

Panasonic

REFRIGERATION CONDENSING UNITS 2025 / 2026

PANASONIC TOTAL SOLUTION

iCQRE / iCOOL

heating & cooling solutions

Moving to more sustainable refrigeration solutions – iCORE and iCOOL ranges

Panasonic’s iCORE and iCOOL condensing units offer a complete line of cooling solutions using CO₂, HFO, and HFC refrigerants – ideal for retail stores, supermarkets, HoReCa, gas stations, food processing, and cold storage. As the industry transitions toward greener technologies, Panasonic provides systems that address both immediate needs and long-term goals in energy efficiency and enhanced environmental responsibility.

Refrigeration engineered for excellence

Step toward more sustainable cooling solutions.

Panasonic introduces its most extensive and versatile commercial refrigeration range to date. This milestone reflects a significant strategic evolution.

The world keeps moving. So must cooling.
Meet our refrigeration portfolio.

Complete line of cooling solutions using CO₂, HFO and HFC refrigerants.

Panasonic unveils iCORE and iCOOL refrigeration ranges.

The portfolio introduces two distinct product ranges, designed to provide commercial refrigeration to a wide range of applications including retail stores, supermarkets, HoReCa sector, gas stations and cold storage applications:

iCORE

iCORE

Move to natural refrigerants.

Panasonic's flagship range of CO₂ condensing units, representing the core of future-proof, natural refrigerant technology.

The iCORE range offers a broad selection of cooling capacities, with up to 29 kW for medium temperature applications, and up to 15 kW for low temperature requirements.

iCOOL

iCOOL

Reduce your energy bills with advanced Inverter technology.

A comprehensive range of Inverter HFC and A2L-ready solutions, designed to meet today's market needs while supporting the transition to lower-GWP refrigerants. The iCOOL range covers a wide spectrum of cooling capacities – up to 42 kW for medium temperature applications, and up to 14 kW for low temperature needs.

These brands reflect Panasonic's dual commitment: first, to lead the transition to more sustainable refrigerants; and second, to deliver long-term energy savings and lower electricity bills through advanced Inverter technology, benefiting both today's systems and those ready for the future.

Solution with high energy saving

Panasonic's iCORE and iCOOL ranges of condensing units offer a reliable solution for a wide range of applications, including convenience stores, supermarket, gas stations and cold rooms.

Showcases.

Convenience stores, supermarkets, gas stations.

Cold room application to keep food fresh

- Multiple installation capabilities. Unparalleled flexibility:
- Food retail applications (convenience store, supermarkets, gas stations)
 - Food service applications (restaurants, canteens, schools)
 - Non-food applications (warehousing, industrial storage, healthcare)

iCORE and iCOOL cold room application integrated with Panasonic PACi NX Series high temperature

Panasonic offers various solutions for cold rooms by combining a wide range of products. Integrated with PACi NX Series, it allows for flexible design and installation.

Condensing units – iCORE and iCOOL ranges for refrigerated room.

PACi NX Series for cooling rooms between 8 °C WB and 24 °C WB.

iCORE range – Naturally efficient cooling

iCQRE

Panasonic’s iCORE range is a new generation of CO₂ condensing units, built on more sustainability, energy efficiency, and flexibility. Using CO₂ – a natural refrigerant – iCORE supports today’s environmental goals while delivering reliable, high-performance cooling.

Choose a greener solution by Panasonic.
iCORE range – CO₂ condensing units for medium and low temperature refrigeration applications, tailored for demanding needs.

System reliability and precise temperature control are critical to maintaining product quality and ensuring food safety for end customers. Panasonic’s solutions are also designed for high energy efficiency, helping businesses reduce operational costs while supporting their environmental responsibilities.

Why CO₂?: Natural refrigerant

EU F-Gas regulation is a key priority for European countries. It ensures compliance with the Kigali Amendment supporting international climate commitments on greenhouse gases and leading the global transition to climate-friendly HFC-free technologies. Carbon dioxide (R744) is regaining its place in the refrigeration world. Driven by environmental concerns, legislation now requires increased adoption of ‘alternative’ refrigerants, such as CO₂. CO₂ is an environmentally-friendly solution, with zero ODP and “GWP” (Global Warming Potential)=1 means natural substance in the atmosphere.

In Europe a step-by-step HFC reduction has been in place since the F-Gas regulation was introduced in 2015. Countries all over the world have actively been preparing to enact the necessary domestic legislation to implement the agreement to reduce the use of HFCs. Panasonic is now able to provide a solution in Europe with CO₂ refrigeration systems to prevent global warming and to support environment-friendly retail operations. The following table shows how well R744 (CO₂) performs regarding environmental impact and safety.

