### PAW-FC-903EC

#### Features:

- For 2-pipe and 4-pipe, EC fan
- Back lit LCD screen
- Adjustable range EC fan control
- Economizer
- Connection to BMS via Modbus
- 1 DI for presence detection (key card switch)

--	--

**Energy saving**

 Refrigerant gas. R32 Our heat pumps containing the refrigerant R32 show a drastic reduction in the value of Global Warming Potential (GWP).

 High seasonal efficiency in cooling mode. SEER follows COMMISSION REGULATION (EU) No 2016/2281.

 High seasonal efficiency in heating mode. SCOP follows COMMISSION REGULATION (EU) No 813/2013.

 EC motor green ventilation. Range of fan coil with improved efficiency with optional EC fan motor.

**High performance and indoor air quality**

 Super quiet. Extra quiet operation is available as standard (with sizes 20 – 40, 140 - 210).

 Bluefin. Bluefin coil comes as standard on all heat pump models. The life time of coils have been extended thanks to the hydrophilic coating.

 Automatic fan operation. The microprocessor control automatically adjusts the fan speed as a function of the operating conditions.

 Ultimate customisation. Various pump, hydraulic, ambient options offered, plus many more. Ultimate customization for your needs and environment.

 Defrost limiting cycle (140 – 210). Each pair of coils can be defrosted wisely while the other pair of coils are running in heating mode. This alternated defrost cycle ensures stable hot water even at low ambient conditions (available on R410A models 140 - 210).

Down to -17 °C in heating mode. The ECOi-W system works in heating mode at outdoor temperature down to -17 °C (down to -15 °C with R32 models).

Up to 50 °C in cooling mode. The ECOi-W system works in cooling mode at outdoor temperature up to 50 °C (up to 48 °C with R32 models).

**High connectivity**

BMS connectivity. The communication port can be integrated into the ECOi-W system and provides easy connection and control. Modbus RTU is equipped as standard. Modbus TCP/IP, BACnet IP and BACnet MSTP as optional availability.

**Reliable quality**

 Quality certified by Panasonic. Panasonic does not compromise on product quality, safety, durability in order to provide the ultimate comfort when you need it most.

 ECOi-W Series are compliant with ErP regulation. SEER follows COMMISSION REGULATION (EU) No 2016/2281. SCOP follows COMMISSION REGULATION (EU) No 813/2013.

Eurovent certified performance. The performance of ECOi-W Series has been certified by Eurovent to prove the high quality and high performance by Panasonic.
