# About Us

## About Us

Panasonic: celebrated two major milestones in 2018

# Panasonic

### Panasonic Corporation, 100th Anniversary

Look ahead to the "Future," keep taking on challenges. Starting back in 1918, Panasonic has constantly added to its guarantee for innovation, taking tomorrow's technologies and applying them to today's needs.

Always making "people" central to our activities, and thereby focusing on "people's lives," we will continue to provide better living for our customers. This is the unchanging commitment we at Panasonic have had over many years.

Now, we are aiming to expand our contribution to "better living" everywhere. This means that in the variety of spaces where our customers go about their lives, ranging from inside the home, the office, the store, the automobile, and the airplane, as well as in the town, we will provide not only single pieces of hardware, but also total solutions including software and services. We will pursue the concept of "A Better Life, A Better World," meeting the needs of each individual customer.

To that end, we will leverage the strengths that we at Panasonic have long developed in our consumer electronics business, together with the strengths of our business partners who have in-depth expertise in many areas, and we will work to combine these strengths by pursuing "Cross-Value Innovation." In this way, we will create new value. This is the new and challenging task we are now addressing.

### Panasonic Heating and Cooling, 60th anniversary

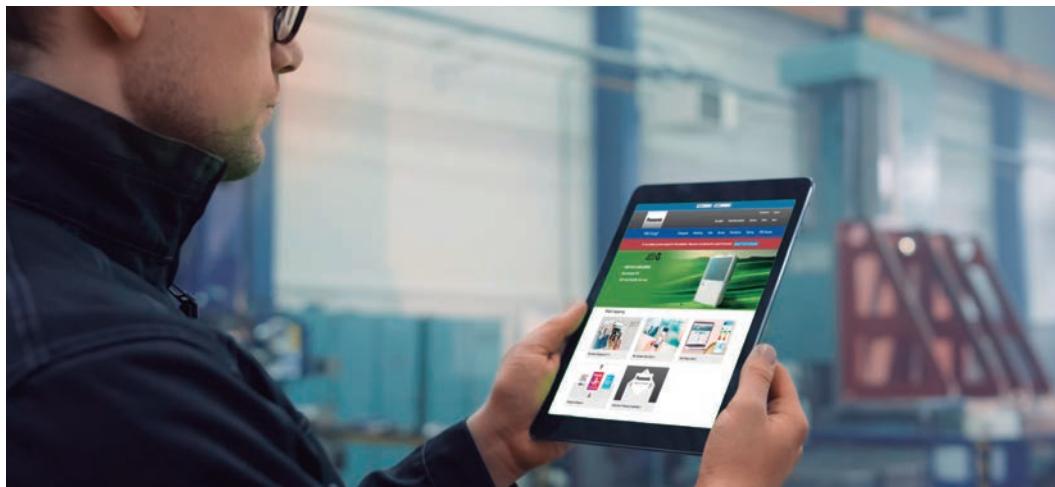

Panasonic starts with a desire to create things of value. Sixty years ago, as hard work and dedication results in one innovative product after another, the new company took its first steps towards becoming the electronics giant of today. Heating and Cooling Solutions designed and produced by Panasonic since 1958.

## About Us

Panasonic Pro Club. The Professional Website

# Panasonic

Panasonic has an impressive range of support services for designers, specifiers, engineers and distributors working in the heating and cooling markets. Panasonic PRO Club is the online tool which makes your life easier! You just have to register and a lot of functionalities are freely available to you, where ever you are, from your computer or smartphone!

### VRF Designer

Building on the success of the ECOi VRF Designer software, this package provides air conditioning system designers, installers and dealers with a program to design and size projects for Panasonic's VRF ranges.

### Aquarea Designer

Panasonic provides bespoke software helping system designers, installers and dealers to very quickly design and size systems, create wiring diagrams and issue bills of quantities at the push of a button.

### Panasonic helps you to calculate the system label

From 26th September 2015, installers can be assured that all products manufactured after this date will be sold with the required ErP labels which will aid installers with their paperwork. While it is the manufacturer's responsibility to issue their products with the required labels, the installers will need to calculate and issue an efficiency label for the entire heating system. Whether installing a new heating system or installing new boilers, controls or renewables into an existing system, it is, and will continue to be, the installer's responsibility to calculate and issue efficiency labels. Calculators which assist installers with this process are available on the Panasonic Heating and Cooling Solutions website.

## About Us

Panasonic Brand

# Panasonic

### Constantly Improving

Panasonic know that the best is always yet to come. This is why their air conditioning and heat pump solutions are constantly upgraded.

They are always looking to improve their technology; finding the most efficient solutions that save our customers money.

Their Technology & Design teams anticipate the needs of tomorrow. Panasonic look to produce smaller, quieter, efficient solutions - with better technological features – that can reduce energy consumption while providing suitable temperature conditions for the user.

### A Globally Trusted Brand

With more than 50 years of experience, selling to more than 120 countries around the world, Panasonic is unquestionably one of the leaders in the heating and cooling sector.

With a diverse network of production and R&D facilities, Panasonic delivers innovative products incorporating cutting-edge technologies that set the standard for air conditioners worldwide.

Expanding globally, Panasonic provides superior international products transcending borders.

### 100% Panasonic

Panasonic is also a world leader in innovation as it has filed more than 91,539 patents to improve its customers' lives.

Moreover, Panasonic is determined to remain at the forefront of its market. In all, the company has produced more than 200 million compressors and its products are manufactured in 294 plants which are located all over the world. You can be assured of the extremely high quality of Panasonic's heat pumps.

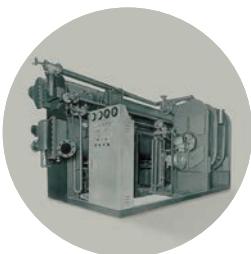

This wish to excel has made Panasonic the international leader in heating and turn-key air conditioning solutions. These offer maximum effectiveness, comply with the strictest environmental standards and meet the most avant-garde construction requirements of our time.

## About Us

History of Panasonic Air Conditioning Group

# Panasonic

Panasonic starts with a desire to create things of value. As hard work and dedication results in one innovative product after another, the new company took its first steps towards becoming the electronics giant of today.

**1958**

First room air conditioner launched for domestic installation.

**1973**

Panasonic launches the first highly efficient air-to-water heat pump in Japan.

**1975**

Panasonic becomes the first Japanese air conditioner manufacturer in Europe.

**1985**

Introduces first GHP (gas heat pump) VRF air conditioner.

**1989**

Introduces world's first simultaneous 3-Pipe heating/cooling VRF system.

**2008**

Etherea new concept of air conditioning systems: high efficiency and high performances with a great design.

**2010**

New Aquarea. Panasonic has created Aquarea, an innovative new, low-energy system.

**2012**

New GHP units. Panasonic's gas-driven VRF systems are ideal for projects where power restrictions apply.

**Looking ahead**

New VRF Systems  
ECOi EX with Extraordinary Energy-Saving Performance and Powerful Operation.

## About Us

### Reliability Facts

#### Reliable comfort comes from reliable technologies

Today, Panasonic air conditioners have earned widespread acclaim throughout the world. A rugged design ensures that the air conditioner will continue to keep the room comfortable, and operate trouble-free for many years.

Panasonic believes this is the true value of an air conditioner, and this is why we subject them to a wide range of stringent tests.

#### Long Term Durability Test

The air conditioner's main mission is to provide a level of durability that allows it to operate stably for years. In order to achieve this, we conduct an accelerated test for 10,000 hours of continuous operation. The results of this test, which is conducted under conditions that are much more severe than actual operating conditions, prove the rugged strength of Panasonic air conditioners.

#### Compressor Disassembly Test

After a test with 10,000 hours of continuous operation, we remove the compressor from a randomly selected outdoor unit, disassemble it, then examine the internal mechanisms and parts for possible failure. Panasonic air conditioners continue to provide their designed performance for many years even after prolonged operation under harsh conditions.

#### Operating Test in Harsh Conditions

In addition to normal operating conditions, an operating durability test is conducted in a high-temperature, high humidity test chamber at a temperature of 55°C. For use in cold climates, the test is also conducted in a low temperature test chamber at -20°C. This test assures that the oil inside the compressor will not freeze during use and interrupt operation.

### Waterproof Test

The outdoor unit, which is subject to rain and wind, is provided with IPX4 waterproof compliance. Contact sections on printed circuit boards are also resin-potted to prevent adverse effects caused by an unlikely exposure to droplets of water.

### Drop Test

Even with the large impacts that may occur due to improper handling during transportation, the product packaging has been strengthened to prevent it from being damaged. In addition to conventional vertical dropping, more severe conditions in which the sides or corners hit the floor first are carefully tested to ensure that the product's rigidity and shock-absorbing materials work to prevent problems.

### Vibration Test

Preventing damage that would hinder the product's performance due to vibration during transport is a major role of the packaging. Panasonic confirms that the product operates properly even after applying vibrations in both horizontal and vertical directions.

### Warehouse Storage Test

During distribution, products may be subjected to extended warehouse storage under unfavourable conditions. To simulate these conditions, we place a weight equal to a stack of five product packages on top of the test package, and leave it in that condition in a room at a temperature of 27°C and a humidity level of 85%. Then, the product is checked for proper operation.

## About Us

Reliability Facts

# Panasonic

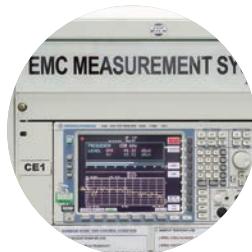

### Noise Test

The operating noise of the indoor and outdoor units is measured in an echo-free chamber. The noise test verifies that the operating noise is low enough so that the product operation will not disturb daily activities including conversations and sleep.

### Amenity Test

An actual air conditioner is operated in a test room that simulates an ordinary living room. Conditions such as the amount of sunlight entering the room from outside are changed while measuring a variety of parameters, such as cooling speed, cooling efficiency, temperature and humidity differences throughout the room. This makes it possible to confirm whether the air conditioner is operating at its designed performance level under ordinary conditions.

### EMC (Electromagnetic Compatibility) Test

This test determines whether electromagnetic waves emitted during operation are sufficiently low to prevent adverse effects, i.e., electrical noise, on signals such as TV and radio broadcasts.

### Remote Control Drop Test

Because the remote control is the main interface between people and the air conditioner, it is naturally subjected to frequent impacts - such as drops and bumps - when it is passed from person to person during normal operation. Panasonic drops the remote control from a height of 1.5 meters at various angles to ensure that no problems in basic performance will result from accidental dropping.

Panasonic is leading the change on adopting renewable energy sources. Panasonic has consolidated its residential and commercial air-conditioning ranges with less than 3kg of refrigerant, including its newly designed RAC floor consoles, split, multi-split and cassettes, to be compatible with R32.

Panasonic recommend R32 because it is environmental friendly. Compared to R22 and R410A, R32 has a very low potential impact on the depletion of ozone layer and global warming. After successfully leading the introduction of R32 in Japan, Panasonic is ready to drive the refrigerant change in Europe.

According to 2014 EU F-Gas Regulation (517/2014), Europe must reduce the Global Warming Performance year by year. This regulation defines how each industry needs to contribute to reach the total European target. In the air-conditioning industry this affects Single Split air-conditioning systems containing less than 3kg of fluorinated greenhouse gases. The refrigerant within this system must be less than 750 GWP by the year 2025. Panasonic is ready now (in 2018) to supply any kind of Residential Single Split and Multi Split system with up to 5 ports in addition to Commercial Splits of up to 14kW.

R32 has a much lower impact on global warming when compared to its blended predecessors - its Global Warming Potential (GWP), is significantly lower than that of R410A. When considering future legislation and the anticipated reduction in the availability of refrigerants, plus a drive towards the use of lower GWP refrigerants; Panasonic products will be future proofed.

R32 is also a more efficient alternative to R410A, with realistic efficiency increases of up to 10%, leading to significant energy savings for building services managers. As R32 is already a familiar component of R410A, the switch doesn't present any new challenges to installers. Procedures including piping and testing remain the same. There may be a need for slightly different tooling, such as recovery systems and leak detectors (see pg. 6), but again this should not present a significant challenge. As with all refrigerants, R32 must be safely handled at all times and spaces properly ventilated when it is being charged and recovered from air conditioning units.

Not everyone is ready for change. Indeed, there are some who resist the future, but we believe in technologies that improve people's lives.

Which is why Panasonic strive to make our air conditioners highly reliable and surprisingly efficient, with minimum noise impact and the lowest environmental footprint possible. To all that we then add sophisticated and elegant designs.

Panasonic will be offering comprehensive training and information on R32 over the coming months, to help installers get to grips with the new technology.

## Panasonic Premier Rewards

An introduction

We are delighted to invite you to Panasonic Premier Rewards, our new reward scheme in conjunction with Panasonic.

This exciting programme allows your company to build Panasonic Premier Reward Points on all purchases of Panasonic Heating and Cooling products purchased through us. For every £1 spent on qualifying products, you will earn one Panasonic Premier Reward Point. On a monthly basis, your Reward Points will be accumulated and once you've earned enough points you can redeem them as Love2Shop vouchers.

### **Example:**

£1000 spent on Panasonic Heating & Cooling products = 1000 points = £14 to spend in Love2Shop Vouchers\* †

There is no minimum spend to join the Panasonic Premier Reward Scheme or to receive Panasonic Premier Reward Points, although the minimum amount of Love2Shop vouchers you are able to redeem is £5.

### **Why Love2Shop**

Panasonic is offering Love2Shop Rewards thanks to the wide variety of ways you can spend those rewards. Love2Shop also offers a very straightforward process for you to shop online, or in person. Love2Shop have over 20,000 outlets to spend their rewards, and it is also possible to collect Reward Cards together for larger purchases that are available on the Love2Shop network for unforgettable experiences such as a holiday, golf break or hotel stay.

### **Administration of the scheme**

The scheme will be operated by Wildwood PR in conjunction with Panasonic. All correspondence will come directly from Wildwood PR, so you can be assured that we will not be sharing your data with third parties.

The Panasonic Heating & Cooling solutions portfolio spans residential and commercial HVAC equipment, heat pumps and cloud services – all of which qualify for Panasonic Premier Rewards.

\* See terms and conditions at [www.aircon.panasonic.eu/GB\\_en/downloads/others/](http://www.aircon.panasonic.eu/GB_en/downloads/others/)

† See terms and conditions, rewards only available in full pounds, no pence

## Panasonic Premier Rewards

How the scheme works

The scheme applies to all purchases of Panasonic Heating & Cooling products that you buy through us. From each purchase, you will collect Points that will build up and be exchanged for Love2Shop vouchers. You will receive a monthly statement from Wildwood PR detailing your available points balance, pending points (points on invoices awaiting payment), and points due to expire (points are valid for 12 months from date of invoice).

We aim to provide a great service and if you have any questions, please do pick up the phone and talk to us, we'll be happy to explain everything.

Love2Shop rewards can be supplied as either E-codes for online use, or as physical gift cards to spend in a choice of over 20,000 stores with the additional flexibility of offering other services such as holidays, days out, experience days and golf breaks. The rewards can be redeemed as a combination of physical cards or e-codes, but please note, that in any given month, you must choose one option only of how you are to receive your rewards.

### **Gift card reward**

- Step 1:** Purchase any Panasonic Heating and Cooling product from us.
- Step 2:** We will calculate the appropriate points
- Step 3:** You will receive you monthly points statement. To initiate your L2S rewards you must reply.
- Step 4:** You will receive them from us or the scheme administrator.
- Step 5:** **GO SHOPPING.**

### **E-code reward**

- Step 1:** Purchase any Panasonic Heating and Cooling product from us.
- Step 2:** We will calculate the appropriate points.
- Step 3:** You will receive your monthly points statement. To initiate your L2S rewards you must reply
- Step 4:** Once Wildwood has received your reply, rewards will be ordered and despatched
- Step 5:** You will need to click on the L2S link within the e-mail and **GO SHOPPING.**

WHAT WILL YOUR REWARDS BRING?

Accepted at over 130 leading retailers including...

For the latest list of accepting retailers, please visit [www.love2shop.co.uk/love2shop-vouchers](http://www.love2shop.co.uk/love2shop-vouchers).  
\*Restrictions apply - see [www.love2shop.co.uk](http://www.love2shop.co.uk) for full details.

## Warranty

Enhanced warranty scheme

# Panasonic

Panasonic – leading the way in Heating and Cooling. With more than 30 years of experience, selling to more than 120 countries around the world, Panasonic is unquestionably one of the leaders in the heating and cooling sector. Applying advanced technologies that truly make life better; we live by an unparalleled commitment to product quality. Panasonic is building on the Japanese tradition of uncompromising quality control worldwide, developing and manufacturing fine products and delivering them to customers everywhere.

Panasonic has developed a warranty scheme that promotes the quality that the brand imbues. There are 3 levels of warranty,

STANDARD - 3 YEARS

EXTENDED - 5 YEARS

EXTENDED+ - 7 YEARS

All of our warranties benefit from full parts and labour allowance, providing peace of mind to the End User. The Installer will benefit from gaining training and understanding of Panasonic products. In turn the installer will be able to provide the End User a longer, more comprehensive warranty.

	Warranty period	Extension option	Fgas (Required)	Registration requirements	Training	Maintenance	Warranty Coverage
				Panasonic	Refcom		
STANDARD	3	Extended	Y <sup>1</sup>	N	Y <sup>2</sup>	Y <sup>4</sup>	Annually Full
EXTENDED	5	Extended+	Y <sup>1</sup>	Y <sup>2</sup>	Y <sup>2</sup>	Y <sup>5</sup>	Annually Full
EXTENDED+	7	N	Y <sup>1</sup>	Y <sup>3</sup>	Y <sup>2</sup>	Y <sup>5</sup>	Annually Full

1) Not required for A2W Monobloc installations (For Extended and Extended +, Installer should have relationship with local Fgas)

2) Installers must be registered with either Panasonic with Refcom or another affiliated body

3) Projects must be registered with Panasonic

4) No training required (Basic knowledge of Heat Pumps Required for A2W)

5) Panasonic training required (Panasonic approved training courses - content provided by Panasonic)\*

\* Training accreditation reference provided by Panasonic following completion of training course required for extended warranty claims

# RAC Residential

**Welcome to the Domestic Range**

Panasonic has developed a range of products designed for you, better than ever before.

With its innovative design, high efficiency and incomparable purification system, the Etherea range has been designed with your clients in mind. Above all, it is also a range for air conditioning professionals, such as yourself, thanks to its broad range of products which are capable of conditioning rooms of all sizes – always with optimal efficiency and incomparable ease of installation. The Etherea range guarantees that you are offering your clients the very best.

**Go green  
Go clean  
Go your way**

Panasonic Air Conditioners are designed to provide more than just comfort cooling to homes. They save energy. They purify your surroundings. They adjust cooling power to suit your living spaces and styles. Living an eco-lifestyle your way is now easier than ever.

**Panasonic air conditioners provide more savings and more comfort**

We believe that going green shouldn't compromise on comfort. That's why Panasonic is introducing the new Econavi system; combining human sensor and control program technology to detect and reduce energy waste by 38% .

Our super silent air conditioners guarantee the purest air to take care of you and your family. And, for a cleaner living environment, the new Nanoe helps purify the air as well as your surroundings. Together, these breakthrough technologies define what Panasonic's Eco Clean Life Innovation is all about – innovations that improve our environment while making life as comfortable as possible.

INTELLIGENT ECO SENSORS

## Highlighted Features (vary by model)

Intelligent Human Activity Sensor and new Sunlight Sensor technologies that can detect and reduce waste by optimising air conditioner according to room conditions. With just one touch of a button, you can save energy.

Exceptional Seasonal Cooling Efficiency based on the new ErP regulation. Higher SEER ratings mean greater efficiency. Save all the year while cooling!

Exceptional Seasonal Heating Efficiency based on the new ErP regulation. Higher SCOP ratings mean greater efficiency. Save all the year while heating!

The A Inverter system provides energy savings of up to 50%. Both you and nature wins!

Panasonic R2 Rotary Compressor. Designed to withstand extreme conditions, it delivers high performance and efficiency.

New nanoe™ utilises nano-technology fine particles to purify the air in the room. It works effectively on airborne and adhesive micro-organisms such as bacteria, viruses and mould.

Particulate matter (PM2,5) can be found suspended in the air, including dust, dirt, smoke and liquid droplets. Sized at 2,5µm, these particles are said to pose health problems as they can easily enter our lungs.

With Super Quiet technology our devices are much more quiet than a library (30dB(A)).