ODP (Ozone Depletion Potential)=0 - GWP (Global Warming Potential)=1					
	Next generation refrigerant			Current refrigerant	
	CO ₂	Ammonia	Isobutane	R410A	R404A
ODP	0	0	0	0	0
GWP	1	0	4	2090	3920
Flammability	Non flammable	Light flammable	Flammable	Non flammable	Non flammable
Toxicity	No	Yes	No	No	No

Comparison of CO₂ emissions

Energy saving
25,4% freezer
16,2% refrigeration

CO₂ emission
67% reduction

Direct influence ¹⁾

Indirect influence ²⁾

1) Direct influence presents the effect of refrigerant leakage comparing R744 (CO₂) with R404A.

2) Indirect influence presents CO₂ emissions linked to power consumption of CO₂ unit and conventional units.

By Panasonic research in Japan. Comparing 6 shops average for R404A Inverter multi condensing unit.

A more sustainable refrigeration systems in your food retail

CO₂ refrigerant is the choice to curb carbon footprint of any business organization, especially to food retailers, to whom it brings key advantages.
Panasonic professional strongly supports your projects to meet customer's request!

* Case study based on iCORE OCU-CR CO₂ Series CO₂ units.

10 HP MT TYPE
(OCU-CR1000VF8).

(OCU-CR200VF5A).

Reach-in freezer (field supplied).

Serve-over counters, showcase and walk-in refrigerator (field supplied).

Nolan's Supermarket.

Nolan's Supermarket celebrated its 60th year in business with an extension and full refurbishment which completely overhauled the existing store.

A particular focus of the project was to create a state-of-the-art refrigeration system operating on the 'Zero Ozone Depletion' plus ultralow GWP of 1 natural refrigerant CO₂, and as part of the scheme. Panasonic CO₂ condensing units - iCORE OCU-CR CO₂ Series have been chosen because of the high performance and reliable quality.

The safe refrigeration systems for your healthcare business

CO₂ is the right refrigerant to curb carbon footprint of any business organization. In addition, there are advantages specially for healthcare business. The project example shows one of the warehouse in the healthcare laboratory which requires several cold rooms there to keep bio-products safely.

* Case study based on iCORE OCU-CR CO₂ Series CO₂ units.

STEMCELL Technologies.

STEMCELL Technologies is a global biotechnology company that develops, manufactures and sells products and provides services that support academic and industrial scientists. Panasonic CO₂ condensing units - iCORE OCU-CR CO₂ Series have been chosen to fulfill the expectation of environmental-friendly and safety requirements. The products with reliable quality and high performance was also an essential point.

iCORE OCU-CR CO₂ Series

CO₂ transcritical condensing units. iCORE OCU-CR CO₂ Series offer a wide range of refrigeration systems, meeting the specific needs of various commercial applications.

Superior cooling capacity at each evaporating temperature.

CO₂ transcritical condensing units - iCORE OCU-CR CO₂ Series have a high cooling capacity at each set point. The CO₂ 2-stage compressor developed by Panasonic is designed to compress CO₂ refrigerant twice; it reduces the load in operation by half (compared to 1-stage refrigerant compression) and delivers increased durability and reliability.

Units can be programmed to run at low and medium temperatures at initial set-up. These settings can then be modified by turning a simple and user friendly rotary switch to further enhance energy savings.

MT/LT type: 200VF5A - 4 / 2 kW.

2,86 SEPR cooling.
1,49 SEPR freezing.

* Model 1000VF8A.

OCU-CR1000VF8(SL) / OCU-CR1000VF8A(SL) ²⁾.
Cooling capacity (kW)

MT/LT type: 2000VF8A - 29 / 15 kW.

3,10 SEPR cooling.
1,64 SEPR freezing.

OCU-CR2000VF8A(SL) ¹⁾.
Cooling capacity (kW)

1) Ambient temperature: 32 °C, 230 V, refrigerant: R744, suction gas temperature: 18 °C. 2) Ambient temperature: 32 °C, 400 V, refrigerant: R744, suction gas temperature: 18 °C.

1 Superior efficiency with reliable quality

- Panasonic has combined the 2-stage compressor with the split cycle for increased efficiency
- High seasonal performance. SEPR: maximum 3,83 in cooling, 1,92 in freezing*
- High COP at high ambient temperature

* 200VF5A.

2 Heat recovery port ¹⁾ as renewable energy

- Maximum 16,7 kW ²⁾ of heating for free
- Optional possibility to get subsidy (depending on location)
- Easy connection process

1) For models 1000VF8A and 2000VF8A. 2) For model 1000VF8A.