The Perfect Humidity Air controls the humidity level in the air to prevent over-dryness.

More comfort with Aerowings. Direct airflow to ceiling to create shower cooling effect by twin flap built in indoor.

Down to -15°C in heating mode. The air conditioner works in heat pump mode with an outdoor temperature as low as -15°C.

Summer House, this innovative function keeps the house at 7/8°C to avoid freezing pipes during the winter. This function is highly appreciated in summer house or week end houses.

The Panasonic renewal system allows good quality existing R22 pipe work to be re-used whilst installing new high efficiency R410A systems.

The Panasonic renewal system allows good quality existing R410A or R22 pipe work to be re-used whilst installing new high efficiency R32 systems.

Down to -10°C in cooling only mode. The air conditioner works in cooling only mode with an outdoor temperature of -10°C.

The communication port is integrated into the indoor unit and provides easy connection to, and control of, your Panasonic heat pump to your home or building management system.

Internet Control is a next generation system providing a user-friendly remote controller of air conditioning or heat pump units from everywhere, using a simple Android or iOS smartphone, tablet or PC via internet.

New Domestic integration to P-Line - CZ-CAPRA1. Can connect all ranges to P-Line. Full control is now possible.

THE FUTURE IS GREEN,  
EFFICIENT AND HEALTHY

### Etherea, the latest generation of air conditioning

With its elegant, slim design, the new Etherea series provides much more than just cooling or heating. Etherea units feature Panasonic's nanoe™ technology which fights against airborne diseases. The new Etherea series, using R32 refrigerant, achieves high efficiencies and boasts a rating of A+++.

With its innovative technology, Panasonic is committed to creating a better life and a better world.

Optional wired  
remote controller  
CZ-RD52CP -  
£102

Specially designed for offices, retail and restaurant applications, this cassette fits perfectly into 600x600 ceiling grids.

Featuring the best efficiency in its category (heating and cooling up to -10°C, this new cassette can also be connected to KNX, Modbus, EnOcean and Bacnet interfaces for easy integration with your BMS systems. Interfaces have dry contacts (ON/OFF, error message) to enable easy integration.

With the new Intesis Home interface, you can also control the cassette from your smartphone and internet very easily!

### Technical Focus

- Cassettes can be controlled by Intesis Home, KNX, EnOcean, Modbus and Bacnet interfaces
- Can connect to P-Link ECOi control via the CZ-CAPRA1 Interface
- This unit can be installed on R22 pipe work
- Designed for easy installation in the standard European 600x600 ceiling grid
- Operation down to -10°C in cooling and heating modes
- Piping length up to 30m
- Maximum elevation difference up to 20m
- Ultra compact outdoor units for easy installation
- High pressure selector in case of high ceilings (higher than 2.7m)
- Drain pump included (maximum 750mm high)
- Fresh air entry available on the cassette - 80mm diameter

## Accessories

CZ-RD52CP Wired remote controller for Cassette and Ducted - £90

CZ-CAPRA1 Interface to connect to ECOi (P-Link) control - £135

CZ-TACG-1 Wifi adapter - £95

## RAC Residential

### Floor Console - Inverter

# Panasonic

R410A Unit

R32 Unit

Console designed for discreet integration on walls, and for high performance, specifically in heat mode even when the outside temperature is as low as -15°C.

Double airflow for improved comfort and temperature dispersion: through the top for an efficient cooling mode, through the bottom and top in heating mode for improved air distribution and performance.

#### Technical Focus

- This unit can be installed on R22 pipe work
- More efficient than ever for improved energy consumption and higher savings
- Heating mode down to -15°C with high efficiency
- Double airflow for better efficiency
- Powerful mode for quick temperature setting

Line up	Refrigerant	Etherea	Compact Style	Duct	Cassette	Floor Console
Multi E	R410A	Yes	Yes	Yes	Yes	Yes
Multi Z	R32	Yes	Yes	Yes	Yes	

## Up to 5 indoor units with a single outdoor unit

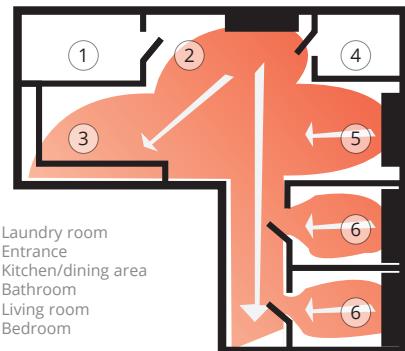

- Just one compact outdoor unit
- Increased comfort in the house since every room has its own indoor unit for heating
- Much more powerful than a single split
- More efficient since the units are always operating at full capacity
- You can connect all types of indoor units, such as wall types and consoles, depending on what suits your house best

**Solution with single split**

One indoor unit is connected to one outdoor unit. The indoor unit is placed in the main hallway and heats the entire house. Certain rooms may not be perfectly heated, which causes inadequate comfort.

**Solution with Multi Split**

With one outdoor unit, you can connect up to five indoor units. There is one indoor unit per room or area. It gives an increase in comfort levels. On the roof, there is only one outdoor unit.

1. Laundry room
2. Entrance
3. Kitchen/dining area
4. Bathroom
5. Living room
6. Bedroom

1) EER and COP classification is at 230V in accordance with EU directive 2002/31/EC. 2) The annual energy consumption is calculated in accordance with the ErP directive. 3) The Sound pressure of the units shows the value measured of a position 1m in front of the main body and 0,8m below the unit. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 4) Add 70 or 95mm for piping port.  
Minimum quantity of connection: 2 indoor units.

This wall mounted air conditioner is especially designed for professional applications such as computer rooms where cooling inside the room is necessary even when the outside temperature is low. Furthermore this air conditioner has an automatic changeover system, in order to maintain the inside temperature even when sharp outside temperature changes occur.

The PKEA Systems provide capacity even at -20°C.

### Technical Focus

- Can be controlled by KNX, Modbus and Bacnet interfaces
- Can connect to P-Link ECOi control via the CZ-CAPRA1 Interface
- This unit can be installed on R22 pipe work
- Designed for 24hr/7day a week operation
- Highly efficient even at -20°C
- High durability rolling bearings
- Additional piping sensors to prevent freezing

### Outdoor Features

- Cooling even when ambient temperature is as low as -20°C
- Electronic expansion valve (accurate sub-cooling and adjustable refrigerant flow)
- Outdoor DC fan motor to provide flexible air-flow to ensure optimum condensation pressure (works on outdoor pipe temperature sensor)

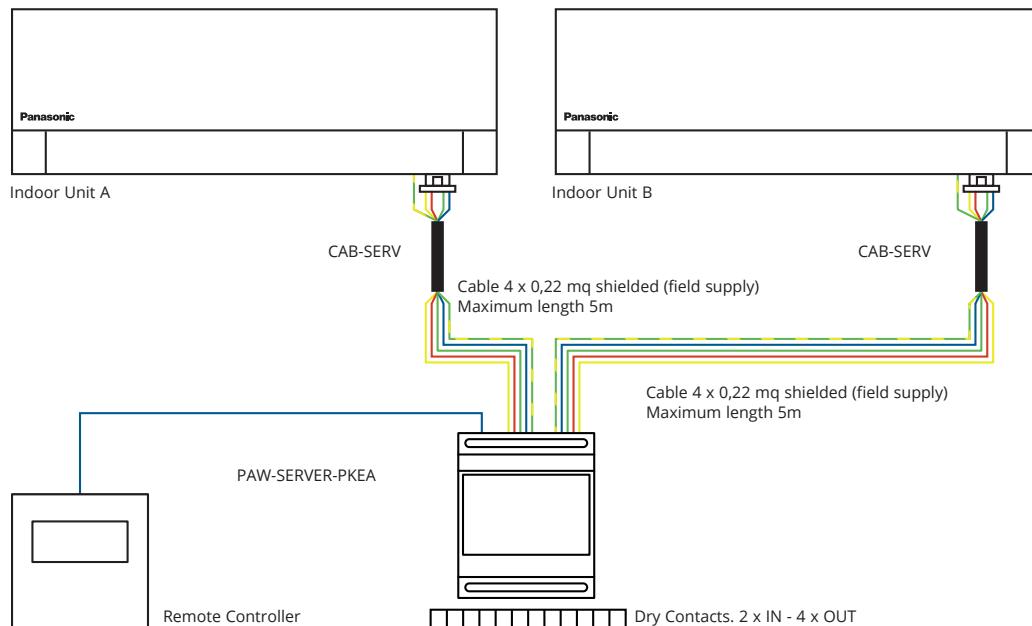

Included on the kit.  
Timer remote controller

**Interface Option to Manage Server Room Operation**

The PAW-SERVER-PKEA server room interface manages redundancy and backup of two PKEA units with two different selectable modes:

- Plug and play by embedded redundancy and backup algorithm (no external signal needed). Further details please refer to operation manual)
- External (third party PLC) redundancy and backup management by dry contact

**Main Features**

- Cascade management
- Back Up system
- Overheating prevention
- ECO function
- BMS management available

**Only available**

- CS.ZXXTKEA
- CS.EXXQKE / PKE / NKE

All settings are possible without the need for a computer connection.

A special Energy Saving Mode is selectable by dip switch (available only in plug and play mode). The level of remote control input prohibition can be set when external management is by dry contact.

CS-Z25-71TKEA

CU-Z25-71TKEA

**PACi: Commercial air to air. The full solution for shops, restaurants, offices or residential applications with outstanding efficiency and compact in size.**

**Product quality and safety.** All Panasonic air conditioners undergo strict quality and safety tests before sale. This rigorous process includes obtaining all necessary safety approvals, to ensure that all air conditioners we sell are not only built to the highest market standards, but are also completely safe.

### **PACi For Economy and Value**

With high quality design and engineering, the PACi Standard is the perfect solution for projects which demand quality on a limited budget. In addition, its compact size and light weight make it ideal for installations with limited space including small commercial and residential applications.

The outdoor unit is much more compact than the previous model. The slim and lightweight design means the PACi outdoor unit can be installed in a number of situations.

#### **PACi Standard. From 6,0 to 14,0kW**

- Good balance, system cost vs energy efficiency
- Top class SEER/SCOP as a Standard Inverter category  
SEER: A++ / SCOP: A+ at 10,0kW (in 90x90 Cassette)
- Interchangeable controller with ECOi
- Compact outdoor units
- Twin connection possible
- Cooling operation up to -10°C
- Heating operation up to -15°C

#### **PACi Elite Increased Energy Efficiency and Pipe Runs**

Outstanding performance at low temperatures, high energy efficiency, power consumption in remote control display. Energy-saving concept. The use of energy saving design for the structure of fans, fan motors, compressors and heat exchangers resulted in high COP value which ranked as one the top class in the industry. In addition, use of highly efficient R410A refrigerant reduces CO<sub>2</sub> emission and lowers operating costs.

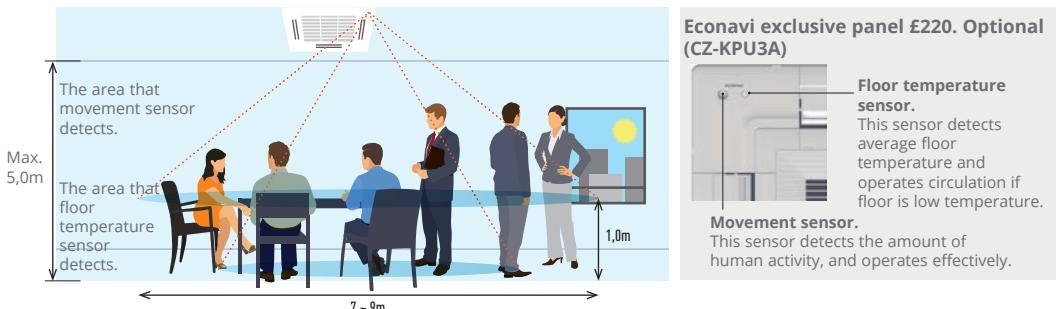

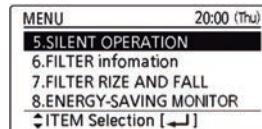

#### **PACi Elite. From 3,6 to 25,0kW**

- Meeting all necessary safety approvals to ensure quality and safety
- Top-class SEER: A++ / SCOP: A++ at 10,0kW (in 90x90 Cassette)
- Cooling operation is possible when outdoor temperature as high as 46°C
- DC inverter technology combined with R410A for excellent efficiency
- Cooling operation is possible when outdoor temperature as low as -15°C
- Heating operation is possible when outdoor temperature as low as -20°C
- Compact outdoor units
- Auto restart from outdoor unit
- Twin, Triple and Quad connection possible

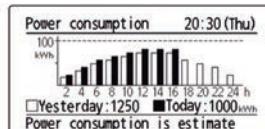

**Econavi Intelligent Sensor**

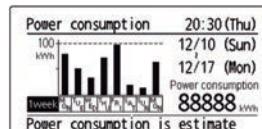

Human activity sensor and floor temperature sensor can reduce energy usage by optimising air conditioner operation. Available as an option on most PACi systems

**Energy Consumption Monitoring via CZ-RTC5B**

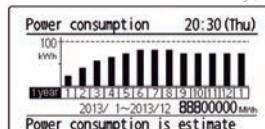

Menu selection: 3 types (Day/Week/Year) of display are available.

Daily Energy consumption: Data is shown with Yesterday's record.(Graph starts from 0 o'clock to 24 o'clock only.)

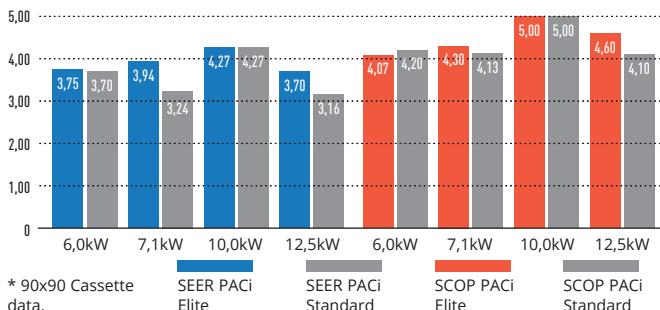

Weekly Energy consumption: Power consumption of each day of the week can be checked.

Annual Energy consumption: Power consumption of each month can be checked.

**Improved EER & COP Performance**

EER/COP (W/W)

**Highlighted Features** (vary by model)

Intelligent Human Activity Sensor and new Sunlight Sensor technologies that can detect and reduce waste by optimising air conditioner operation according to room conditions. With just one touch of a button, you can save energy.

Exceptional Seasonal Cooling Efficiency based on the new ErP regulation. Higher SEER ratings mean greater efficiency. Save all the year while cooling!

Exceptional Seasonal Heating Efficiency based on the new ErP regulation. Higher SCOP ratings mean greater efficiency. Save all the year while heating!

Inverter plus products improve on the characteristics of standard Inverter range by over 20%. This means 20% less consumption and 20% off your electric bill. A Inverter plus is also A class on cooling and heating mode.

Wider operation Hz range of compressor realize more high efficient operation through the year. For Big PACi Series PE2.

Panasonic has extended the life of its condensers with an original anti-rust coating. For Big PACi Series PE2.

Big size Fan makes larger airflow rate and very silent operation at low speed. For Big PACi Series PE2.

DC Fan: Save and precise.

The Panasonic renewal system allows good quality existing R22 pipe work to be re-used whilst installing new high efficiency R410A systems.

The air conditioner works in cooling only mode with an outdoor temperature of -15°C.

The air conditioner works in heat pump mode even when outdoor temperatures are as low as -20°C or -15°C.

The new AC Smart Cloud from Panasonic allows you to have complete control of all your installations. In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimizing costs.

Internet Control is a next generation system providing a user-friendly remote control of air conditioning or heat pump units from everywhere, using a simple Android or iOS smartphone, tablet or PC via internet.

The communication port is integrated into the indoor unit and provides easy connection to, and control of, your Panasonic heat pump to your home or building management system.

## Panasonic PACi Elite offers a high quality and efficient solution for low temperature applications

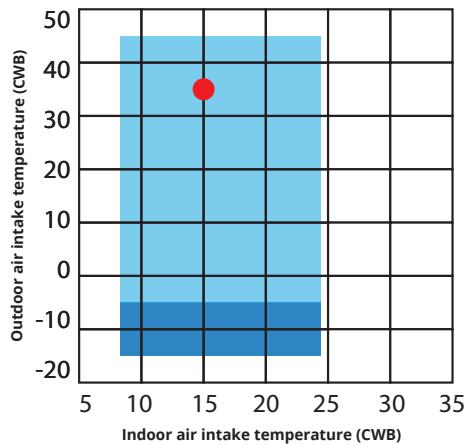

The Panasonic PACi Elite range of semi-industrial systems has been developed to lead the way in quality air conditioning for commercial environments. The Elite line is prevalent in low temperature applications, including wine cellars, server rooms and food storage areas, thanks to its ErP-approved units, which boasts a SCOP A++ rating and exceptional cooling capabilities.

The Panasonic PACi Elite range boasts a wide range of features that make it the perfect solution to the needs of challenging commercial and seasonal demands. Not only can the units provide continuous cooling, even when outside temperatures are as high as 46°C, they also provide heating when external conditions are as low as -20°C, and cooling when conditions are down to -15°C outside.

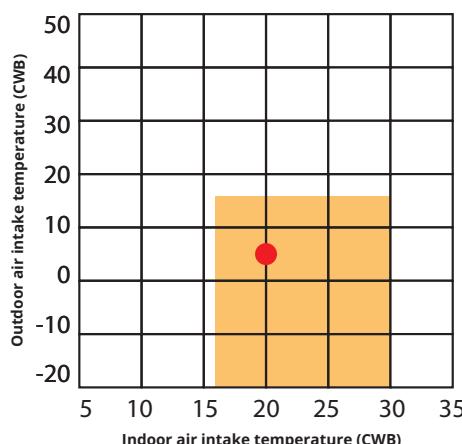

Boasting exceptional energy performance, the system ranks among the best in its class (SEER A++ / SCOP A+) and its inverter technology reduces power consumption and operating costs by 20%. This, combined with the use of R410A gas to reduce the unit CO<sub>2</sub> emissions, ensures Panasonic PACi solutions offer market-leading efficiency.

The latest models in the series are not only built to the highest industry standards to ensure optimum efficiency, they are also lightweight, with a slim and compact design, making these units easy to install.

#### **Washable front panel.**

The indoor unit's front panel can be easily removed and washed for trouble-free cleaning.

#### **Closed discharge port.**

When the unit is turned OFF, the flap closes completely to prevent dust getting into the unit and to keep the equipment clean.

#### **Quiet operation.**

These units are among the quietest in the industry.

#### **Technical Focus**

- 10.0kW capacity unit
- Flat face design for modern appearance
- Compact design offers over 15% reduction in overall size
- Washable front panel
- DC FAN for better efficiency and control
- Three directional piping outlet
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

The extension of the range to include a 10kW unit allows for many more applications such as studios, gyms, high ceiling areas and even computer server rooms.

The unit's compact design and flat face ensure discreet installation, even in a small space.

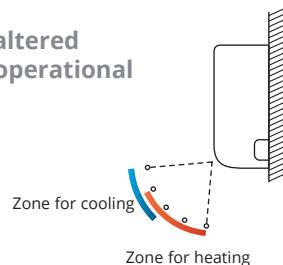

#### **Smooth and durable design.**

The sleek, compact design ensures a discreet installation - even where space is limited.

#### **Piping outlet in three directions.**

With three options for pipe outlets-rear, right and left - installation is made easy.

**Air distribution is altered  
depending on the operational  
mode of the unit.**

### A drain height of approximately 850mm from the ceiling surface

The drain height can be increased by approx. 350mm over the conventional value by using a high-lift drain pump, and long horizontal piping is possible.

### Lighter and slimmer, easier installation

Lightweight and very slim which makes installation possible even in narrow ceilings. Designed to fit exactly into a 600 x 600mm ceiling grid without the need to alter the bar configuration.

### Significant reduction of power consumption by using highly developed DC fan motors with variable speed, special heat exchangers,

### Technical Focus

- Fresh air knock out, 80mm diameter
- Multidirectional air flow
- Integrated drain pump gives 850mm lift from ceiling tile
- 3 speed centrifugal fan
- DC FAN for better efficiency and control
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

PACi  
ELITE

**Large capacity PACi. Trusted power and high efficiency.**

Thanks to advances in design and technology such as the new high performance turbo fan, the nanoe™ air cleaner and the Econavi floor temperature & humidity sensor. The new U2 Panasonic 900x900 4 way cassette provides industry leading performance and comfort.