3 Flexible installation

- Set-points at medium or low temperature available depending on applications
- Compact unit
- Silent operation
- Long piping length: maximum 100 m*
- High external static pressure
- Transfer pressure control for stable electric expansion valve control in showcases*

* For models 1000VF8A and 2000VF8A.

Technology by Panasonic

Reliability is our main target. We ensure excellent quality control established by skilled factory team.

iCORE OCU-CR CO₂ Series 20 HP MT/LT model.

The iCORE OCU-CR CO₂ Series now includes 20 HP MT/LT model, a highly efficient multi compressor solution.

- Multi-compressor systems
- Smaller footprint
- Maximum piping length of 100 m
- Cooling capacity can be controlled from 25 to 100% under partial load
- Flexible and precise control capabilities with digital input/output

Energy efficient multi compressors operation.

By distributing the workload between two compressors, the system operate efficiently, adjusting capacity to match the varying cooling demands. Compressors 1 and 2 alternate every 10 days to ensure even load distribution.

Example of compressor operation.

Reliable CO₂ technology by Panasonic

- Reliable quality: Made in Japan
- 19500 units sold and installed in more than 5200 retail operations such as convenience stores and supermarkets in Japan*
- Excellent quality control established by skilled factory team

* As of the end of December '23.

Panasonic's combined technology of the 2-stage compressor with the split cycle.

- Panasonic 2-stage rotary compressor delivering powerful performance for more than 20 years
- Split cycle* enhances cooling effect

* Available for 200VF5A, 400VF8A, 1000VF8A and 2000VF8A models.

** In the case that the standard cycle with 1-stage rotary compressor was compared.

Watch the highlighted technology video.

Standard cycle.

Split cycle.

Heat recovery function for heating

This function offers refrigeration combined with heating all in one system. The ground-breaking solution allows for increased opportunity to cut running costs by utilizing exhausted heat from refrigeration and transferring to the energy source for heating.

16,7 kW¹⁾
of hot water
for free

What is heat recovery function?

Solution example.

Heat recovery system can produce both heating and refrigeration.

1) Tested with OCU-CR1000VF8A. Under the condition: ambient temperature 32 °C, evaporation temperature -10 °C. 100% Partial load. 2) Local supply.

* Controllers: PAW-C02-PANEL-C or local supply.

Refrigeration designer available in Panasonic PRO Club.

This simple design tool supports engineers, installers, and technicians to make a quick calculation for commercial refrigeration systems.

- Evaporation temperature selection
- Cooling capacity calculator
- Refrigerant pipe calculation
- Electric expansion valves calculation
- Refrigerant amount calculation

Ready to works on all devices, computers, tablets and smartphones!!

Control and connectivity

Panasonic CO₂ condensing units - iCORE OCU-CR CO₂ Series is optimized with Panel-C intelligent controller and a service checker for professionals. It can be easily integrated with major monitoring systems.

Modbus compatibility with monitoring system

Panasonic CO₂ condensing units - iCORE OCU-CR CO₂ Series can be supervised by major monitoring system such as CAREL, Eliwell, COPELAND, Danfoss, RDM and Pego. Monitoring system ensures the recording, monitoring and reporting of temperature conditions etc... of entire CO₂ condensing units - iCORE OCU-CR CO₂ Series system at shops.

Monitoring system					
					
Standard boss & boss-mini	AK-SM Series*	TelevisGo	Xweb	DMTOUCH	TeleNET

* M2M1-10 gateway (Model code: FDS021) is required in addition to the monitoring system. M2M1-10 gateway is a local supply.

Control panel and electric expansion valves

Panel-C, an intelligent controller with a compact chassis. This controller has the smart program especially for showcases and cold rooms. Electric expansion valves (EEVs) are ready with 8 different sizes to meet precisely the field demand and it's delivered with Panel-C as a kit.

Intelligent controller with compact chassis. Panel-C.

- MPXPRO control fully pre-programmed for MT and LT on the same panel
- Compact structure size: 300 x 220 x 120 mm
- Necessary cables, EEV stator, temperature and pressure probes as standard equipment
- Ultracap technology as standard equipment for emergency EEV's closing in the event of mains power failure
- Smart defrost functions, advanced superheat control, light and showcase curtain management, etc
- Own display user terminal plus keypad for programming, built-in switching power supply, Modbus, etc
- Management of HACCP alarms

Electric expansion valves (EEVs) line-up.

- EEV's E2V-CW with 3/8" ODF copper fittings for high pressure applications (CO₂)
- Operation refrigerant temperature: -40 T 70 °C
- Maximum operating pressure for all the models 03, 05, 09, 11, 14, 18, 24 and 30 (MOP) 140 bar
- Maximum operating pressure difference for 03, 05, 09, 11, 14, 18, (MOPD) 120 bar, 24 (MOPD) 85 bar, and 30 (MOPD) 90 bar
- Bipolar stator hermetic IP69K as standard equipment (supplied on panel)
- Mechanical strainer as standard equipment (500 mm mesh)
- Equipercetile control particularly effective at partial load with reliable operation even after 1,2 billion steps

* Please refer the model references in page 626.

CO₂ service checker

PAW-CO2-CHECKER

The service checker is a useful tool which supports your technical tasks on the field such as commissioning, maintenance and troubleshooting for Panasonic CO₂ condensing units - iCORE OCU-CR CO₂ Series.

Main features:

- Reading and recording variable technical parameters
- Main technical parameters available*: pressures, temperatures, opening of expansion valves, states of solenoid valves, rotational speeds of the gas-cooler fan motor, frequency and compressor's current, etc.
- Setting change of operating values possible
- 2D graph visualization for the detailed analysis
- Monitoring an alarm status, for example the status of the compressor oil level, etc.

* Please check all the parameters available in the manual.

To use it, is necessary to download free Device Manager software from the Eliwell website:

Visit: <https://www.eliwel.com/en/Family/DeviceManager.html> using this QR.

Eliwell product name: Device Manager 100. Eliwell part number: DMP1000002000.

iCORE OCU/SCU-CRC Custom-fit CO₂ Series

Complement of the Panasonic’s existing R744 units offering maintenance friendly solutions and customisation features.

MT/LT type:
OCU-CRC060A08

6 kW (MT).
3 kW (LT).

MT/LT type:
OCU-CRC150A08

15 kW (MT).
7 kW (LT).

MT type:
OCU-CRC210M08

21 kW (MT).

MT/LT type:
SCU-CRC150A08

15 kW (MT).
7 kW (LT).

Note: we can offer also iCORE CO₂ transcritical units for MT applications with capacities: 4,4 kW (R744, ET/AT = -10/32°C) and 25,8 kW (R744, ET/AT = -10/32°C). For more details, ask your sales consultant.

Smart interface
(local wireless access).

Service door + panel with
service valve connections.

Quick-change compressor
skid. Based on plate and
elastic hoses connections,
decreasing the vibrations
and noise.

Front wall integrated
manometers.

Refrigeration factory in Europe.

Wrocław, Poland.

Equipped with a dedicated in-house R&D team focused on advancing refrigeration technologies, the site will also house its training hub and a state-of-the-art refrigeration laboratory, set to open in early 2026. With localised production and a streamlined supply chain, the factory will enable significantly shorter delivery lead times across Europe.

High pressure fan ready solution for iCORE SCU-CRC Custom-fit CO₂ Series

SCU-CRC150A08 model with high pressure fan for indoor mounting.

A Plug & Play solution designed specifically for indoor installations. This compact unit helps minimise installation time and reduce overall costs compared to central systems with remote condensers.

The high pressure fan feature for indoor mounting (factory-assembled customized option: stronger fan + special flange to connect the air duct to take out the hot air outside the building) is available when ordering a basic model, which was designed for indoor mounting from the very beginning.

Special high pressure fan with 0-90° adjustable angle flange.
Choose the most convenient way to connect your exhaust duct on field.

Customization options for iCORE OCU/SCU-CRC Custom-fit CO₂ Series

The series offers customisable models that meet customer requirements.

- Factory pre-assembled options (customization options), tested and ready-to-use options list – cutting installation time and reducing labour costs
- Up to 3 customization options selectable*
- The final model name is composed with the customization selections

* Available configurations vary by series.

Coating.

Heat recovery.

High pressure fan.

For OCU-CR and OCU-CRC units. ----- PAW-CO2-RACORD-5/8	 Racord, 3/8\" (9,52) NPT x 3/4\" (19,05) ODS (for K65 pipe connection). For OCU-CR and OCU-CRC units. ----- PAW-CO2-RACORD-3/4		

Spare parts for service and maintenance (model-specific compatibility - see individual descriptions)

 S-006T suction filter, ¾" (19,05) (outer Ø welding) for OCU-CR400VF8(A) and OCU-CRC060A08*. * Sample image – actual product appearance may vary. ----- 80203514142000	 S-008T1 suction filter, ¾" (19,05) (outer Ø welding) for OCU-CR1000VF8(A), OCU-CR2000VF8A, OCU-CRC150A08 and SCU-CRC150A08. ----- 80203514139000 (1)	 D-155T filter dryer, ⅝" (15,88) (in Ø welding) (type CO-085-S) for OCU-CR1000VF8(A) and OCU-CR2000VF8A. ----- 80203513180000 (2)	
 DCY-P8 165 S filter dryer, ⅝" (16,10) (in Ø welding) for OCU-CR1000VF8(A) and OCU-CR2000VF8A. ----- 80203513187000 (3)	 D-152T filter dryer, ¼" (6,35) (in Ø welding) (type CO-082-S) for OCU-CR200VF5A and OCU-CR400VF8(A). ----- 80203513179000 (4)	 DCY-P8 093S filter dryer, ⅜" (9,60) (in Ø welding) for OCU-CR400VF8(A). ----- 80203513190000	 DCY-P12 092 S filter dryer, ¼" (6,40) (in Ø welding) for OCU-CR200VF5A. ----- 80203513186000 (5)