### Technical Focus

- Drain lift up pump, 850mm from underside of ceiling
- Fresh air intake, 100mm diameter
- Suitable for Replacement Technology
- New high performance turbo fan
- Lower noise in low fan operation
- Light weight, easy piping
- Econavi: Floor temperature and humidity sensor added.
- Nanoe™: more purification power (optional).

\* Outdoor Lower / Higher

\*\* For wiring options refer to page 175

The depth of only 250mm provides greater installation flexibility and the unit can be used in more applications. Ideal for sites with narrow ceiling voids.

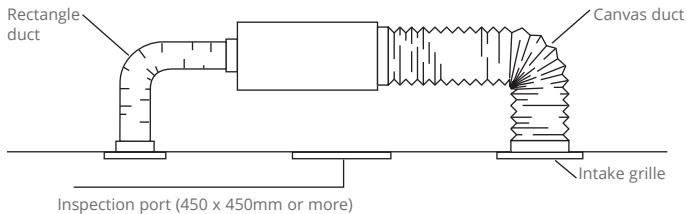

### System Example

An inspection port (450mm x 450mm or more) is required at the control-box side of the indoor unit body.

### Cold Draught Reduction in Heating

Accurate DX Coil temperature measurement by E1 and E2 sensor to reduce cold drafts at heating and increasing efficiency and comfort.

Before spec-in, please consult with us

### Technical Focus

- Compact indoor units without loosing static pressure (Only 250mm high)
- 50 Pa static pressure
- Easy maintenance and service via external electrical box
- 3 speed centrifugal fan through wired or wireless remote control
- DC FAN for better efficiency and control
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

The ducted systems are the ideal solution for flexible, concealed air conditioning and the optional 200mm spigots ensure simple, hassle-free connection to spiral ductwork.

### Powerful Drain Pump

Using a high-lift drain pump, drain piping can be elevated up to 785mm from the base of the unit.

Standardised height of 290mm for all models. Height standardisation enables easy and uniform installation for models with different capacities.

### Up to 150Pa Static Pressure

Type	36	45	50	60	71	100	125	140
Standard	Pa	70	70	70	70	100	100	100
Maximum available	Pa	150	150	150	150	150	150	150

### Technical Focus

- Extremely quiet operation from 26dB(A)
- Auto restart after power failure
- Auto changeover
- Twin, triple and double-twin split options
- DC FAN for better efficiency and control
- Built in drain pump
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

Included Controller, Wired remote controller CZ-RTCSB Compatible with Econavi

Optional Econavi Sensor, CZ-CENSC1

The 8-10HP from Panasonic is ideally suited for large retail applications and other large areas not needing the higher capacities of VRF systems. The lightweight and compact design enables easier installation in any commercial space. The twin fan system saves valuable footprint compared to traditional 8-10HP systems which are larger and therefore require more space.

### Technical Focus

- Higher efficiency
- New heat exchanger - The new heat exchanger has been designed with 8% bigger surface than conventional model. This enlarged surface provides high performance of heat exchange effect. Also, highly efficient piping pattern increases heat exchange performance by 5%.
- New and bigger fan - 27% higher air flow rate than PE1
- New Panasonic Compressor - Best inverter control providing better partial load in industry\* 10%-100% Frequency Hz. Wider operation Hz range of compressor realize more high efficient operation through the year.
- New chassis
- Better partial load
- More flexible
- Bluefin anti-rust coating
- 0-10V control demand

INTERNET CONTROL: Optional. Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

\* For wiring options refer to page 175

This range of ceiling mounted units feature a DC fan motor for increased efficiency and reduced operating sound levels.

All the units are the same height and depth for a uniform appearance in mixed installations. A knock out is provided to allow for supplementary fresh air for improved air quality.

### Further Comfort Improvement

The wide air discharge opening expands the air flow to the left and the right. The unpleasant feeling caused when the air flow directly hits the human body is prevented by the "Draft prevention position", which changes the swing width, so that the degree of comfort is increased.

### Air Distribution is Altered Depending on the Mode of the Unit

### Technical Focus

- Fresh air connection possible (outside intake duct connection port of 100mm diameter is available on the unit)
- All units just 235mm high
- Twin rotary compressor dramatically reduces vibration and noise
- DC inverter control
- Large and wide air distribution
- Industry-leading low sound levels
- Twin, Triple and Quad split options
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be controlled by the remote control of the Panasonic indoor unit

CZ-FDU2	Air intake plenum	£290
CZ-CFU2	Airflow blanking panel	£40

As standard on the Big PACi, Std & Elite PACi they have a separate power supply to indoor and outdoor.

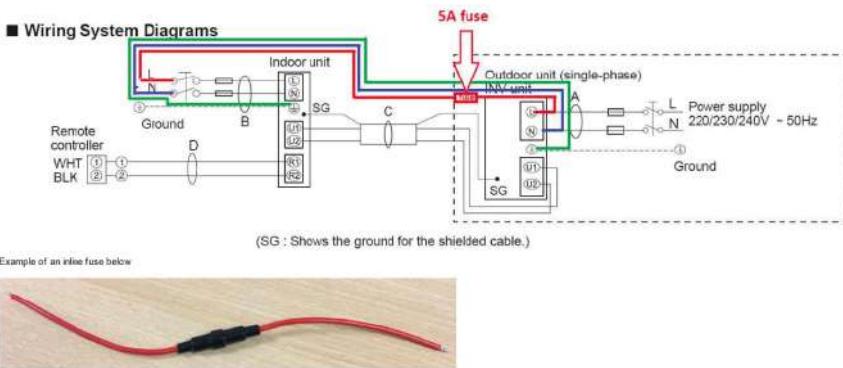

However please note the following.

- It is perfectly acceptable to run the power from the outdoor to indoor.
- If you have a larger distance between indoor and outdoor, it is far more cost effective to run the 2-core communication cables and have a separate supply.
- All indoor units (apart from the ME or PE high static ducted), only require a 6A fused spur. Therefore if you're just running a split, it is possible to take the feed from a local lighting circuit or similar. Be careful on twins, triples etc. and as always they need to be installed to local electrical regulations.
- Comms should always be screened both ends when connecting between indoor and outdoor units.
- We would never recommend running comms in the same cable as the power (EMI from power) it should be shielded (0.75mm<sup>2</sup> min.).

### Optional wiring with in-line fuse

- Power supply can be taken from the outdoor unit. However, the feed to the indoor unit must comply with local electrical regulations (in-line fuse 5amp).
- A 3-core cable (live, neutral and earth) is required for the power and a separate 2 core screened cable for the communication (U1 U2).

## VRF Outdoor Units

## Panasonic provides an extensive range of solutions for mid and large buildings. Combining the best option to satisfy all needs and site restrictions.

The unique manufacturer that can combine both Electrical VRF and Gas powered VRF in the same project, delivering the best choice that makes the difference to our customers.

Providing a large choice in indoor units, and the ability to connect to water heat exchangers, air handling units and ventilation units with or without heat exchangers. All managed from simple and powerful stand alone remote control, new centralised controls or cloud connection with 3G embedded.

The cutting edge control technology is called VRF Smart Connectivity, combining the expertise of VRF communication and BEMS leading company to maximise comfort, and efficiency while reducing installation and integration costs.

### **ECOi Series Benefits**

#### **Ease Of Installation**

R410A has a higher operating pressure with a lower pressure loss than previous refrigerants. This enables smaller pipe sizes to be used and allows reduced refrigerant charges.

#### **Simple To Design**

Panasonic recognise that designing, selecting and preparing a professional VRF quotation can be a time consuming and costly process, especially as it is often also a speculative exercise. So we have designed proprietary software which is quick and easy to use and produces a full schematic layout of pipework and controls, as well as a full materials list and performance data.

#### **Easy To Control**

A wide variety of control options are available to ensure that the ECOi system provides the user with the degree of control that they desire, from simple room controllers through to state of the art BMS controls.

#### **Simple To Commission**

Simple set-up procedure including automatic addressing of connected indoor units. Configuration settings can be made from an outdoor unit or via a remote controller.

### Easy To Position

The compact design of the ECOi outdoor units means that sizes 8HP to 10HP fit into a standard lift and are easy to handle and position when on site. The small footprint and modular appearance of the units ensure a cohesive appearance to an installation.

### Wide Selection And Connectability

With 11 indoor model styles available, ECOi systems are the ideal choice for multiple small capacity indoor unit installations, with the ability to connect up to 40 indoor units to systems of 24HP or greater for 3-Pipe ECOi MF2 6N Series.

### Easy To Maintain

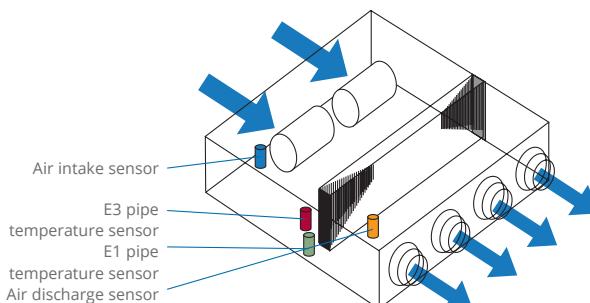

Each system allows the use of prognostic and diagnostic controls routines, from refrigerant charge control through to complex fault code diagnostics, all designed to reduce the speed of maintenance calls and unit down time.

### Lower Running And Life Cycle Costs

Panasonic ECOi systems are amongst the most efficient VRF systems on the market. The system is also designed to make sure that we reduce the running cost of each system by using our unique road map control routine to ensure that the most efficient combination of compressors are running at any one time. Improved defrost sequencing also reduces running costs by defrosting each outdoor coil in turn when conditions allow.

### Air discharge temperature control

Available in all VRF indoor units, this control provides excellent comfort. Discharge air at below 10°C is uncomfortable and can cause draughts. With Panasonic air discharge temperature control, air off temperature can be controlled between 7°C - 22°C.

Panasonic have a extremely high SEER and SCOP values following the SBEM method

Model	SEER	SCOP
U-8ME2E8	7,74	5,61
U-10ME2E8	7,66	5,71
U-12ME2E8	7,32	5,84
U-14ME2E8	6,97	5,72
U-16ME2E8	6,66	5,71
U-18ME2E8	6,56	5,65
U-20ME2E8	5,98	4,88

**Highlighted Features** (vary by model)

The Inverter range provides greater efficiency, more comfort, more precise temperature control, without highs and lows, and keeps the ambient temperature constant with lower energy consumption and a significant reduction in noise and vibration levels.

Multiple large-capacity all inverter compressors (more than 14HP). Two independently controlled inverter compressors achieve high efficiency. Redesigned components in the body provide performance improvement especially in the rated cooling condition and EER performance.

Intelligent Human Activity Sensor and new Sunlight Sensor technologies that can detect and reduce waste by optimising air conditioner operation according to room conditions. With just one touch of a button, you can save energy.

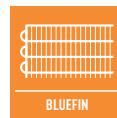

GHP technology offers the best in energy efficiency. ECO G gas VRF is specially designed for buildings where the electricity is restricted or CO<sub>2</sub> emissions must be reduced.

The ECOi EX system works in heating mode with performance data at outdoor temperature down to -25°C.

The ECOi EX system works in cooling mode with performance data at outdoor temperature up to 52°C.

Panasonic has extended the life of its condensers with an original anti-rust coating.

Built-in drain pump. Maximum head 50cm (or 75cm for U type) from the bottom of the unit.

Comfortable auto-flap control. When the unit is first turned on, flap position is automatically adjusted in accordance with the cooling or heating operation.

Automatic restart function for power failure. Even when power failure occurs, preset programmed operation can be reactivated once power is resumed.

Air Sweep. The air sweep function moves the flap up and down in the air outlet, directing air in a "sweeping" motion around the room and providing comfort in every corner.

Self-diagnosing function. By using electronic control valves past warnings are stored. This makes it easier to diagnose malfunctions, reducing service labour and therefore costs.

Automatic fan operation. Convenient microprocessor control automatically adjusts fan speed to High, Medium or Low, corresponding to room sensor and maintains comfortable airflow throughout the room.

By intermittent control of compressor and indoor unit's fan, "Mild Dry" gives you comfort. It realizes efficient dehumidification according to room temperature.

The Panasonic renewal system allows good quality existing R22 pipe work to be re-used whilst installing new high efficiency R410A systems.

The new AC Smart Cloud from Panasonic allows you to have complete control of all your installations. In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimizing costs.

The communication port is integrated into the indoor unit and provides easy connection to, and control of, your Panasonic heat pump to your home or building management system.

Internet Control is a next generation system providing a user-friendly remote control of air conditioning or heat pump units from everywhere, using a simple Android or iOS smartphone, tablet or PC via internet.

## VRF Systems ECOi EX

A VRF System delivering energy-saving performance, powerful operation, reliability and comfort surpassing anything previously possible. It represents a true paradigm shift in air conditioning solutions.

## Mini ECOi LE Series

The Mini ECOi combines smartly compact body with high specifications. It delivers high levels of energy-saving, powerful operation, reliability and comfort.

## 2-Pipe ECO G GE3 Series

"L" type heat exchanger and new Inverter DC fan motor with a 3-blade propeller. Designed for better energy efficiency. SEER has been increased by maximum 120%.

## VRF Smart Connectivity

Panasonic's VRF Smart Connectivity is a completely new, state-of-the-art solution providing energy saving and comfort as well as simple installation, operation and running.

## Panasonic AC Smart Cloud

Centralised control of your business premises, from wherever 24/7. Smartly control, maintain, optimise and save.

Panasonic's Mini VRF outdoor unit provides high performance to position itself as one of the most powerful VRF systems available within the market

### For Light Commercial Use

Panasonic's Mini ECOi, the 2-Pipe heat pump small VRF system, is specifically designed for the most demanding applications.

Offering between 12.1kW and 15.5kW cooling capacity in 3 sizes and up to 9 indoor units connected, the Mini ECOi sets standards of performance and flexibility. Utilising R410A and DC inverter technology, Panasonic offers VRF to a new and growing market.

Forming a new key part of the Panasonic VRF line up, the Mini ECOi is compatible with the same indoor units and controls as the rest of the ECOi range.

### Technical Focus

- Single Phase or Three Phase power supply
- 1Ph, single fan outdoor units only 996mm high with industry leading COP's & EER's
- 35Pa external static pressure
- DC inverter technology combined with R410A
- Cooling operation to -10°C

Prepare to be blown away by Panasonic's New Mini VRF system. The New Mini VRF compact system is the ideal solution for minimum outdoor space. Panasonic extends the Mini VRF range by 8 and 10HP units.

### Increased External Static Pressure

When unit is installed at the narrow balcony, the fence at front side will be the obstacle. High external static pressure feature will keep the operating capacity and good advantage.

### High Ambient Temperature Performance

Cooling operation range up to 46°C. The system can maintain the rated (100%) capacity up to 40°C by 8HP model & up to 37°C by 10HP model.

### Technical Focus

- Piping flexibility 150m maximum piping length
- High efficiency
- 15 indoor units connectable
- Quiet operation mode (one of the lowest in the market)
- High ambient temp performance
- High static pressure 35Pa

## 2 Pipe ECOi Ex - The Game Changer

A game-changing VRF system delivering energy-saving performance, powerful operation, reliability and comfort surpassing anything previously possible.

# 1

### High Performance At Extreme Conditions

ECOi EX is highly reliable, with strong cooling & heating power, even when operating at extreme ambient temperatures. The units can operate at 100% of capacity at 43°C, reaching a great cooling operation up to 52°C and in heating -25°C.

Also, the ECOi EX features include Bluefin in newly designed heat exchanger improving efficiency as well in marine ambient. A silicone coated PCB (Printed Circuit Board) protects the unit from being damaged by environmental factors such as moisture and dust.

# 2

### Top Efficiency And Comfort

The new ECOi EX system is designed to dramatically increase energy efficiency by delivering the highest ESEER rating, as well as high efficiency for part-load operations. The system has reduced energy costs thanks to "All-Inverter Compressors", with independent control to deliver highly flexible performance. Also, the ECOi EX features an enlarged heat exchanger with triple surfaces that allow for improved heat transfer and a newly designed curved air discharge bell-mouth for better aerodynamics. The three-stage oil recovery design makes it able to minimise the frequency of forced oil recovery, leading to reduced energy costs and sustained comfort.

# 3

### Superior Flexibility

With its up to 1000 meters of pipeline, its maximum 30 meters height difference between indoor units and its 200 meters length, the design possibilities have grown exponentially making the new ECOi EX the ideal air conditioning option for long haul buildings, such as train stations, airports, schools or hospitals. These advantages are enhanced with the wide range of indoor unit models and capacities facilitating the perfect adaptation to all kind of projects. The careful selection of controls and peripherals such as the pump down, the AHU or/and the chiller, enables an optimum system use. connectable maximum allowable indoor / outdoor capacity ratio up to 200%.

## Twin Rotary Inverter Compressor

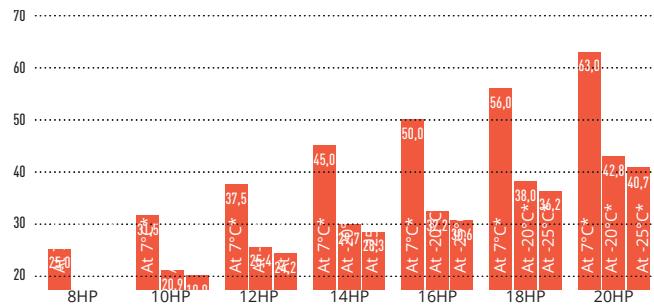

Two independently controlled inverter compressors achieve high efficiency. Redesigned components in the body provide performance improvement especially in the rated cooling condition and EER performance.

- Wider and flexible control on Inverter compressor
- Better oil lubrication
- Smooth start up

## Extremely High Capacity at -20°C and Unique Heating at -25°C

Heating capacity (kW)

\* Outdoor air temperature (°C WB).

## Partial Load For Seasonal And Real System Efficiency

VRF units are designed to adapt to the heating and cooling demand, adapting its performance to different outdoor conditions. When compressor runs at lower than 100% capacity, the system is working at partial load. A wider compressor operating range results in better system performance both at full load and partial load conditions. Panasonic ECOi EX partial load is excellent, reaching a minimum of 15% of compressor capacity.

Multiple large-capacity all inverter compressors (more than 14HP).

Newly designed curved air discharge bell mouth for better aerodynamics.

## New 3-pipe ECOi EX MF3 series

### Simultaneous heating and cooling VRF System

The new Panasonic 3-Pipe ECOi EX MF3 series offers the ideal solution to meet customer's demand.

### Upgraded energy efficiency utilising ECOi EX technology.

- SEER / SCOP improved full capacities from 8 to 16HP
- SEER / SCOP complies with LOT21 which was implemented in January 2018
- EER / COP is certified in Eurovent

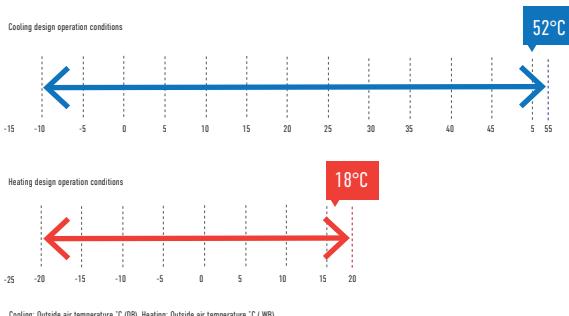

### Design flexibility

- High reliability even under tough temperature condition
- Maximum 52 indoor units connectable
- Slim heat recovery box with just 200 height
- Farthest piping length between indoor units and outdoor units: 200m

### Extended design operation conditions

Cooling design operation conditions: The cooling operation range has been extended to -10°C ~ 52°C by changing the outdoor fan to an Inverter type.

Heating design operation conditions: Stable heating operation even with an outside air temperature of -20°C. The heating operation range has been extended to -20°C by use of a compressor with a high-pressure vessel.

Cooling: Outside air temperature °C (DB), Heating: Outside air temperature °C (WB).

### Increased maximum number of connectable indoor units

- Maximum 48HP with 52 indoor units can be set up according to user needs.
- Connectable indoor/outdoor unit capacity ratio up to 150%.

### Power suppression control for energy saving (Demand control)<sup>1</sup>

The 3-Pipe ECOi EX MF3 Series has a built-in demand function which uses the inverter characteristics. With this demand function, the power consumption can be set in three steps, and operation<sup>2</sup> at optimum performance is performed according to the setting and the power consumption. This function is useful to reduce the annual power consumption and to save electricity costs while maintaining comfort.

<sup>1</sup> An outdoor Seri-Para I/O unit is required for demand input.

<sup>2</sup> Setting is possible as 0% or in the range from 40 to 100% (in steps of 5%). At the time of shipping, setting has been done to the three steps of 0%, 70%, and 100%.

## What is GHP, The Gas Heat Pump?

Panasonic Gas Heat Pump is a direct expansion system with compressor the same as VRF system. Gas engine is used as driving source of compressor instead of electric motor. This gas engine compressor drive has 2 advantages:

1. Waste heat from the gas engine available
2. No need for motor power consumption thanks to gas engine

GHP is the natural choice for commercial projects, especially for those projects where power restrictions apply.

### 1

#### Limited electric supply

Electric consumption of ECO G is only 9% compared to ECOi because gas engine is utilized for the compressor driving source.

### 2

#### High demand of DHW with heating and cooling cogeneration

DHW is produced effectively thanks to heat from engine exhaust during heating and cooling.

### 3

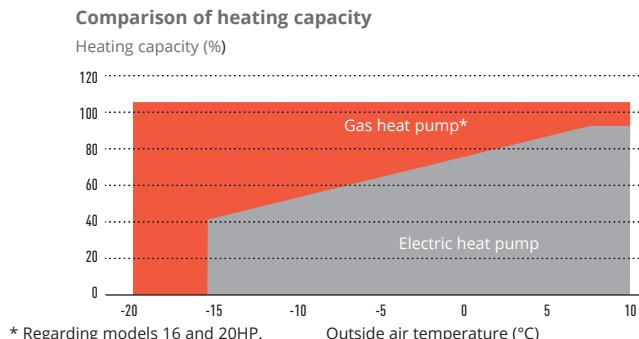

#### Open and flexible design

ECO G system is designed to connect various Indoor units and controllers which is available for ECOi system. With new GE3 series, Pump down system has been also implemented to answer commercial needs.

### 4

#### Heating at low ambient temperature up to -20°C

Stable heating capacity has been realized with waste heat recovery from the engine even if outside temperature is quite low.

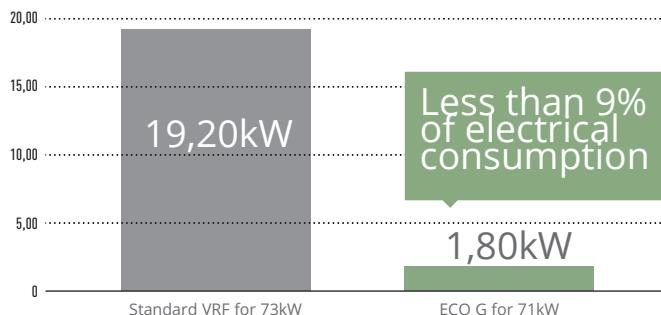

### Power Supply Problems?

If you are short of electric power, our ECO G is a perfect solution.

- Runs on natural gas or LPG and just needs single phase supply
- Enables the building's electrical power supply to be used for other critical electrical demands
- Reduces capital cost to upgrade power substations to run heating and cooling systems
- Reduces power loadings within a building especially during peak periods
- Electricity supply freed up for other uses such as IT servers, commercial refrigeration, manufacturing, lighting, etc...

Comparison of electrical consumption on a 71kW outdoor unit.

Application	Condition	ECO G
Hotel	High DHW demand	✓ Energy recovery of ECO G system can fulfill different requirement
Hotel	Needs to warm up swimming pool	✓ Speed of start up is quicker than VRF system
Office	Quick start up is necessary	✓
Winery	1) Outlet water demand at specific temperature 2) Needs high amount of power temporary (not every month)	✓ 1) Chiller application with hydro module (ECO G + WHE) can make this special process 2) Reduced Running Costs as fixed Gas tariff per month is cheaper than fixed electric tariff.
Any building	In a city with power restriction	✓ - No need an additional power transformer - Space and cost can be saved
	At extremely low ambient condition	✓ Heating capacity is kept up to -20°C without defrost process

Take advantage of Gas and Electricity to achieve better energy saving

U-20GES3E5 (20HP)

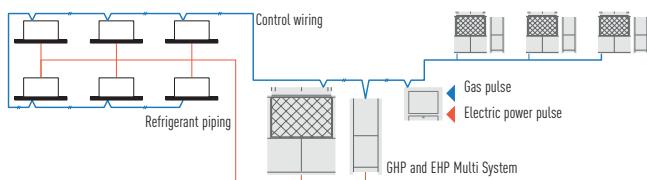

U-10MES2E8 (10HP)

Intelligent controller  
CZ-256ESMC3**Master unit GHP**

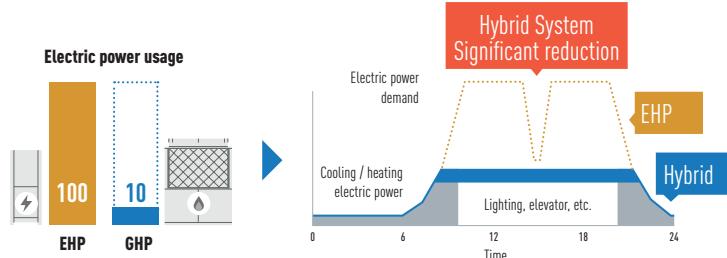

- Load calculation of GHP&EHP
- Operation in accordance with the upper limit setting.
- Individual capacity control
- Device control
- Special control (Defrost, Oil recovery, 4Way-valve matching / Abnormality processing)

**Slave Unit EHP****Intelligent controller**

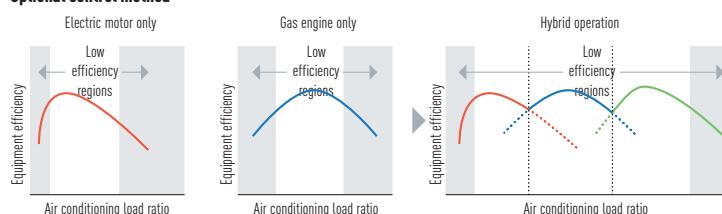

- Demand monitoring
- Indoor/Total load calculation
- Operation Ratio Indication upper limit setting of MAP according to:
  - Energy unit price
  - Electric power demand
  - Air conditioning load

**Schematic of GHP/EHP Hybrid System**
**WORLD FIRST!\***  
**UNIFIED REFRIGERANT CYCLE**  
**IN GHP AND EHP**
\* Introduced as a world first technology by Panasonic in April 2016.
**1****Peak cut of electricity consumption**

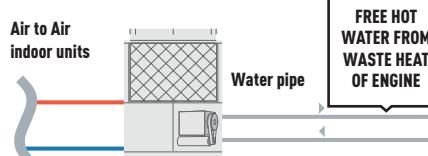

Electrical peak demand is significantly reduced thanks to GHP system consuming less than 10% of electricity of EHP system.

\* Example based on typical Hotel application.
**2****Optimal control to maximise energy saving**

Switching the operation between GHP and EHP system on the basis of usage, energy demand, part load.

\* Specification is tentative.
**Optional control method****3****Free Hot Water production by GHP system**

Hot water is effectively produced from waste heat of engine.

\* Specification is tentative.

## VRF Indoor Units

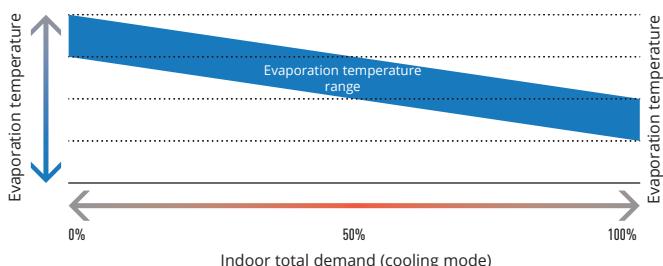

## Air discharge temperature control

Available in all VRF indoor units, this control provides excellent comfort. Discharge air at below 10°C is uncomfortable and can cause draughts. With Panasonic air discharge temperature control, air off temperature can be controlled between 7°C - 22°C.

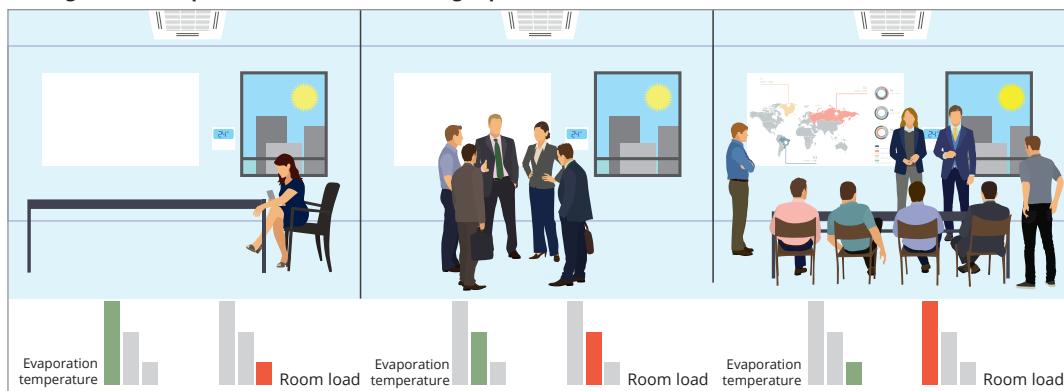

## Variable Evaporation Temperature

As a standard Panasonic includes VET in all ECOi series since 2006. This smart control logic is done every 30 minutes and depends directly on real demand and outdoor conditions giving the best performance and adapting really on time and on real needs. Panasonic also includes variable heating temperature function.

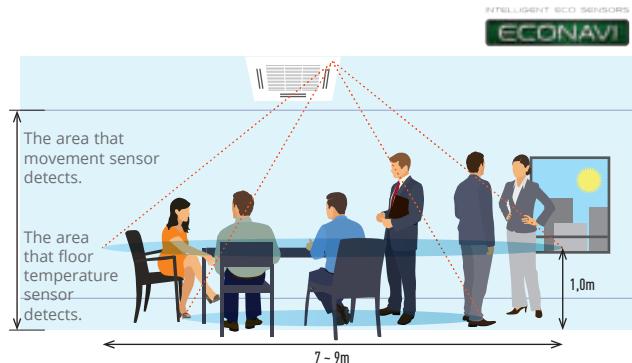

### Cooling mode example (function also for heating is possible)

## Econavi Intelligent Sensor

Human activity sensor and floor temperature sensor can reduce energy by optimising air conditioner operation.

Advanced Econavi functions  
2 sensors (movement and floor temperature) can find waste of energy and control effectively. Floor temperature can detect up to 5m ceiling height.

**Key Features**

- Mini cassette fits into a 600 x 600mm ceiling grid
- Fresh air knock out - 80mm diameter
- Multi directional airflow
- Powerful drain pump gives 850mm lift from underside of ceiling
- Turbo fans and heat exchanger fins with improved design
- DC-fan motors with variable speed, new heat exchangers, etc. ensure an efficient power consumption

controller CZ-RE2C2 -  
£124

ECONAVI and INTERNET CONTROL: Optional.

**Key Features**

- Powerful drain pump gives 850mm lift from underside of ceiling
- Fresh air knockout - 100mm diameter
- Branch duct connection
- Optional Nanoe™ filtration technology
- Optional air intake plenum CZ-FDU2
- New high performance turbo fan, new path system for heat exchanger
- Optional Econavi: floor temperature and humidity sensor added.

**Key Features**

- Ultra-slim profile: 200mm for all models
- DC-Fan motor greatly reduces power consumption
- Ideal for hotel application with very narrow false ceilings
- Easy maintenance and service by external electrical box
- Up to 40Pa static pressure enables ductwork to be fitted.
- Includes drain pump, 500mm from drain port

ECONAVI and INTERNET CONTROL: Optional.

**Key Features**

- Industry-leading low sound levels from 25dB(A)
- Easy to install and maintain
- Air OFF sensor avoids cold air dumping
- Configurable air temperature control
- Built-in drain pump provides 785mm lift from underside of the unit
- Filter included as standard

**Connect the Hydrokit to your VRF system, together with other indoor units.**

### Technical Focus

- Only with 3-Pipe ECOi MF3 6N Series outdoor units
- Remote controller CZ-RTC5B common use with DX Coil indoor units ECOi and PACi

### Basic Principles & Advantages

Hydrokit module provides hot water by using waste heat that is recovered from standard air-conditioning indoor unit in cooling mode.

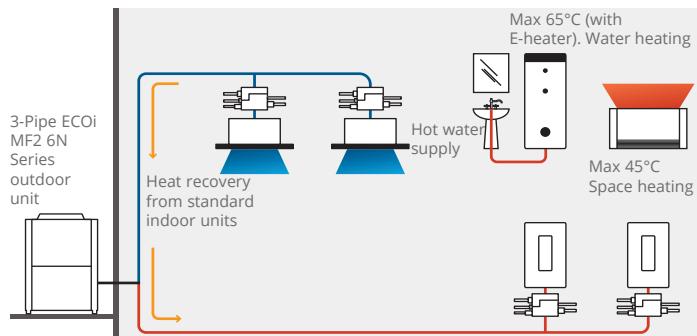

Total system performs high energy efficiency by this heat recovering operation, and it gives an advantage for the environmental-friendly assessment scheme (ex. BREEAM in UK).

### Hydrokit Control Function / CZ-RTC5B

- CZ-RTC5B is updated version from CZ-RTC3. It can be used for hydrokit and also normal indoor unit. CZ-RTC5B checks the type of connected unit and switch hydrokit or air conditioner style of display automatically
- Operating mode on hydrokit style to be set at initial setting of the system from following modes: tank mode or air conditioning mode

### Overview: Hydrokit Module in VRF System

- Multiple hydrokit module connection in same circuit is available
- Each module can be set different operation mode either hot water supply mode or space heating mode (both operation modes are not able to set at 1 hydrokit module)
- 3-Pipe control solenoid valve kit is necessary for each indoor unit and hydrokit module

Hydrokit Module		S-80MW1E5	S-125MW1E5
PERFORMANCE	Capacity Code	TBC	TBC
	Nominal Cooling	kW	8.0
	Nominal Heating	kW	9.0
	Max Temperature	°C	45 (65 with electric heater)
	Connectable system	kW	3-Pipe (heat recovery type) VRF system (system capable up to 48HP)
	Maximum Indoor Ratio (Connectable Hydrokit Module Capacity Ratio)	°C	Total indoor unit + Hydrokit capacity: up to 130 % (** ~ ***% vs. total outdoor unit capacity)
PHYSICAL	Height	mm	892
	Width	mm	502
	Depth	mm	353
	Weight	kg	TBC
OPERATING RANGE	Cooling - Ambient	°C	10°C to 43°C
	Heating - Ambient	°C	20°C to 32°C
	Cooling - Water	°C	5°C to 20°C
	Heating - Water	°C	25°C to 45°C

ECONAVI and INTERNET CONTROL: Optional.

**2 Pipe Branch Kits**

Model	Description	Retail
CZ-P224BK2BM	Branch pipe (up to 22,4 kW)	£70
CZ-P680BK2BM	Branch pipe (from 22,4 kW to 68 kW)	£90
CZ-P1350BK2BM	Branch pipe (from 68,0 kW to 13,5 kW)	£110
CZ-P4HP4C2BM	4 way header for 2 pipe heat pump	£180
CZ-P680PH2BM	Outdoor connection kit for 2 pipe heat pump (up to 68,0 kW)	£140
CZ-P1350PH2BM	Outdoor connection kit for 2 pipe heat pump (from 68,0 kW to 135,0 kW)	£140

**3 Pipe Branch Kits**

Model	Description	Retail
CZ-P224BH2BM	Branch pipe (up to 22,4 kW)	£95
CZ-P680BH2BM	Branch pipe (from 22,4 kW to 68 kW)	£150
CZ-P1350BH2BM	Branch pipe (from 68,0 kW to 13,5 kW)	£150
CZ-P4HP3C2BM	4 way header for 3 pipe heat pump	£220
CZ-P680PJ2BM	Outdoor connection kit for 3 pipe heat pump (up to 68,0 kW)	£190
CZ-P1350PJ2BM	Outdoor connection kit for 3 pipe heat pump (from 68,0 kW to 135,0 kW)	£190

**3 Pipe Heat Recovery Boxes**

Model	Description	Retail
<b>KIT-P56HR3</b>	<b>Box recovery kit (1.5 kW - 5.6 kW)</b>	£432
CZ-P56HR3	Heat recovery box (1.5 kW - 5.6 kW)	£355
CZ-CAPE2	Heat recovery PCB	£77
<b>KIT-P160HR3</b>	<b>Box recovery kit (5,6 kW - 16.0 kW)</b>	£509
CZ-P160HR3	Heat recovery box (5,6 kW - 16.0 kW)	£432
CZ-CAPE2	Heat recovery PCB	£77
CZ-P456HR3	4 ports 3 pipe box (up to 5,6kW)	£2,175
CZ-P656HR3	6 ports 3 pipe box (up to 5,6kW)	£2,985
CZ-P856HR3	8 ports 3 pipe box (up to 5,6kW)	£4,069
CZ-P4160HR3	4 ports 3 pipe box (from 5.6 kW - 10.6 kW per port)	£2,425

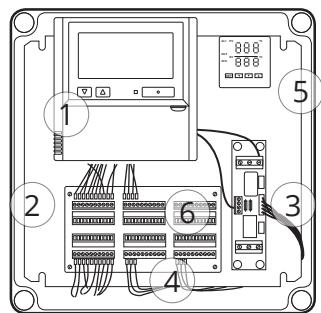

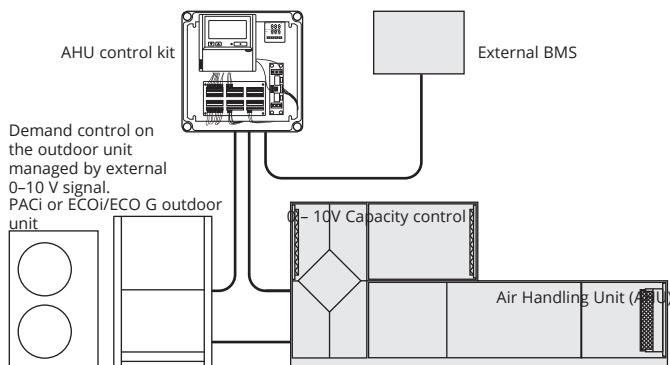

## Air Handling & HRV

### Panasonic AHU Kit Connected to PACi Outdoor Units

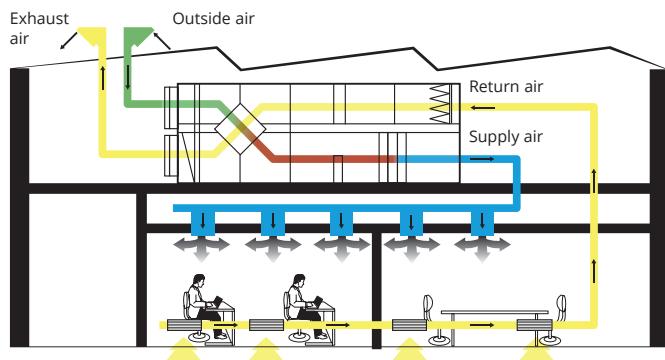

The new Air Handling Unit Kit has been developed to better meet customer demand: IP 65 Box in order to be installed outside, 0-10V demand control\* and easy control by BMS

\* Only available with Elite PACi, up to from 6kW to 14kW.

1. Remote control CZ-RTC5B
2. New plastic IP 65 Box
3. PAW-T10 PCB for dry contact
4. 0-10V demand control PCB
5. Intelligent thermostat for:
  - Cold draft prevention
  - Outdoor temperature shift compensation
6. Terminal base for sensors and power supply

The main components of a mechanical ventilation system are the following: Air Handling Unit (AHU), air ducts and air distribution elements.

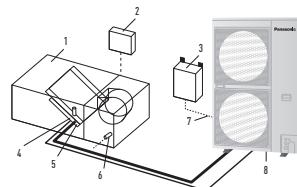

The Panasonic AHU Kits offer a wealth of connectivity possibilities so can be easily integrated into many systems.

**Application:** Hotels, offices, server rooms or all large buildings where air quality control such as humidity control and fresh air and is needed.