Compatibility relationship: [2] and [3] are compatible; [4] and [5] are compatible; [2] and [4] until end of stock.

iCOOL range – Inverter solutions for today and tomorrow

iCOOL

Panasonic's iCOOL range is built on flexibility and performance. iCOOL range units operate with HFO and HFC refrigerants – including next-generation A2L options with low Global Warming Potential (GWP) – providing a reliable bridge between today's needs and tomorrow's environmental goals.

Designed for high energy efficiency, each unit helps reduce operational costs and environmental impact while ensuring reliable, high-performance operation. iCOOL range is the smart choice for a market in transition – delivering future-ready innovation without compromising the needs of today.

Easy online selection.

Easy installation.

Easy commissioning.

Easy maintenance.

Low noise.

Ambient temperature up to 43 °C.

1 Easy Selection

- Online selection software
- Support to select the best HFC or A2L solution for any application

2 Easy installation

- Lightweight units
- Integrated options from factory
- Refrigeration design
- Flexible and fast delivery

3 Easy maintenance

- 180° access to all components
- ModBus ready

4 Easy commissioning

- Less than 3 minutes
- Local language assistance
- 100% functionally tested

5 Advanced control

- Simple user interface
- Smooth start and stop function
- Working envelope control
- Oil return function

iCOOL is the modular solution of Inverter condensing unit that saves you time during installation and commissioning, as the unit is factory customized to your needs.

Thanks to its large modulation capacity and its multi-refrigerant compliance, it can be used for any commercial refrigeration application providing service down to a minimum of 500 W for a single evaporator. With a very simple user interface, low energy consumption, fast commissioning and easy maintenance, iCOOL is the perfect solution for convenience stores, restaurant cold rooms, fuel stations, food stores, milk cooling and ice making equipment.

iCOOL SE Series

Inverter technology at the cost of ON / OFF.

iCOOL SE Series - Simple Engineering solution.

From 2,5 to 10,0 kW MT and from 1,2 to 3,0 kW LT.

Easy to install, with a simplified commissioning process. Inverter technology has never been this easy.

Save time and operation cost with our energy-efficient units based on Inverter compressors.

- Similar investment cost and significant energy savings vs. ON / OFF technology
- Full BLDC Inverter technology
- Dedicated PLC controller
- Low noise operation
- Suitable for multi-evaporator applications (MT models)
- Designed and manufactured in Europe

Upgrade* of the existing range of iCOOL SE Series units to meet the A2L requirements.
Inverter technology at the cost of ON / OFF.
Simple engineering solution.

- Multi-refrigerant compatibility (install today with HFC, retrofit to A2L after the new F-gas ban dates)
- A2L safety components (additional compressor's compartment ventilation fan + differential air-pressure switch + isolated e-box)

A2L refrigerants are a class of low Global Warming Potential (GWP) gases that serve as alternatives to traditional HFCs, offering mild flammability and low toxicity.

* Currently under development.

A2L is lower flammability and lower toxicity

iCOOL OCU/SCU Series

The possibility to address a larger audience, covering the Condensing Units (CDUs) market that CO₂ is not yet covering today.

MT/LT type: iCOOL OCU/SCU Series.

From 3,5 to 42,0 kW.

Recognising that HFC/HFO systems still represent the majority of demand in the European refrigeration market, the line-up is designed to support current needs while also enabling a smooth transition for those seeking more environmentally friendly alternatives. The iCOOL range addresses this directly, supporting continued use of HFCs and introducing A2L-ready feature, offering customers a flexible, future-proof solution that bridges today’s realities with tomorrow’s requirements.

- Complete capacity range of compact CDUs for multi-evaporator applications
- Significant energy savings vs. ON / OFF
- Low noise units with special silent features: Inverter compressor, EC fan and 6-face soundproof insulation of the compressor compartment
- Customisation options – fully tested and factory mounted

Customization options for iCOOL OCU/SCU Series

The range offers customisable models that meet customer requirements.