### 3 types of AHU Kit: Deluxe, Medium and Light

Model Code	IP 65	0-10V demand control*	Outdoor temperature shift compensation. Cold draft prevention
PAW-280PAH2	Yes	Yes	Yes
PAW-280PAH2M	Yes	Yes	No
PAW-280PAH2L	Yes	No	No

\* With CZ-CAPBC2.

#### System & regulations. System overview

1. AHU Kit equipment (Field supplied)
2. AHU Kit system controller (Field supplied)
3. AHU Kit controller box (with control PCB)
4. Thermistor for Gas pipe (E2)
5. Thermistor for Liquid pipe (E1)
6. Thermistor for Suction air
7. Inter-unit wiring
8. Outdoor unit

### With the 0-10 v demand control the capacity of the outdoor unit can be controlled by 20 steps.

#### With the included resistance. 0-10V control scheme with 10V= maximum capacity

Input Voltage* (V)	0 – 0,55	1,1	1,65	2,2	2,8	3,35	3,9	4,45	5,0	5,55	6,1	6,65	7,2	7,8	8,35	8,9	9,45	10,0
Demand (% of nominal current)	Stop <sup>1</sup>	40	45	50	55	60	65	70	75	80	85	90	95	100	105	110	115	No limit / Full capacity <sup>3</sup>

#### When you remove the resistance. 0-10V control scheme with 10V= Thermo-Off

Input Voltage* (V)	0 – 0,5	1,0	1,5	2,0	2,5	3,0	3,5	4,0	4,5	5,0	5,5	6,0	6,5	7,0	7,5	8,0	8,5	9,0	9,5 – 10,0
Demand (% of nominal current)	Stop <sup>1</sup>	40	45	50	55	60	65	70	75	80	85	90	95	100	105	110	115	No limit <sup>2</sup> Thermo-Off <sup>3</sup>	

\* If a voltage range (0 – 0,5 or 9,5 – 10,0V) is indicated, the applied voltage must be within the given limits.

However, if a single value (e.g. 1,0V) is indicated, the applied voltage must be within +/-0,1V of the given value to achieve the assigned demand setting.

Examples: "Stop" can be achieved with any analogue input value greater than 0V and less than or equal to 0,5 V; 40% demand can be achieved with any analogue input value greater than or equal to 0,9V and less than or equal to 1,1V etc.

1) Stop: AHU system / indoor unit is completely switched off.

2) No Limit: No restrictions applied by BMS to AHU system / indoor unit performance (equivalent to "full-load operation" of AHU system / indoor unit).

3) Thermo-Off: No cooling / heating operation (compressor is switched off; however, the fans may still be operating). For example, forced Thermostat-Off mode can be used for free cooling.

#### Control option 1: PAW-280PAH2L

- The system's control is simple: control of actual suction temperature vs. set point
- Control works in the same way as that of any indoor unit
- Fan signal issued by the PCB (OFF while defrosting, for instance)

#### Control option 2: PAW-280PAH2

- System control by probe located at air intake. Sensor works as a 0-10V control thermostat which manages the set point temperature. Control to prevent cold draughts.
- All signals as per standard

#### Control option 3: PAW-280PAH2

- System control by external environment probe. Sensor works as a 0-10V control thermostat which manages the set point temperature. Enhances efficiency by adjusting capacity to the ambient temperature and enhances comfort as well.
- All signals as per standard

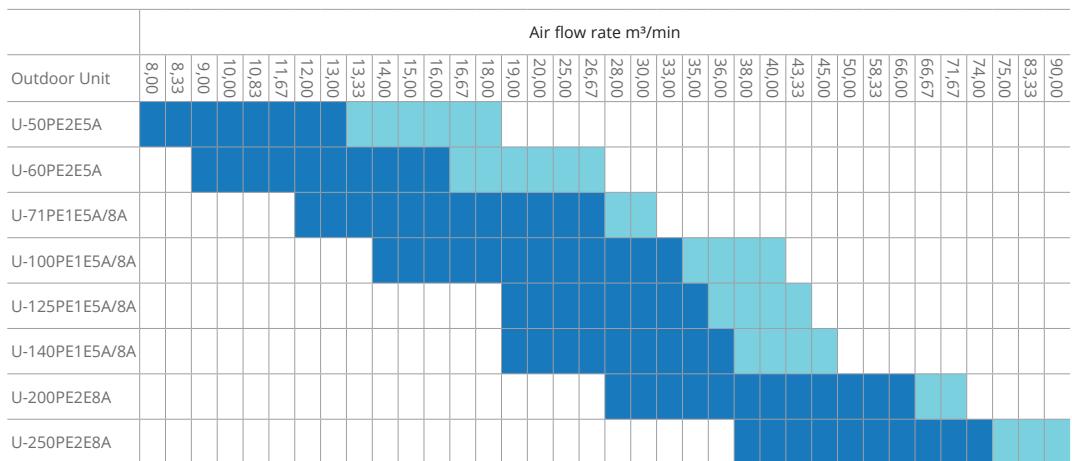

#### Control option 4: PAW-280PAH2

- System control by a 0-10V control working from an external BMS that manages the set point for the temperature or the capacity. Enhances efficiency by adjusting capacity to the ambient temperature and enhances comfort as well.
- All signals as per standard

	Cooling capacity	Heating capacity	Air volume	Dimensions	Piping length	Elevation difference
AHU PACi Elite	Nominal	Nominal	High / Low	H x B x D	Min / Max	Min / Max
	kW	kW	m³/min	mm	m	m
PAW-280PAH2	6 / 25	7 / 28	8,0 / 74,0	404 x 425 x 78	5 / 30*	10
PAW-280PAH2+PAW-280PAH2	50,0	56,0	38,0 / 148,0	404 x 425 x 78	5 / 30*	10

\* For U-200PE2E8A and U-250PE2E8A.

### **Panasonic AHU Kit, 16-56kW connected to ECOi or ECO G VRF Systems**

- Maximum capacity/system: 60HP (168kW)
- Maximum piping length: 100m (120m equivalent)
- Elevation difference (indoor unit / indoor unit): 4m
- In/Out capacity ratio: 50~100%
- Maximum indoor unit number: 3 units\*
- Outdoor temperature range in heating: -20 ~ +15°C
- Available temperature range for the suction air at AHU Kit: cool: +18 ~ +32°C / heat: +16 ~ +30°C

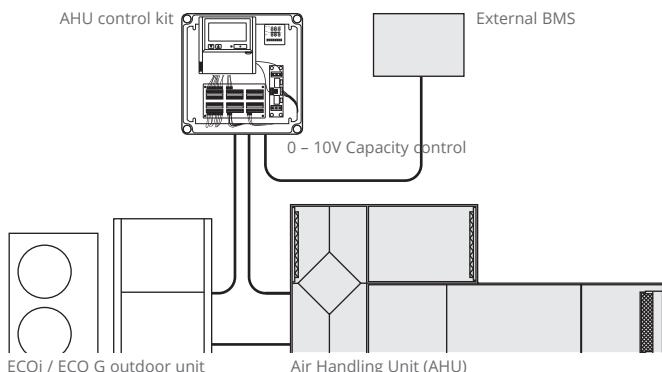

\* To be simultaneous operation controlled by one remote controller sensor.

PCB, Transformer, Solenoid Control Valve, Thermistor x 4 pcs, Terminal Base and Electrical Component Box.

#### **With GHP Outdoor Units**

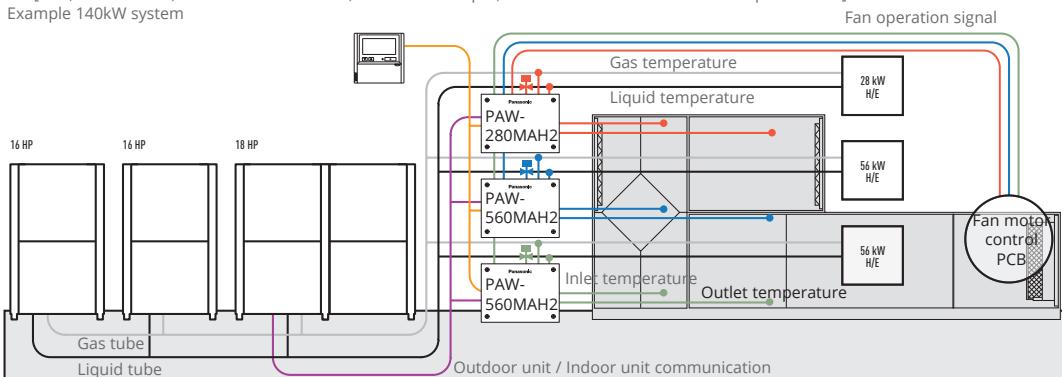

- One AHU kit may be used for one GHP unit (2-Pipe, 56kW). Multiple AHU kits cannot be used
- Mixed with standard indoor units is not allowed
- Power specifications are Single Phase 220V to 240V

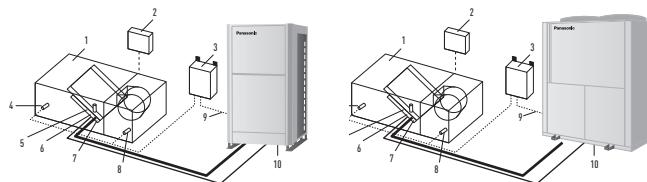

Demand control on the outdoor unit managed by external 0-10 V signal.

#### **System example for large capacity (more than 56kW)**

3 x [PCB, Transformer, Solenoid Control Valve, Thermistor x 4 pcs, Terminal Base and Electrical Component Box].  
Example 140kW system

- The system is controlled by the suction air (or room return air) temperature (same as standard indoor unit). (Selectable mode: Automatic / Cooling / Heating / Fan / Dry (but same as Cool))
- The discharge air temperature is also controlled to prevent too-low air discharge in cooling or too-high air discharge in heating (in case of VRF)
- Demand control (Forcible thermostat-OFF control by operating current)
- Defrost operation signal, Thermo-ON/OFF states output
- Drain pump control (Drain-pump and the float switch to be supplied locally)
- External target temperature setting via Indoor/Outdoor signal interface is available with CZ-CAPBC2 (Ex. 0 – 10V)
- Demand control 40% to 120% (5% steps) by 0-10V input signal
- Connectable with P-Link system. Special care for electrical noise may be necessary depending on the on-side system
- Fan control signal from the PCB can be used for control the air volume (high/mid/low and LL for Th-OFF). Need to change the fan control circuit wiring at field

#### **System & regulations. System overview**

- |   |                                    |
|---|------------------------------------|
| 1. AHU Unit equipment (field supplied)        | 6. Thermistor for gas pipe (E3)    |
| 2. AHU Unit system controller field supplied) | 7. Thermistor for liquid pipe (E1) |
| 3. AHU Kit controller box (with control PCB)  | 8. Thermistor for suction air      |
| 4. Thermistor for discharge air               | 9. Inter-unit wiring               |
| 5. Electronic expansion valve                 | 10. Outdoor unit                   |

#### **Optional parts: Following functions are available by using different control accessories:**

##### **CZ-RTC5B Timer remote controller £104**

- Operation-ON/OFF
- Mode select
- Temperature setting

\* Fan operation signal can be taken from the PCB.

##### **CZ-T10 terminal £40**

- Input signal= Operation ON/OFF
- Remote controller prohibition
- Output signal= Operating-ON status
- Alarm output (by DC12V)

##### **PAW-OCT, DC12 V outlet. OPTION terminal £40**

- Output signal= Cooling/Heating/Fan status
- Defrost
- Thermostat-ON

##### **CZ-CAPBC2 Mini seri-para I/O unit £155**

- Demand control 40% to 120% (5% steps) by 0-10V input signal
- Temperature setting by 0-10V or 0-140 Ω input signal
- Room (inlet air) temp outlet by 4-20mA
- Mode select or/and ON/OFF control
- Fan operation control
- Operation status output/ Alarm output
- Thermostat ON/OFF control

##### **PAW-T10 PCB to connect to T10 connector £84**

- A Dry contact PCB has been developed to easily control the unit
- Input signal operation ON/OFF
- Remote control prohibition
- Output signal Operation ON status maximum 230V 5A (NO/NC)
- Output signal alarm status max. 230 V 5 A (NO/NC)
- Additional available contacts:
  - External humidifier control (ON/OFF) 230 VAC 3A
  - External fan control (ON/OFF) 12V DC
  - External filter status signal potential free
  - External float switch signal potential free
  - External leakage detection sensor or TH. OFF contact potential free (possible usage for external blow out temperature control)

This ventilation unit is connected to an ECOi indoor unit (3,0kW, 4,0kW or 4,5kW) and can be controlled by the easy-to-use ECOi remote controller CZ-RTC5B.

This capability makes the system an excellent choice for hotels, offices (large and small), educational settings and other buildings requiring different temperatures in multiple rooms. The system also integrates easily with building management systems.

- Motorised heat recovery by-pass device automatically controlled by unit control to use fresh air free-cooling when convenient
- Galvanized steel self-supporting panels, internally and externally insulated
- Counter flow air-to-air heat recovery device, made of sheets of special paper with special sealing to keep airflows separate and only permeable to water vapour. Total heat exchange with temperature efficiency up to 77% and enthalpy efficiency up to 63%, also at high level during summer season
- G4 efficiency class filters with synthetic cleanable media, both on fresh air and return air intake
- Removable side panel to access filters and heat recovery in the event of scheduled maintenance
- Low consumption, high efficiency & low noise direct driven fans with 3-speed EC motors
- Supply section complete with DX Coil (R410A) fitted with solenoid control valve, freon filter, contact temperature sensors on liquid and gas line, NTC sensors upstream and downstream airflow
- Built-in electric box equipped with PCB to control internal fan speed and to interconnect outdoor/indoor units
- Duct connection by circular plastic collars
- CZ-RTC5B Timer remote controller (option)

INTERNET CONTROL

BMS  
CONNECTIVITY

INTERNET CONTROL: Optional.

#### Energy Efficiency

Energy consumption is dramatically reduced by using a counter-flow heat-exchange element. Air conditioning load is reduced by approximately 20%, resulting in significant energy savings.

#### Features and Benefits

- High energy saving, up to 20%
- Counter Cross Flow technology for better efficiency
- Long life element core
- Easy installation
- Easy connection to air conditioning units
- Super quiet units

#### Energy Efficiency

- Up to 20% energy saving in the installation
- Recovers up to 77% of the heat in the outgoing air

#### Comfort

- Cleaning reduced due to the revolutionary structure (every 6 months)
- Ideal for indoor spaces without windows

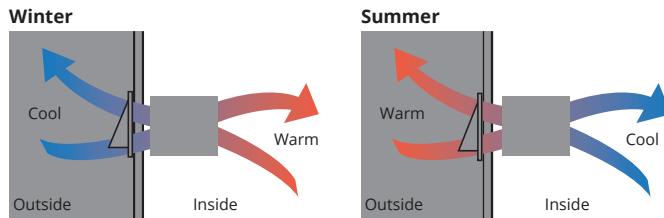

#### Easy Installation and Maintenance

- 6 models for easier selection
- Reduced system height (270mm and 388mm)
- Side opening for cleaning (inspection of filter, motor and other parts)
- Installation can be reversed to share an inspection opening between 2 machines
- Easy connection to the air conditioning unit (without additional elements)
- Installation in false ceilings
- Units operate at 220 - 240V
- High static pressure for easier installation

#### Healthy Air

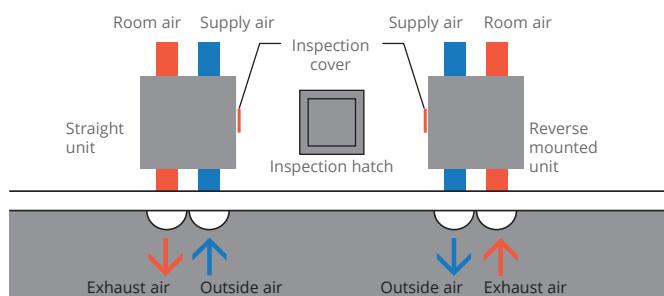

- The filter guarantees healthier air

#### Balanced Ventilation

### Reverse Mountable Direct Air Supply / Exhaust System

Adoption of straight air supply / exhaust system: Duct design is simplified because the air supply / exhaust ducts are straight. Since each unit can be mounted in reverse position, only one inspection hole is needed for two units:

### Heat Exchange Ventilation & Normal Ventilation

Energy-saving ventilation can be achieved through the proper use of heat-exchange ventilation and normal ventilation.

#### Heat Exchange Ventilation

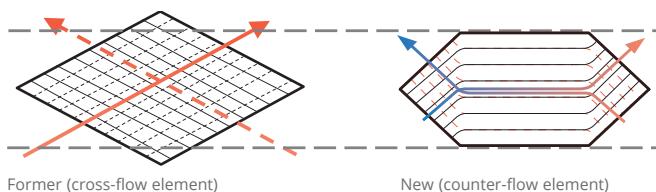

When a room is cooled or heated, the exhausted cooling / heating energy is recovered by heat-exchange ventilation.

#### Normal Ventilation

This is used in the spring and autumn, when rooms are not cooled or heated, that is, when there is little difference between the indoor and outdoor air conditions. In addition, at night during the hot season, when the outside air temperature drops the outside air is drawn inside without heat exchange, alleviating the load on the air conditioning equipment. The heat exchanger is made up of a membrane manufactured from a special material covered in resin for optimal heat transmission. The nylon/polyester fibre filter offers high dust retention capacity. We have also redesigned the air ducts to obtain a long-lasting heat exchange system which does not need periodic cleaning.

#### Heat exchanger

With the cross-flow element, air moves in a straight line across the element. With the counter-flow element, airflows through the element for a longer time (longer distance), so the heat-exchange effect remains unchanged even if the element is made thinner.

Aquarea

# Aquarea Air to Water

**Panasonic's Aquarea range of Heat Pumps deliver major energy savings thanks to its incredible efficiency even at -20°C. The Panasonic Aquarea Heat Pumps are designed and produced by Panasonic and not by other companies.**

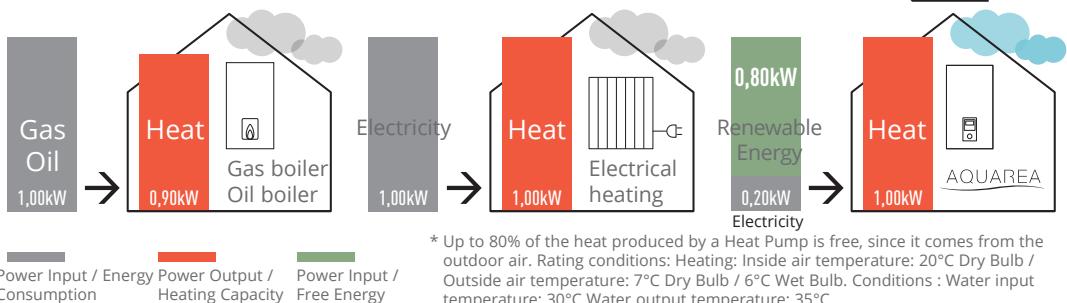

The Aquarea Heat Pump is a system that generates the perfect temperature and produces hot water, in an easy, cheap and environmentally friendly way, by transferring heat instead of generating it. It is among the Technologies listed on the International Energy Agency (IEA) Blue Map, whose goal is to reduce CO<sub>2</sub> emissions to half the levels emitted in 2005, by the year 2050.