Note: our product range also includes Silent (on-off) units for the following applications:

- MT from 3,4 kW to 16,2 kW (R449A, ET/AT = -10/32°C)
- LT from 2,1 kW to 5,2 kW (R449A, ET/AT = -30/32°C).

For more details, please contact your sales representative.

Refrigeration designer.

This simple design tool supports engineers, installers, and technicians to make a quick calculation for commercial refrigeration systems:

iCOOL LCU/WCU Series

The variation of iCOOL to meet demanding installation environment requirements.

iCOOL LCU Series MT/LT type.

Remote compressor base.

MT: From 5,1 to 38,0 kW.

LT: From 2,0 to 8,7 kW.

iCOOL WCU Series MT/LT type.

Water/glycol cooled condensing units.

MT: From 5,1 to 38,0 kW.

LT: From 2,0 to 8,7 kW.

A customization option with a soundproof insulated housing is available for both the LCU and WCU Series.

Noise reduction
(indoor installation).

No space pollution
(city-centres focus).

Available with water cooled condenser
option, for shorter installations and
heat reclaim benefits.

Example installation type:
Inverter units dedicated for indoor mounting.

High performance Inverter compressor base or
compressor set for large, medium, and small
commercial installations. Designed for mid-high or low
temperature applications. Equipped with hermetic
scroll or rotary compressor. Perfect for low noise and
city center applications.

iCOOL LCU Series (remote compressor base) · R448A / R449A / R134a / R513A

PACi NX Elite can cool rooms down to 8 °C

Panasonic PACi NX Elite offers a high quality and efficient solution for high temperature refrigeration applications for facilities such as wine cellars, food processing facilities and supermarkets.

Cooling rooms between
8 °C WB and 24 °C WB

Solutions for cold rooms. Set the room temperature to 8 °C.

Complete range from 2,10 to 23,77 kW. This unique solution is perfect for:
Wine cellars, ice cream factories, flower shops, supermarkets, grain stores, food storage, food processing, food distribution, lunchrooms, vegetable processing...

Just like all the indoor units in the PACi NX range, these units are compatible with all Panasonic control and monitoring solutions, which can be scaled from controlling a single zone to monitoring geographically distributed facilities.

Alternative controller.
Wired remote control.
CZ-RTC6W/WBL/WBLW2
or CZ-RTC6/BL/BLW2.

Wide range of indoor units.
To meet your needs.

PACi NX outdoor unit.
PACi NX, the next generation of developed commercial air conditioning, with an energy-saving concept. The use of energy-saving designs in the construction of fans, fan motors, compressors and heat exchangers has resulted in a high SEER value.

- Flexibility with different type of indoors
- Benefits of hydroxyl radicals
- Out of the box solution from Panasonic. Outdoor, indoor, controller comes as package
- Provides wide scale of control options (individual, central, cloud)
- Redundancy for 2 systems with CONEX controller range and up to 4 indoor unit groups with PAW-PACR4 optional redundancy controller

Wine cellars and special high temperature rooms

One of the main features of the PACi NX series is the possibility of adjusting the product for special applications, not just for regular cooling applications. The purpose of this product information is to explain in detail these special applications that need a cooling operation to maintain the room temperature at +8 ~ +24 °C WB (or +10 ~ +30 °C DB). In order to do this in terms of enthalpy, the indoor unit needs to be oversized and certain parameters need to be adjustable.

Temperature range for wine cellar		
	Indoor	Outdoor
Cooling operation	+8 ~ +24 °C WB	-5 [-15] ~ 43 °C DB

Bringing nature's balance indoors

nanoe™ X, technology with the benefits of hydroxyl radicals.

Abundant in nature, hydroxyl radicals (also known as OH radicals) have the capacity to inhibit pollutants, viruses, and bacteria to clean and deodorise. nanoe™ X technology can bring these incredible benefits indoors so that hard surfaces, soft furnishings, and the indoor environment can be a cleaner and more pleasant place to be.

What is unique about nanoe™ X?

Effective on fabrics and surfaces.

1 | At one billionth of a metre, nanoe™ X is much smaller than steam and can deeply penetrate cloth fabrics to deodorise.

Longer lifespan.

2 | Contained in tiny water particles, nanoe™ X has a long lifespan, which is about 600 seconds, to spread easily around the room.

Huge quantity.

3 | nanoe X Generator Mark 3 produces 48 trillion hydroxyl radicals per second. Greater amounts of hydroxyl radicals contained in nanoe™ X lead to higher performance on inhibition of pollutants.

Maintenance-free.

The image shows nanoe X Generator Mark 3.

4 | No service and maintenance required. nanoe™ X is a filter free solution that does not require maintenance, as its atomisation electrode is enveloped with water during its generation process and it is made with Titanium.

7 effects of nanoe™ X – Panasonic unique technology

Deodorises

Odours

Capacity to inhibit 5 types of pollutants

Bacteria and viruses

Mould

Allergens

Pollen

Hazardous substances

Moisturises

Skin and hair

* Refer to <https://aircon.panasonic.eu> for more details and validation data.

First nanoe™ device was developed by Panasonic in 2003

Generator: nanoe™		Generator: nanoe™ X		
2003		Mark 1 - 2016	Mark 2 - 2019	Mark 3 - 2022
480 billion hydroxyl radicals/sec		4,8 trillion hydroxyl radicals/sec	9,6 trillion hydroxyl radicals/sec	48 trillion hydroxyl radicals/sec
Ion particle structure		10x times	20x times	100x times

nanoe™ X, internationally-validated technology in testing facilities.

The effectiveness of nanoe™ X technology has been tested by 3rd party laboratories in Germany, France, Denmark, Japan and China.

The nanoe™ X performance varies depending on the room size, environment and usage and it may take several hours to reach the full effect. nanoe™ X is not medical device, local regulations on building design and sanitary recommendations must be followed. Test results conducted under controlled laboratory conditions. Performance of nanoe™ X might differ in real life environment.

Licensed in VDI 6022

Certification of a HVAC system under VDI 6022 guarantees that the system fulfills the market’s strictest hygiene requirements.

VDI 6022 – Part 5 ¹⁾ Certification.

Avoidance of allergenic exposure.

Inhibits a wide range of harmful bacteria, viruses, mould, pollen and allergens.

VDI 6022 – Part 1 ¹⁾ & 1.1 ²⁾ Certification.

Ventilation and indoor-air quality.

Panasonic nanoe™ X technology improving indoor air quality.

1) Certification mark only valid for nanoe X Generator Mark 3. 2) Certification mark only valid for nanoe X Generator Mark 2 and Mark 3.

nanoe™ X:
improving
protection 24/7

Acts to clean the work area, such as meat or fish handling in hotel kitchens, food handling in industrial processes, laboratories, wine cellars, etc. So that the indoor environment can be a cleaner and more pleasant place to be all day long and keep the processes in better bacterial conditions.

nanoe™ X works together with the cooling function when during the day but can work independently when the area is not occupied.

Give the system the strength to increase the protection of persons, air, colds stuffs and working surfaces with nanoe™ X technology and convenient control via the Panasonic Comfort Cloud App.

Cleans the air even when there is no work activity.

Leave the nanoe™ X mode ON to inhibit certain pollutants and deodorize before start the work activity again.

Improves your environment and better protects the products handled when you are or not at work.

Enjoy a cleaner comfortable space both when working indoors and simply when it comes to better protecting products in the cold room.

Panasonic Heating & Cooling Solutions is incorporating nanoe™ technology in a wide range of equipment

Wall-mounted.
Built-in nanoe X Generator Mark 3.

Ceiling.
Built-in nanoe X Generator Mark 2.

4 Way 90x90 cassette.
Built-in nanoe X Generator Mark 1.

Adaptive ducted unit.
Built-in nanoe X Generator Mark 2.

CZ-RWS3	Infrared remote controller

Technical focus

- Modern, flat design with a stylish matte white finish featuring
- DC fan for better efficiency and control
- Five-direction automatic air flow adjustment for cooling and heating
- Six directional piping outlet
- Quiet operation
- nanoe™ X (Generator Mark 3: 48 trillion hydroxyl radicals/sec) as standard for better indoor air quality
- Wired remote control CZ-RTC6WBL and CZ-RTC6BL allows easy system setting via Bluetooth®
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

Accessories	
PAW-PACR4	Interface to run up to 4 indoor unit groups on backup and alternative run
PAW-WTRAY	Tray for condenser water compatible with outdoor elevation platform
PAW-GRDBSE20	Outdoor base ground support for noise and vibration absorption
PAW-GRDSTD40	Outdoor elevation platform 400 x 900 x 400 mm
CZ-CENSC1	Econavi energy saving sensor

Closed discharge port

When the unit is turned OFF, the flap closes completely to prevent dust getting into the unit and to keep the equipment clean.

Piping outlet in six directions

Piping outlet is possible in six directions of; right, right rear, right bottom, left, left rear and left bottom, making the installation work more flexible.