Aquarea is part of a new generation of heating solutions that use a renewable, free energy source (the air) to heat or cool the home and to produce hot water:

- Extremely high efficiency (COP of 5,08 for new 5kW Mono-bloc unit)
- Line up developed for low consumption homes (starting at 3kW)
- T-CAP solution is ideal for cold areas, as it maintains the nominal capacity up to -15°C
- Easy to control with your smart phone (using an optional interface)
- Large range of efficient tanks for domestic hot water storage

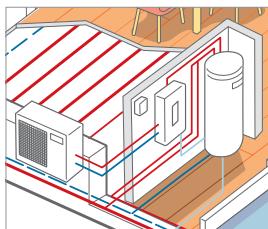

### Up to 80% Energy Saving

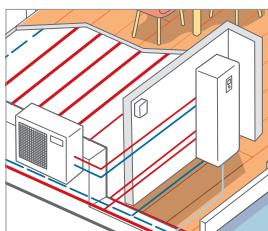

### Why Air Source Heat Pumps

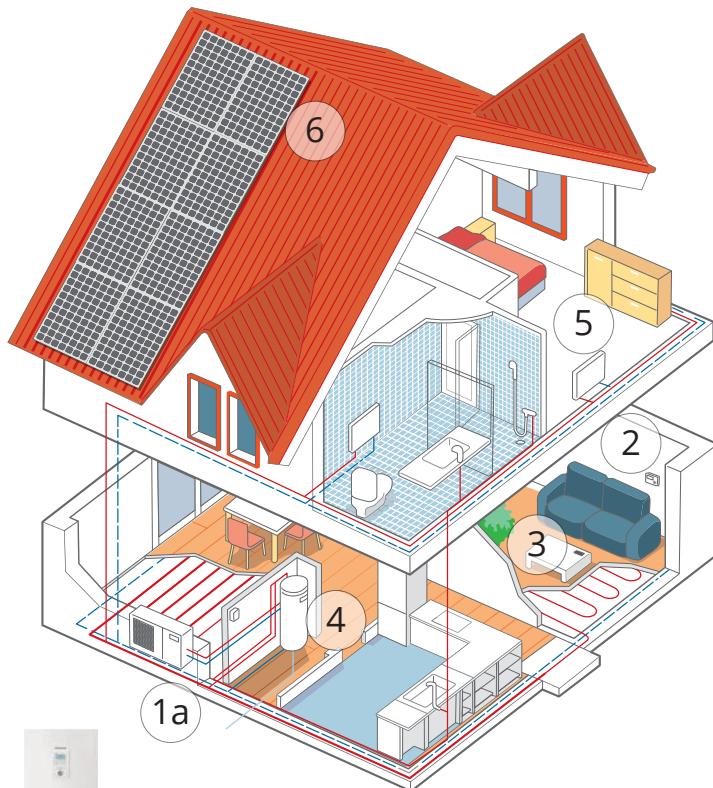

- Heating, cooling and domestic hot water produced with a single system
- Best in terms of efficiency: even at extreme outdoor temperatures
- Environmentally friendly: can be connected to solar panels
- Technology that adapts to each home: extreme low temp, high temperature, whatever the climate
- Wide range of solutions: floor heating, radiators and fan coils
- Reduced heating bills and maintenance costs
- Reduce your carbon footprint
- Simple to integrate into existing heating systems
- Energy efficient alternative to oil, LPG and electric systems
- Ideal for properties without access to mains gas
- Externally positioned saving valuable internal living space

**Aquarea High Performance**

**For New Installations and low consumption homes**  
Maximum savings, maximum efficiency, minimum CO<sub>2</sub> emissions, minimum of space. Improved performance with COP's up to 5,28.

**Aquarea T-CAP For extremely low temperatures, refurbishment and innovation**

Ideal to ensure that the heating capacity is maintained even at very low temperatures. This line-up is able to maintain the Heat Pump output capacity until -20°C outdoor temperature without the help of an electrical booster heater.

**Aquarea HT. For a house with old high temperature radiators**

Ideal for retrofit: green energy source works with existing radiators. Aquarea HT Solution is the most appropriate, provides output water temperatures of 65°C even at outdoor temperatures as low as -15°C.

## Controls & Accessories

### Individual Remote Controllers

Panasonic

**CZ-RTC5B**

**Designer Wired RC**

**For PACi, ECOi & ECO G**

**Retail Price**

**£104**

- Power consumption monitor (only for PACi)
- Flat face design & Touch sensor switch for stylish design and operating usability
- New functions such as for Energy saving & monitoring and for Service use are available on the Full dot LCD (3,5" display)
- Improved illumination
- White LED backlit
- Blink when alarm occurs

**CZ-RTC2**

**Standard Wired RC**

**For PACi, ECOi & ECO G**

**Retail Price**

**£104**

- For Floor Standing (MP1) indoor units
- Time Function 24 hours real time clock (week day indicator)
- Weekly programme function (a maximum of 6 actions can be programmed for each day)
- Sleeping function (this function controls the room temperature for comfortable sleeping)

**CZ-RE2C2**

**Simplified Wired RC**

**For PACi, ECOi & ECO G**

**Retail Price**

**£124**

- Suitable for open rooms or hotels where detailed functions are not required
- ON/OFF, operation mode switching, temperature setting, air speed switching, air flow direction setting, alarm display, and remote controller self-diagnosis can be performed

#### Basic Operation.

- Operation · Mode · Temperature setting · Airflow volume · Airflow direction

#### Timer function.

- Outing function · Weekly Program timer · Easy ON/OFF timer · Time display

#### Energy saving.

- Outting function · Temperature setting range limitation
- Temperature auto return · OFF remind · Schedule demand control · Energy saving mode · Energy monitoring

#### Others.

- Key lock · Ventilation fan control · Display contrast adjustment · Remote controller sensor · Quiet operation mode · Prohibit setting control from Central controller

\* Several functions can not use on some outdoor unit. Ex. Power consumption monitor is not available for PACi Standard, Backup/Rotation control for PACi system.

- Maximum 8 indoor units can be controlled from one remote controller
- Remote control by main remote controller and sub controller is possible (maximum 2 remote controllers (main remote controller and sub controller) can be installed for one indoor unit)
- Possible to connect to the outdoor unit using PAW-MRC cable for servicing purposes
- Outting function (this function can prevent the room temperature from dropping or rising when the occupants are out for a long time)
- Operation mode changeover (Cooling, Heating, Dry, Auto, Fan)
- Temperature setting (Cooling / Dry: 18-30°C Heating: 16-30°C)
- Fan speed setting High / Medium / Low and Auto
- Air flow direction adjustment
- Dimensions (H x W x D): 120 x 120 x 16mm

**CZ-RELC2**

**Simplified Wired RC with Backlight**

**For PACi, ECOi & ECO G**

**Retail Price**

**£175**

- Batch group control for up to 8 indoor units

- Remote control by main remote controller and sub controller is possible with a simplified remote controller or a wired remote controller (up to two units)

- Dimensions (H x W x D): 120 x 70 x 16mm

### Wireless Remote Controllers

Model	Description	Retail
CZ-RWSY2	Wireless remote and receiver for MY and PY 600 x 600 cassettes	£130
CZ-RWSU2N	Wireless remote and receiver for MU1 cassettes	£145
CZ-RWRU3	Wireless remote and receiver for PU and MU cassettes	£145
CZ-RWST2	Wireless remote and receiver for MT and PT cassettes (older version)	£145
CZ-RWRT3	Wireless remote and receiver for MT and PT cassettes (latest version)	£145
CZ-RWRL3	Wireless remote and receiver for 2 way cassettes	£145
CZ-RWS3	Wireless remote control. MK and PK wall mounted. This is also the generic controller which is used in all kits, which include the receiver	£93
CZ-RWRD3	Wireless remote control for 1 way cassette	£145

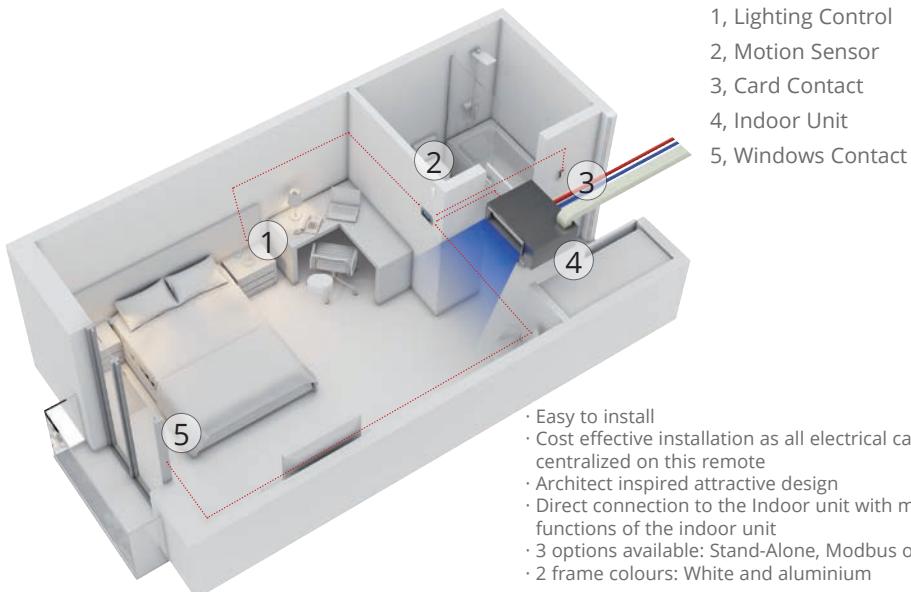

- 24 hour timer function
- Remote control by main remote controller and sub controller is possible (Max. 2 remote controllers (main remote controller and sub controller) can be installed for one indoor unit)
- When CZ-RWSC3 is used, wireless control becomes possible for all indoor units (1: when a separate receiver is set up in a different room, control from that room also becomes possible. 2: automatic operation by

means of the emergency operation button is possible even when the remote controller has been lost or the batteries have been exhausted)  
 · Operation of separate energy recovery ventilators (When commercial ventilation fans or heat-exchange ventilation fans have been installed, they can be operated with this remote control (interlocked operation with the indoor unit or independent ventilation ON/OFF)

**Panasonic has developed an innovative line up of remote controls specially designed for hotel room applications.**

From this remote control: The lighting, card contact, motion detector, window contact and the air conditioning are controlled.

- Easy to install
- Cost effective installation as all electrical cable are centralized on this remote
- Architect inspired attractive design
- Direct connection to the Indoor unit with most of the functions of the indoor unit
- 3 options available: Stand-Alone, Modbus or LonWorks
- 2 frame colours: White and aluminium

**Energy saving functions** included on the device: Turns Off air conditioning and lighting when room is unoccupied. Disables air conditioning when window is open. Maximum/minimum setpoint temperature configurable

**Easy remote control:** The hotel customer will have access to limited functions to control the air conditioning: ON/OFF, Temperature (under a certain limit fixed during the start up) and Fan speed

**Easy set up:** Stand-Alone model with easy configuration menu to access all parameters. The installation is simplified as all the cables should arrive to the remote control. A pre-define scenario can be uploaded on the remote control connected to a computer to make installation on site plug and play (only on the Modbus and LonWorks models).

Model Number	Description	Retail Price
PAW-RE2C3-WH	Stand-Alone with I/O White frame	£240
PAW-RE2C3-GR	Stand-Alone with I/O Grey Frame	£260
PAW-RE2C3-MOD-WH	Modbus RS-485 with I/O White frame	£280
PAW-RE2C3-MOD-GR	Modbus RS-485 with I/O Grey frame	£300
PAW-RE2C3-LON-WH	LonWorks TP/FT-10 with I/O White frame	£300
PAW-RE2C3-LON-GR	LonWorks TP/FT-10 with I/O Grey frame	£320

**CZ-CENSC1**

**Econavi Sensor**

**For PACi, ECOi & ECO G**

**Retail Price**

**£125**

- Detects human activity and adjusts temperature by 2 degrees (up or down) to optimize comfort and efficiency
- If there is no activity detected for a set time, the Econavi will stop the unit or move to a new temperature previously set
- The Econavi device is installed independently of the indoor unit, and is located in the area best suited for detection

#### Applications:

Saving Energy for Offices: if the air conditioning is left on after the last employee leaves the office, Econavi will automatically react, reducing or stopping the system.

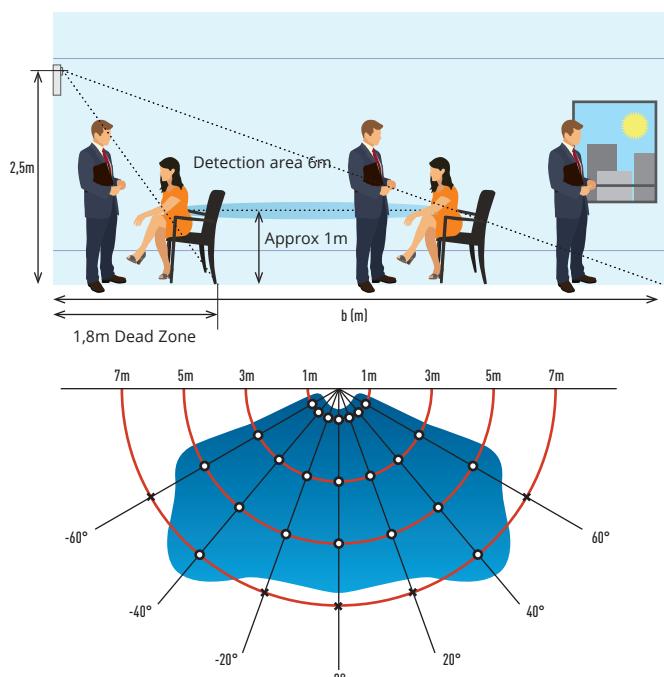

Increased comfort in hotel rooms: when presence is detected in the room, the temperature is automatically adjusted to achieve best comfort.

#### Key Features

- Compatible with Cassette, Wall Mounted, Hide Away and Ceiling
- Improves efficiency
- Better Comfort
- Can be installed in the best place of the room for detection purposes

The all new Econavi Sensor detects presence in the room, and quietly adapts the PACi or VRF air conditioning system in order to improve comfort and maximise energy savings.

**ECONAVI**

**CZ-CSRC3**

**Remote Sensor**

**For PACi, ECOi & ECO G**

**Retail Price**

**£93**

**CZ-CSRC2**

**Remote Sensor**

**For PACi, ECOi & ECO G**

**Retail Price**

**£93**

### CZ-ANC2 / CZ-ANC3

**On - Off Controller**

**For PACi, ECOi & ECO G**

**Retail Price**

**£450**

- 16 groups of indoor units can be controlled
- Collective control and individual group (unit) control can also be performed
- Up to 8 ON/OFF controller (4 main, 4 sub) can be installed in one link system
- The operation status can be determined immediately
- Dimensions (H x W x D): 121 x 122 x 14 + 52mm (embedding dimension)
- Power supply: AC 220 to 240V.

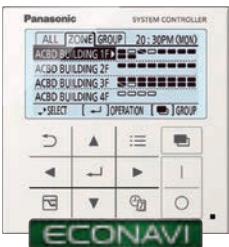

### CZ-64ESMC3

**£665**

### Panasonic unveils state-of-the-art digital controller

Panasonic has launched its latest controller, an innovative and easy to use interface that offers full functionality with an integrated schedule timer and system controller, making managing heating and cooling systems easier than ever before.

The CZ-64ESMC3 includes Panasonic's popular schedule timer, which gives users full flexibility over when they want their property heated or cooled. Users can adjust the system for holidays, pausing operations for long periods of time so that energy isn't wasted heating or cooling an empty home or office. The controller also allows six operations per day to be programmed.

#### Key Points:

- Same operation feeling as new wired remote controller by touch-key panel
- High visibility and usability by Full-dot LCD
- Based on High wired remote controller
- Maximum 64 group of indoor units, Individual control for 64 units
- 4 zone control; 1 zone = Maximum 16 groups
- Several energy saving function (based on CZ-RTC5B)
- 6 timer program per day for 1 week (7 days) operation (Total 6 x 7= 42 programs)
- Basic setting items (Temperature, Mode, Fan speed, Flap position) set by same manner as CZ-RTC5B

#### Function list:

From CZ-64ESMC2 System controller:

- Central control / individual setting
  - Start-stop prohibition for remote controller
  - Start-stop / Mode change / Temperature setting prohibition for remote controller
  - Mode change / Temperature setting prohibition for remote controller
  - Mode change prohibition for remote controller
  - Select items for prohibition
  - Filter information
    - Filter sign
    - Filter sign reset
  - Ventilation setting

From CZ-ESWC2 Schedule timer:

- Weekly Timer
  - Timer setting Enable / Disable
  - Copy of Timer setting
- Maintenance
  - External signal (Start / Stop) (Demand control)

- Centralized control master-slave setting

- Alarm history
- Initial setting
- Clock

From CZ-RTCSB

- Energy-saving control
  - Econavi On/Off
  - Filter information
  - Filter sign and Hour counter display
  - Maintenance
    - Service contact
  - Initial setting
  - Clock display setting
  - Name Setting
  - Operation lock setting
  - Operation sound setting
  - LCD contrast setting
  - LCD backlight setting
  - Select displayed language (EN / FR / IT / ES / DE)
  - Administrator password
  - Setting information list

### CZ-256ESMC3

**Touch Screen Intelligent Controller  
For PACi, ECOi & ECO G**

Retail Price - £2,500

CZ-CBPCC2 back up memory - £186

- Graph display (trends, comparisons)
- Econavi ON/OFF
- Outdoor unit quiet operation ON/OFF
- Energy-saving functions: Set temperature auto return settings, Auto shutoff, Set temperature range limit settings, Energy saving for PAC current value,etc.
- Event control (such as equipment linkage)
- Performs closing at end of any period
- Dimensions (H x W x D): 240 x 280 x 20 (+60)mm.
- Power supply: Single phase 100-240V ~ 50/60Hz.
- Enlarged Display Screen: 10.4 inch Touch-panel colour LCD.
- Retrieve data from USB memory
- Communication adaptor: CZ-CFUNC2.

- 1) The maximum number of connectable units is shown below:
  - When using only this unit: 128 indoor units and 60 outdoor units
  - When connecting a communication adaptor: 256 indoor units and 120 outdoor units

- 2) The number of indoor units includes the interface adaptor.

### Operation And Status.

You can check to operational status (ON/OFF, operating mode, alarms, etc.) of all indoor units and outdoor units in real time.

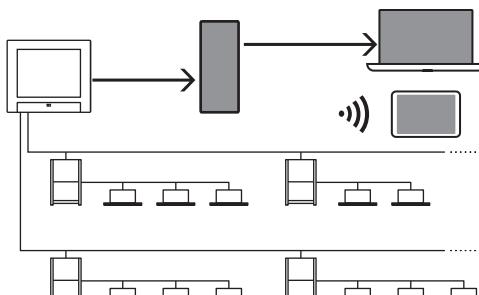

You can also select indoor units to change their settings.

### Distributing Air Conditioner Energy

You can view cumulative operating times for indoor units, engine operating times for outdoor units, and operation cycles in a list (cumulative values). Using these data, you can calculate the distribution ratio of electricity or gas consumed for air conditioning and volumes used (kWh, m<sup>3</sup>) per indoor unit or in an area, then show these calculations in a list.

### Remote Control

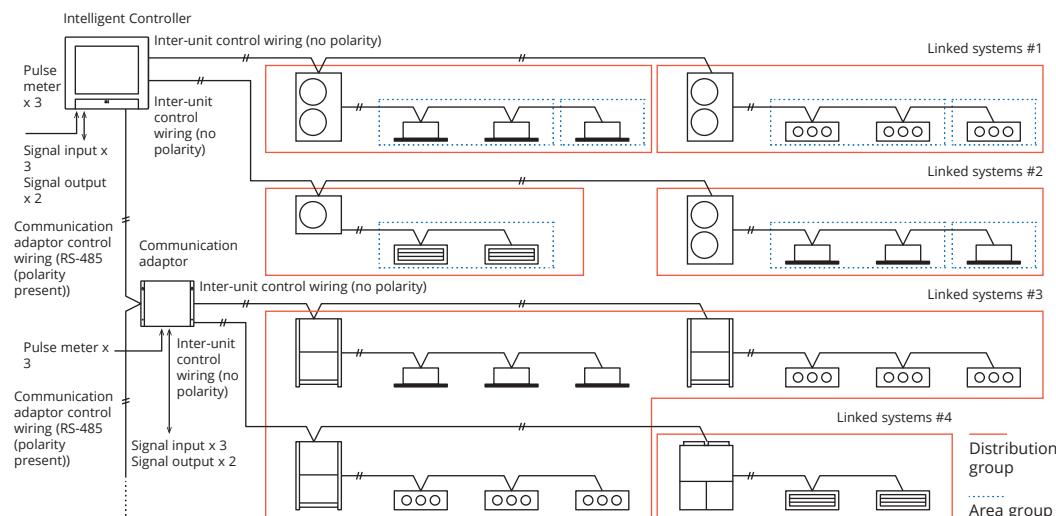

The LAN terminal on this unit enables you connect it to a network. Connecting to Internet will enable you to operate the unit and check the status using a PC from a remote location.

### Operation Scheduling

You can register daily operation schedules (ON/OFF time, operating modes, set temperatures, etc.) for individual indoor units or groups of indoor units.

Operations can be schedule for up to 2 years in advance.