Air distribution is automatically altered depending on the operational mode of the unit

Technical focus

- High performance turbo fan
- Econavi: An optional intelligent sensor to reduce waste of energy
- nanoex™ X (Generator Mark 1: 4,8 trillion hydroxyl radicals/sec) as standard for better indoor air quality, indoor unit internal cleaning with nanoex™ X plus dry operation
- **New** graphite black and white panels providing options to suit a variety of light commercial applications
- Lower noise in low fan operation
- Light weight, easy piping and integrated drain pump for quick installation
- Wired remote control CZ-RTC6WBL and CZ-RTC6BL allows easy system setting via Bluetooth®
- High volume fresh air input with optional air-intake plenum and chamber (CZ-FDU3 + CZ-ATU2)

White and graphite black panels available for the 4 way 90x90 cassette.

Standard panel, white (RAL9003).

CZ-KPU3

Econavi panel, white (RAL9003).

CZ-KPU3A

Standard panel, graphite black (RAL9011).

CZ-CENSC1	Econavi energy saving sensor

Technical focus

- Wide air distribution for large rooms
- Horizontal air flow reaches maximum 9,5 m
- Fresh air connection available on the unit
- Slim design with 235 mm height fits narrow space
- Silent operation
- nanoe™ X (Generator Mark 2: 9,6 trillion hydroxyl radicals/sec) as standard for better indoor air quality
- Wired remote control CZ-RTC6WBL and CZ-RTC6BL allows easy system setting via Bluetooth®
- Twin, Triple and Double-twin split options
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

Further comfort improvement with air flow distribution

Horizontal air flow reaches maximum 9,5 m. This is ideal for wide rooms.

The wide air discharge opening expands the air flow to the left and right. The unpleasant feeling caused when the air flow directly hits the human body is prevented by the "Draft prevention position", which changes the swing width, increasing the degree of comfort.

CZ-RTC6WBLW2	CONEX wired remote controller with Wi-Fi and Bluetooth®, white
CZ-RTC6	CONEX wired remote controller (non-wireless), black
CZ-RTC6BL	CONEX wired remote controller with Bluetooth®, black
CZ-RTC6BLW2	CONEX wired remote controller with Wi-Fi and Bluetooth®, black
CZ-RTC5B	Wired remote controller with Econavi function
CZ-RWS3 + CZ-RWRC3	Infrared remote controller and receiver
PAW-WTRAY	Tray for condenser water compatible with outdoor elevation platform

Accessories

PAW-GRDBSE20	Outdoor base ground support for noise and vibration absorption
PAW-GRDSTD40	Outdoor elevation platform 400 x 900 x 400 mm
CZ-CENSC1	Econavi energy saving sensor
CZ-56DAF2	Air outlet plenum for S-3650PF3E
CZ-90DAF2	Air outlet plenum for S-6071PF3E
CZ-160DAF2	Air outlet plenum for S-1014PF3E
PAW-APF800F	BION air pollutant filter for S-3650PF3E
PAW-APF1000F	BION air pollutant filter for S-6071PF3E
PAW-APF1400F	BION air pollutant filter for S-1014PF3E

Technical focus

- 2 installation possibilities (horizontal / vertical)
- Maximum external static pressure: 150 Pa
- Selectable inlet air position (rear / bottom entry)
- Improved drain pan suitable for both horizontal / vertical installation
- Drain pump included
- nanoe™ X (Generator Mark 2: 9,6 trillion hydroxyl radicals/sec) as standard for the long duct piping case*
- BION air pollutant filter for certain types of pollutants, such as nitrogen dioxide (NO₂), nitrogen oxides (NO_x) and Ozone (O₃) (optional)
- Wired remote control CZ-RTC6WBL and CZ-RTC6BL allows easy system setting via Bluetooth®

* The performance of nanoe™ X air can be expected even by 10 m long duct by Panasonic internal survey.

2 installation possibilities (horizontal / vertical)

Vertical installation is available. External static pressure 150 Pa, sufficient for remotely installing units away from the rooms.

Improved drain pan design

Just one drain pan for both horizontal and vertical installations. No need to modify the unit.

PACi NX Jet Air Stream · R32

For light refrigeration applications.

PCZ-AHRX0012	Touch panel controller with Modbus integration and group control up to 8 units

Technical focus

- Energy-saving solution for year-round heating and cooling in large and high spaces
- High air volume up to 5000 m³/h and long maximum air throw distance of 30 m
- Optimal comfort with Smart Jet - self-directing nozzles

Accessories	
PCZ-AHRP0681	Recessed mounting box for controller
A PCZ-AHRX0051	Ducted air intake plenum (1x DN 355 mm) for VTVF140N and VTVF140P
A PCZ-AHRX0052	Ducted air intake plenum (2x DN 355 mm) for VTVF250N and VTVF250P
B PCZ-AHRX0061	Ground air intake module (VTVF250 requires two of them)
C PCZ-AHRX0071	Air supply grille for ducts

Accessories for remote air intake configurations.

Manual version.

Ducted version.