### Flexible solution and scalable solution

- It doesn't matter how many sites you have, easy to manage, operate, compare per sites, locations, rooms.
- Power consumption, capacity, efficiency level can be compared per different parameters (Yearly / monthly / weekly/ daily bases)
- Weekly / holiday timer setting, one setting can be copied to other sites
- Error notification by email and with floor layout
- Maintenance notification of ECOi / ECO G outdoor units

Centralise control of your business premises, from wherever you are, 24/7/365. It doesn't matter how many sites you have, or where they are! The AC Smart Cloud system from Panasonic allows you to have complete control of all your installations, from your tablet or from your computer. In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimising costs

### CZ-CSWKC2

### P-AIMS Basic Software

### For PACi, ECOi & ECO G

### Retail Price

£3,616

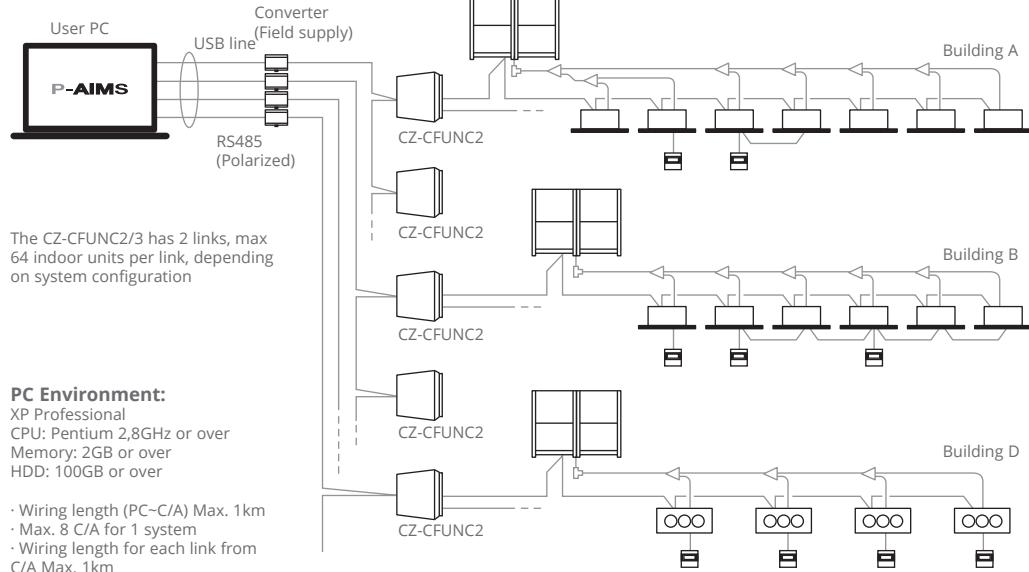

### CZ-CFUNC2 / CZ-CFUNC3

### Communications Adapter

### Retail Price

£1,050

**Up to 1024 indoor units can be controlled by one PC.**

Functions of basic software.

- Standard remote control for all indoor units.
- Many timer schedule programs can be set on the calendar.
- Detailed information display for alarms.
- CSV file output with alarm history, operating status.
- Automatic data backup to HDD.
- P-AIMS is suitable for large offices, hotels & shopping centers with many areas/ buildings. 1 "P-AIMS" PC can have 4 independent systems at once.

Each system can have maximum 8 C/A units, and control maximum 512 units. In total, 1024 indoor units can be controlled by 1 "P-AIMS" PC.

Opt. Software	Description	Retail Price
CZ-CSWAC2 Load distribution	<ul style="list-style-type: none"> <li>• Air-conditioner load distribution ratio is calculated for each unit (tenant) with used energy consumption data (m³, kWh)</li> <li>• Calculated data is stored as a CSV type file, data from the last 365 days is stored</li> </ul>	£2,066
CZ-CSWWC2 Web application.	<ul style="list-style-type: none"> <li>• Web access &amp; control from remote station. Accessing P-AIMS software from remote PC</li> <li>• You can monitor/operate ECOi 6N system by using Web browser (Internet Explorer)</li> </ul>	£1,550
CZ-CSWGC2 Object layout display.	<ul style="list-style-type: none"> <li>• Operating status monitor is available on the layout display</li> <li>• Object's layout and indoor unit's location can be checked at once</li> <li>• Each unit can be controlled by virtual remote controller on the display</li> <li>• Max. 4 layout screens are shown at once</li> </ul>	£1,550
CZ-CSWBC2 BACnet software interface	<ul style="list-style-type: none"> <li>• Can communicate with other equipment by BACnet protocol</li> <li>• ECOi 6N system can be controlled by both BMS and P-AIMS</li> <li>• Max. 255 indoor units can be connected to 1 PC (that has P-AIMS basic &amp; BACnet software).</li> </ul>	£4,132

**ECOI and GHP Connectivity**

New Plug and play interface connected directly to the P-Link.

The interface has been designed specifically for Panasonic and provides complete monitoring, control and full functionality of the line-up from Intesis Home, KNX, EnOcean, Modbus, BacNet and Lonworks installations.

Range	Model Number	Interface	Maximum Number of Indoor Units	Retail Price
ECOI / PACi Indoor Units	PAW-RC2-KNX-1i	KNX	1 (1 Group of Indoor units)	£300
	PAW-RC2-MBS-1	Modbus RTU <sup>1</sup>	1 (1 Group of Indoor units)	£300
	PAW-RC2-ENO-1i	EnOcean	1 (1 Group of Indoor units)	£300
	PA-RC2-WIFI-1	Intesis Home	1 (1 Group of Indoor units)	£200
ECOI P-Link	PAW-AC-KNX-64	KNX <sup>2</sup>	64	£2,600
	PAW-AC-KNX-128	KNX <sup>2</sup>	128	£3,380
	PAW-AC-MBS-RTU-64	Modbus RTU <sup>2</sup>	64	£2,400
	PAW-AC-MBS-TCP-128	Modbus TCP <sup>2</sup>	128	£3,120
	PAW-MBS-TCP2RTU	Modbus TCP <sup>2</sup>	ModBus RTU Slave devices	£850
	PAW-AC-BAC-1	Bacnet	1	£500
	PAW-AC-BAC-64	Bacnet <sup>2</sup>	64	£2,400
	PAW-AC-BAC-128	Bacnet <sup>2</sup>	128	£3,120
	CZ-CLNC2	Lonworks	16 groups of max. 8 indoor units, in total max. 64 indoor units	£1,050

1) Interface Modbus RTU/TCP is needed in case if Modbus TCP connection. PAW-MBS-TCP2RTU (ModBus RTU Slave devices).

2) Interface CZ-CFUNC2 needed.

#### CZ-CAPDC2

**Seri-Para I/O unit for outdoor unit**

**Retail Price**

**£517**

- This unit can control up to 4 outdoor units
- From the central control device, mode changing and batch operation/batch stop are possible
- Required for demand control
- Dimensions (H x W x D): 80 x 290 x 260mm.
- Power supply: Single Phase 100/200V (50/60Hz), 18W.
- Input: Batch operation/Batch stop (non-voltage contact/DC 24 V, pulse signal). Cooling/Heating
- Output: Operation output (non-voltage contact). Alarm output (non-voltage contact).
- Wiring length: Indoor/Outdoor operation lines: Total length 1km.
- Digital signal: 100m or shorter.

#### CZ-CAPDC3

**Demand Control Kit  
(replacing CZ-CAPDC2)**

**Retail Price**

**£132**

#### CZ-CAPC2

**Local adaptor for ON/  
OFF control**

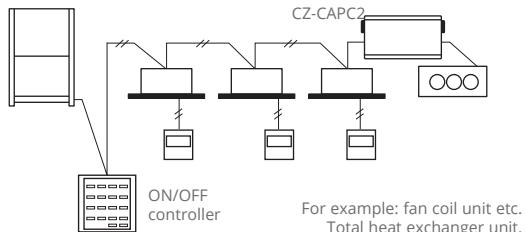

**For PACi, ECOi & ECO G**

**Retail Price**

**£285**

Control and status monitoring is possible for individual indoor unit (any external electrical device up to 250V AC, 10A) by contact signal

#### CZ-CAPBC2

**MINI Seri-Para I/O Unit  
0 -10V**

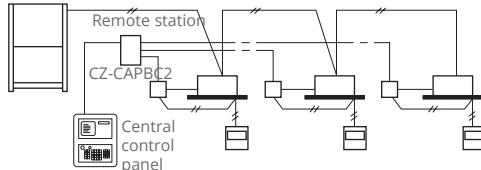

**For PACi, ECOi & ECO G**

**Retail Price**

**£155**

- Control and status monitoring is possible for individual indoor unit (1 group)
- In addition to operation and stop, there is a digital input function for air speed and operation mode
- Temperature setting and measuring of the indoor suction temperature can be performed from central monitoring
- Power is supplied from the CZ-T10 terminal of the indoor units
- The analog input for demand of the outdoor capacity by 20 steps (from 40% to 120%) by 0-10V

**CZ-T10**

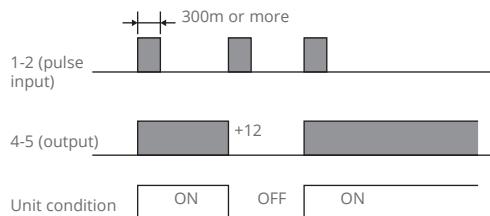

**Wiring Interface  
For PACi, ECOi & ECO G**

**Retail Price  
£40  
Pack of 10 = £200**

T10 terminal Specification (T10: CN015 at indoor unit PCB).

- Control items: 1. Start/stop input
- 2. Remote controller prohibit input
- 3. Start signal output
- 4. Alarm signal output

NOTE: The wire length from indoor unit to the Relay must be within 2,0m. Pulse signal changeable to static with JP cutting. (Refer to JP001)

**Wiring Adapter for All T10 Functions**

Panasonic has developed an optional accessory (consisting of plug + wires) called CZ-T10 to enable an easy connection to this T10 connector.

Connecting an ECOi indoor unit to an external device is easy. The T10 terminal featured in the electronic circuit board of all indoor units

## • Condition

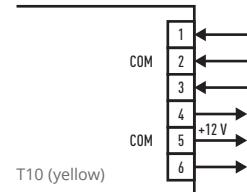

1. 1-2 (Pulse input): Unit ON/OFF condition switching with a pulse signal. (1 pulse signal: shortage status more than 300msec. or more)

2. 2-3 (Static input): Open / Operation with Remote is permitted (Normal condition) Close / Remote controller is prohibited

3. 4-5 (Static output): 12V output during the unit ON / No output at OFF

4. 5-6 (Static output): 12V output when some errors occur / No output at normal

## • Example of wiring

**PAW-OCT**

**Wiring Interface  
For PACi, ECOi & ECO G**

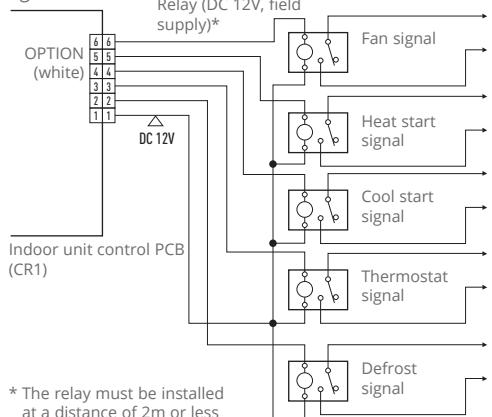

**Retail Price  
£40**

**Option Connector (CN060) Output external signals**

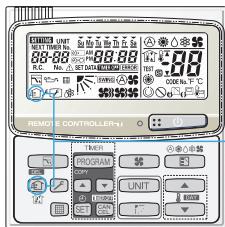

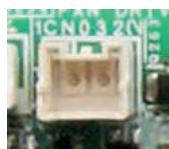

Panasonic has developed an optional accessory (consisting of plug + wires) called PAW-OCT to enable an easy connection to this Option Connector (CN060).

With the combination of the T10 and the option CN060 an external control of the indoor units is possible!

6P (white): Outputs external signals as shown in the figure below

\* The relay must be installed at a distance of 2m or less from the PCB.

**PAW-FDC****Wiring Interface****For PACi, ECOi & ECO G****Retail Price****£40****External fan On / Off**

Ventilation button

**PAW-EXCT****Wiring Interface****For PACi, ECOi & ECO G****Retail Price****£40****Example A, With static input.**

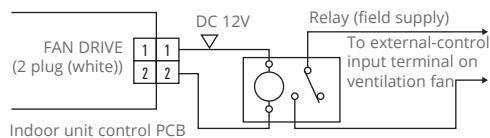

■ STATIC INPUT □ THERMO OFF □ ENERGY SAVING  
2P plug (red): Can be used for demand control.  
When input is present, forces the unit to operate with the thermostat OFF.

Note: The length of the wiring from the indoor unit control PCB to the relay must be 2m or less.

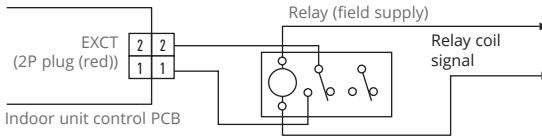

**Fan Drive Connector (CN032)**

Panasonic has developed an optional accessory (consisting of plug + wires) called PAW-FDC to enable an easy connection to this Fan Drive Connector (CN032).

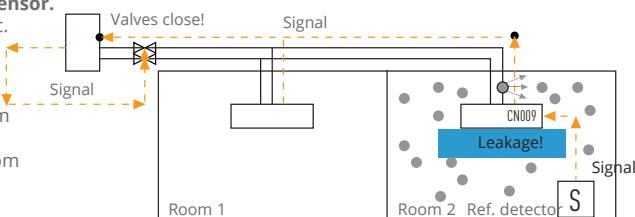

- Operating the ventilation fan from the remote controller
- Start / stop of external ventilation and total heat exchanger fans
  - Works even if indoor unit is stopped
  - In case of group control □ all fans will operate; no individual control

**EXCT Connector (CN009)**

Panasonic has developed an optional accessory (consisting of plug + wires) called PAW-EXCT to enable an easy connection to this EXCT

**Example B, In connection with a refrigerant sensor.**

- Signal from leakage detector: non voltage, static.
- Indoor unit setting: Code 0b □ 1
- Connector for leak detector: EXCT
- Outdoor unit setting:  
Code C1 = 1 power output if alarm from O2 connector 230V  
Code C1 = 2 power output if alarm from O2 connector 0V
- Displayed alarm message P14

**Other Accessory Cables**

Model	Description	Retail
CZ-CAPE2	Option monitoring signals wo. Fan	£77
PAW-SLTCNT	Silent Connector including cable (outdoor unit to BM software)	£40
PAW-CHS	Connector (cable) for Cooling / Heating Selection (permanent)	£40
PAW-MRC	Connector (cable) for Maintenance Remote Controller	£40

## Refrigerant Leak Detection and Pump Down

Panasonic has developed an innovative solution to detect refrigerant leaks that offer complete assurance and protection for end users, building occupiers and the environment. Panasonic's Pump Down System is ideal for hotels, offices and public buildings where safety for occupants and the building owners is of utmost importance.

The system monitors refrigerant leakage continually and provides a warning before refrigerant leaks, preventing major refrigerant loss and potentially damaging the system's efficiency. The new system can improve potential refrigerant loss to approximately 90%.

As well as ensuring safe and reliable operation, Panasonic's Pump Down System contributes to a building qualifying for additional BREEAM points and enables compliance with current EN378 2008 standards, covering applications where refrigeration concentration levels exceed practical safety limits of 0,44 kg/m<sup>3</sup>.

Panasonic has developed two detection methods that can operate simultaneously to offer complete protection for owners, building occupiers and the environment.

This innovative pump down system can be connected in two ways:

With sensor leakage

Without sensor leakage, using only the algorithm.

Basic pump down function:

Detect the leakage

Activate pump down process

Collect the gas on the tank

Close the valves to isolate the gas

Key points:

Comply with legislation

Protect personnel

Protect the environment

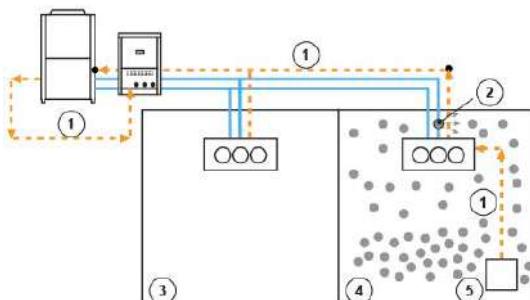

Save on operating costs

Panasonic offers a purposely engineered solution which allows for a quick and simple installation. The unit contains 5 actuating ball valves, a 30l storage vessel and PLC all housed in an IP54 rated container. Terminals on the front of the unit allow for easy wiring to the alarm terminal, high / low pressure transducers and discharge temperature sensor(s) of the condensing unit(s).

## Direct Leak Detection Method: The Safest Solution for Small Rooms

This option should be implemented in any area in non-compliance with BS EN 378:2008. The leak detector is connected directly to the indoor unit via the dedicated PAW-EXCT connector and the Pump Down System is directly connected to the outdoor unit PCB.

The Pump Down System will activate when a leak is detected in the room and initiate a refrigerant reclaim operation immediately, the refrigerant will be collected inside the outdoor units' heat exchanger and optional receiver tank for larger systems.

1. Signal. 2. Leakage! 3. Room 1. 4. Room 2. 5. Leak detector.

This immediate reaction and large refrigerant storage capacity offers very high level of safety for end users, building occupiers as well as being environmentally friendly.

Due to the exclusive ECOi software the leak detection sensors are able to communicate directly via the P-link which means no additional communication panels, cabling or software is required.

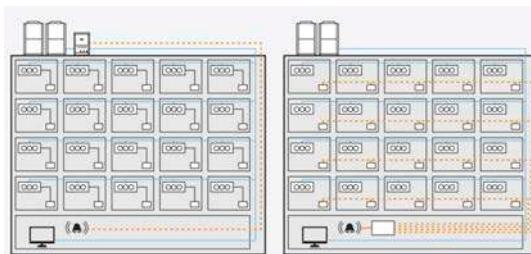

### **In-Direct Leak Detection Method: Unique PLC Algorithm to Determine Refrigerant Leakage**

Pressure and temperature sensors constantly monitor the low / high pressure and discharge of the condensing unit to protect against potential leakage in areas not covered by leak detectors. If low pressure decreases and compressor discharge temperature increases at pre-defined values according to a pre-set algorithm then the unit will trigger a pump down sequence. The new innovative algorithm is able to detect leakage of R410A based on abnormal changes in the following conditions, high pressure, low pressure and compressor discharge temperature.

Once initiated via either direct or in-direct detection, the unit will immediately close the liquid / discharge actuating ball valves close the alarm terminals on the Pump Down PCB allowing an alarm to be raised at any nominated location.

Reclaim of the refrigerant is via the suction line to the heat exchanger(s) of the outdoor unit(s), any surplus refrigerant is collected in the 30l receiver tank. Once fully pumped down the suction line is closed and the unit awaits a 'Reset' and 'Recharge' command. protection for owners, building occupiers and the environment.

Due to the simplistic installation and control interfacing, shown in Fig 1, Panasonic's ECOi Pump Down System can provide dramatic reduction in capital cost and installation time when compared to a standalone leak detection system, shown in Fig 2. This option is ideal for hotels, offices and public buildings where safety of building occupiers is a must and is extremely cost effective, savings of 40% can be easily achieved.

Model	Description	Retail
PAW-PUDME1A-1	Pump Down System, 2-Pipe ECOi & ECOg - for 1 outdoor condensing unit	£5,200
PAW-PUDME1A-2	Pump Down System, 2-Pipe ECOi & ECOg - for 2 outdoor condensing units	£6,700
PAW-PUDME1A-3	Pump Down System, 2-Pipe ECOi & ECOg - for 3 outdoor condensing units	£8,200
PAW-PUDMF2A-1	Pump Down System, 3-Pipe ECOi & ECOg - for 1 outdoor condensing unit	£5,500
PAW-PUDMF2A-2	Pump Down System, 3-Pipe ECOi & ECOg - for 2 outdoor condensing units	£7,000
PAW-PUDMF2A-3	Pump Down System, 3-Pipe ECOi & ECOg - for 3 outdoor condensing units	£8,500
PAW-PUDRK30L	Additional refrigerant receiver, 30 litre pre-charged tank (R410A) with valves.	£1,750
PAW-PUDME1A-1R	Pump Down System, 2-Pipe ECOi & ECOg - for 1 outdoor condensing unit Inc. receiver	£6,950
PAW-PUDME1A-2R	Pump Down System, 2-Pipe ECOi & ECOg - for 2 outdoor condensing units Inc. receiver	£8,450
PAW-PUDME1A-3R	Pump Down System, 2-Pipe ECOi & ECOg - for 3 outdoor condensing units Inc. receiver	£9,950
PAW-PUDMF2A-1R	Pump Down System, 3-Pipe ECOi & ECOg - for 1 outdoor condensing unit Inc. receiver	£7,250
PAW-PUDMF2A-2R	Pump Down System, 3-Pipe ECOi & ECOg - for 2 outdoor condensing units Inc. receiver	£8,750
PAW-PUDMF2A-3R	Pump Down System, 3-Pipe ECOi & ECOg - for 3 outdoor condensing units Inc. receiver	£10,250

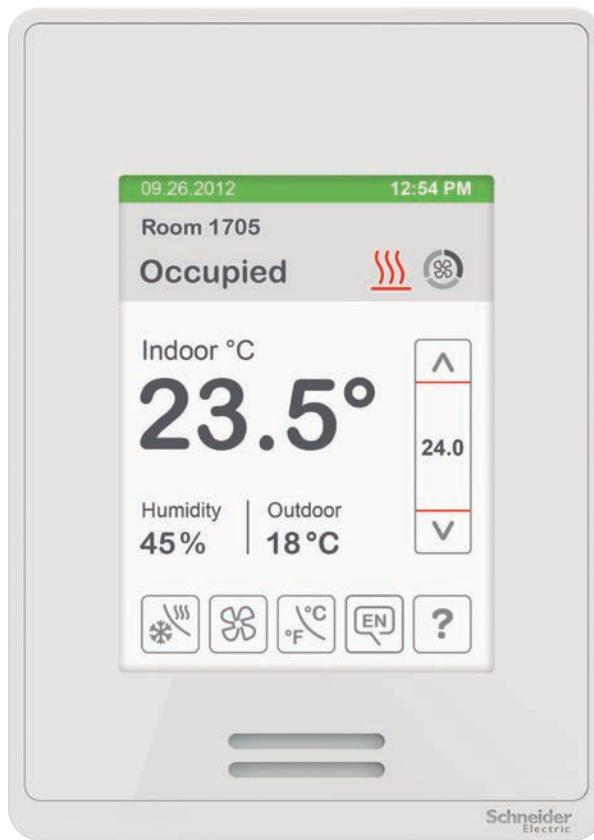

# VRF Smart Connectivity

Life Is On

**Schneider**  
Electric

Through thorough energy management, Panasonic's VRF Smart Connectivity is a completely new, state-of-the-art solution providing energy saving and comfort as well as simple installation, operation and running.

Panasonic, passionately pursuing the ultimate in energy saving through the application of cutting-edge technology, and Schneider Electric, an advanced global energy management specialist offering innovative control systems. This collaboration has set the new standard for creating the next generation of contemporary buildings.

Extremely simple Plug and Play connection to a Building Energy Management System (BEMS) is possible. Compared to the current VRF systems and chillers of other companies, connection is smooth and stress-free, so there's considerably less burden on the system integrator.

### Easy Design and Plug and Play to Reduce CapEx.

- Simple Plug & Play VRF connection to Building Energy Management System (BEMS)
- Stand alone or BEMS connected
- VRF indoor Wired or Wireless connection
- Plug and play additional ZigBee sensors

### Ultimate Customization.

- Background colour customisable
- Custom display/icons, messages
- Set point boundaries
- Programmable logic (also stand alone)

### Dramatic Reduction of CapEx with Outstanding IAQ.

- 2 Built in sensors: Temperature and RH
- ZigBee wireless sensors: CO<sub>2</sub>, window/door, human presence.

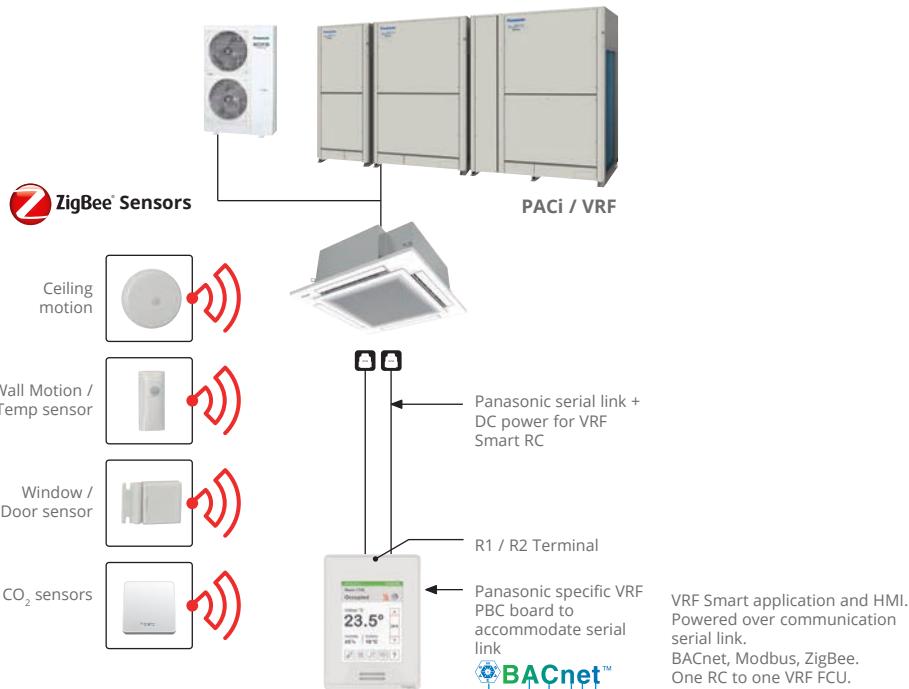

### User-/Owner-friendly.

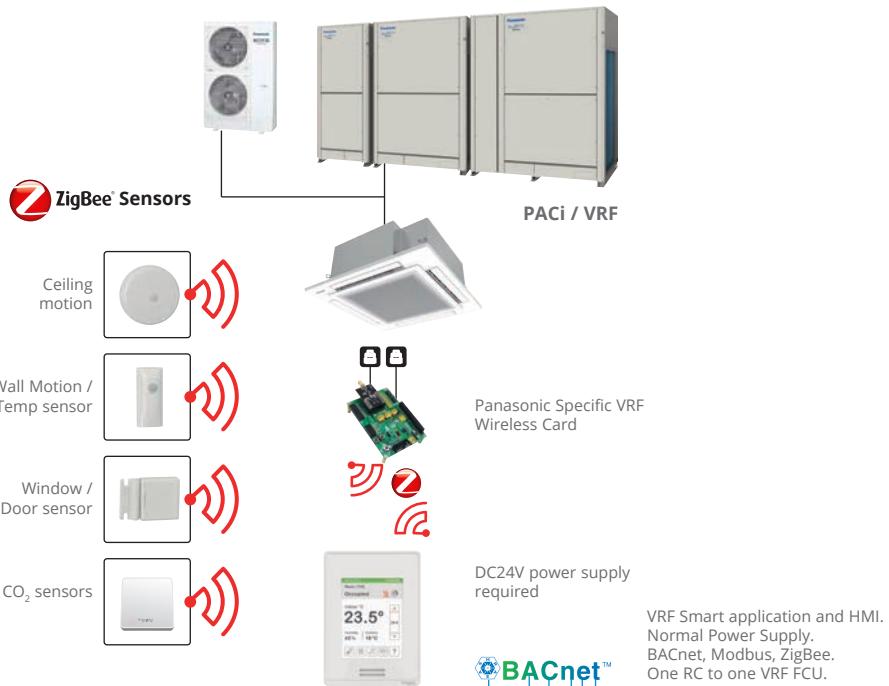

- Colour touch screen
- Ease and simply of use
- 20 Languages
- Easy to understand error description

## Stand Alone Smart Connection

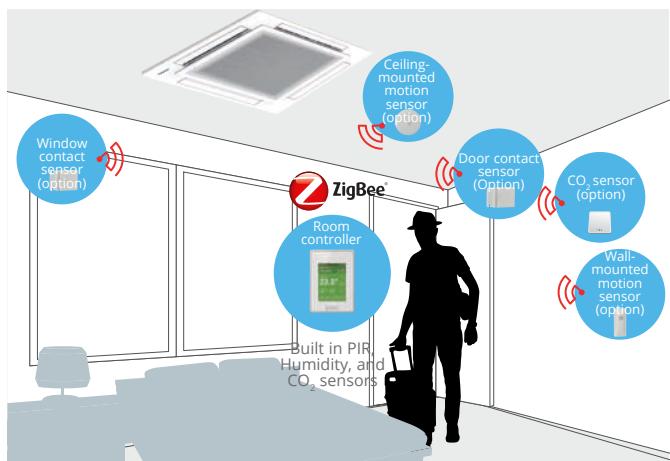

VRF Smart Connectivity connects Panasonic ECOi and PACi indoor units by wired or wireless connection

### Wired Solution

**Wireless Solution**

The wireless solution using sensors born from the collaboration between Panasonic and Schneider Electric enables easy installation in existing and old buildings in which wiring is difficult (installation in a wired environment is also possible). The result is high-quality

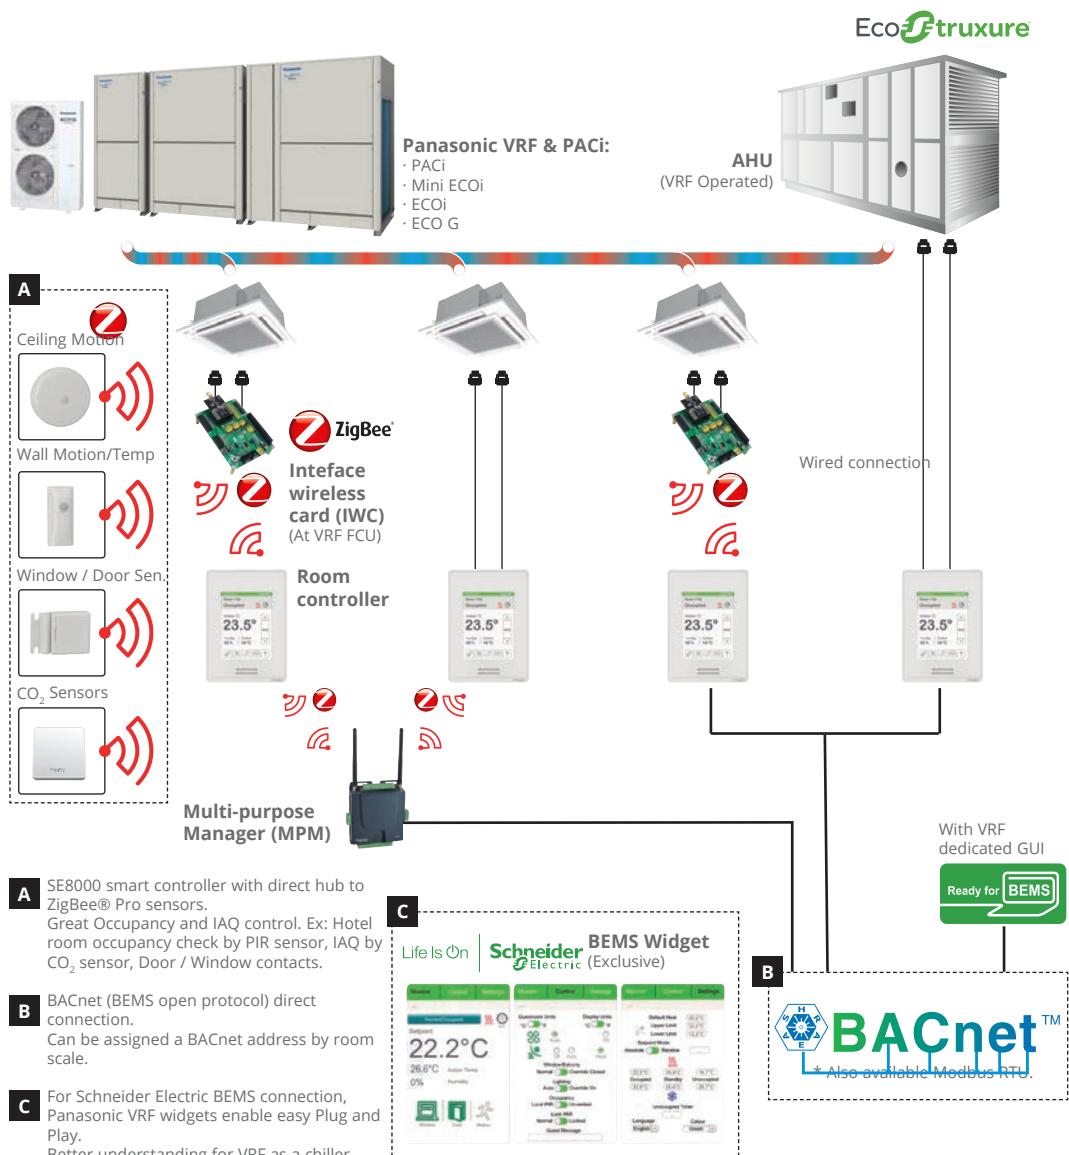

### BEMS Smart Connection

The Smarter solution to simplify energy management, optimize building efficiency and drive savings.

Plug and Play BEMS connection.

With Plug and Play, connection to a BEMS is extremely easy. Better still, a remote controller is all that's needed to enable use as a stand-alone system. As well as dramatically reducing the burden on system integrators, this cuts costs.

## CO<sub>2</sub> and humidity sensors for high IAQ

CO<sub>2</sub> sensors taking measurements in units of ppm, and humidity sensors enable fine air quality control. This creates the most comfortable space for occupants while contributing to improved employee satisfaction.

## Energy management for high return on investment

Avoid the huge costs that occur when the control of air conditioning is left to staff with a tailor-made solution. Automatically controlled operation with precise settings reduces both wasted energy and running costs. This in turn contributes to improved ROI which is directly linked to management.

## Colour and design to match office interiors

When creating an office environment, a stylish appearance that complements the design of the office rather than interfering with it is an important consideration. Colour combinations and design can be set to match different facilities.

## Installation possible during business hours

To install a new system, it was previously necessary to close stores and restaurants. Now, thanks to Panasonic's wireless technology, smart installation is possible without closing an establishment or performing building work such as knocking down walls. And the enjoyment of customers isn't interrupted.

## Easy to Understand Error Description

Error description during an emergency is easy to understand, enabling staff to respond quickly. By eliminating the wasted cost of calling a service person every time there's a problem, this reduces total annual maintenance costs.

## Occupancy sensors enabling automatic control for outstanding efficiency

Sensors in the room and on the controller detect the presence or absence of occupants and the opening and closing of windows and doors. While maintaining the optimum air-conditioned environment guests expect, automatic control ensures the most efficient operation when they are away or when windows are open. This contributes to an appreciable reduction in operation costs.

## A truly comfortable experience for guests

Easy-to-understand, refined on-screen images enable display of hotel logos and original welcoming messages. Colour and design can also be customized for different facilities to create an even more comfortable environment for guests.

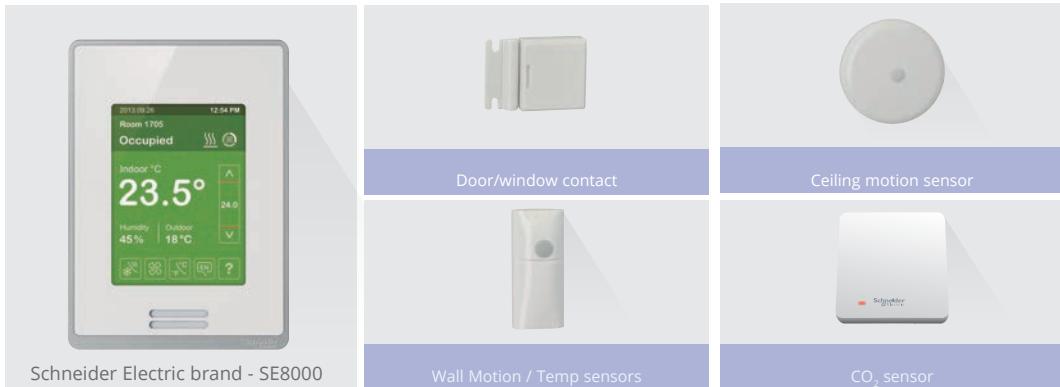

## VRF Smart Connectivity Devices

2 types of devices depending on type connection with indoor units wireless or wired.  
Wireless connection to indoor unit requires ZigBee interface for indoor unit.

### Features

- Up to 5-year battery life, batteries included
- Battery level is a point
- Sensor points visible in SBO when SE8000 is integrated via BACnet MS/TP
- Sensor status and battery level visible in SBE when SE8000 is integrated via ZigBee® Pro
- Integration to SBE only recommended when each MPM is connected to Ethernet and are set as ZigBee® Coordinator nodes

Price on application.

# Reference / Fault Codes

**PACi Fault Codes**

<b>Alarm Code</b>	<b>Alarm Meaning</b>
E01	Remote Controller Reception Error
E02	Remote Controller Transmission Error
E03	Error in Indoor Unit Receiving Signal from Remote Controller (central)
E04	Error in Indoor Unit Receiving Signal from the Outdoor Unit
E05	Error in Indoor Unit Transmitting Signal to the Outdoor Unit
E06	Outdoor Unit Failed to Receive Serial Communication Signals from Indoor Unit
E08	Duplicate Indoor Unit Address Settings Error
E09	More Than One Remote Controller Set to Main Error
E12	Automatic Address Setting Start is Prohibited while Auto-address Setting in Progress.
E14	Main Unit duplication in Simultaneous-operation Multi Control (detected outdoor unit)
E15	Automatic Address Alarm (The total capacity of indoor units is too low.)
E16	Automatic Address Alarm (The total capacity of indoor units is too high or the number of indoor units is two or more.)
E18	Faulty Communication in Group Control Wiring
E20	Connection Problem of Indoor/Outdoor Units.

<b>Alarm Code</b>	<b>Alarm Meaning</b>
F04	Compressor Discharge Temperature Sensor (TD) Trouble
F06	Inlet Temperature Sensor (C1) in Heat Exchanger Trouble
F07	Intermediate Temperature Sensor (C2) in Heat Exchanger Trouble
F08	Outdoor Air Temperature Sensor (TO) Trouble
F12	Compressor Inlet Suction Temperature Sensor (TS) Trouble
F31	Outdoor Unit Nonvolatile Memory (EEPROM) Trouble

<b>Alarm Code</b>	<b>Alarm Meaning</b>
H01	Primary (input) Overcurrent Detected
H02	PAM Trouble
H03	Primary Current CT Sensor (current sensor) Failure
H31	HIC Trouble

<b>Alarm Code</b>	<b>Alarm Meaning</b>
L04	Outdoor Unit Address Duplication
L10	Outdoor Unit Capacity not Set or Invalid
L13	Indoor Unit Type Setting Error
L18	4-way Valve Operation Failure

<b>Alarm Code</b>	<b>Alarm Meaning</b>
P03	Compressor Discharge Temperature Trouble
P04	High Pressure Trouble
P05	AC Power Supply Trouble
P13	Alarm Valve Open
P14	O2 Sensor Detect
P15	Insufficient Gas Level Detected
P16	Compressor Overcurrent Trouble
P22	Outdoor Unit Fan Motor Trouble
P29	Lack of INV compressor wiring, INV compressor actuation failure (including locked), DCCT failure
P31	Group Control Error

**ECOi MF2 3 - Pipe Fault Codes**

<b>Alarm</b>	<b>Alarm Meaning</b>
E01	"Error in receiving serial communication signal. (Signal from main indoor unit in case of group control) Ex: Auto address is not completed."
E02	Error in transmitting serial communication signal.
E03	Indoor unit is detecting error signal from remote controller (and system controller).
E04	"Error in receiving serial communication signal. When turning on the power supply, the number of connected indoor units does not correspond to the number set. (Except R.C. address is "0.")"
E06	Error of the main outdoor unit in receiving serial communication signal from the indoor unit.
E08	Indoor unit address setting is duplicated.
E09	Remote controller address connector (RCU. ADR) is duplicated. (Duplication of main remote controller)
E12	"Starting auto address setting is prohibited. This alarm message shows that the auto address connector CN30 is shorted while other RC line is executing auto address operation."
E18	Error of main indoor unit in receiving serial communication signal from sub indoor units.
E15	Error in auto address setting. (Number of connected indoor units is less than the number set.)
E16	Error in auto address setting. (Number of connected indoor units is more than the number set.)
E20	No indoor unit is connected during auto address setting.
E24	Main outdoor unit is detecting error signal from sub outdoor unit.
E25	Error of outdoor unit address setting.
E26	The number of connected main and sub outdoor units do not correspond to the number set at main outdoor unit PCB.
E27	Improper wiring between main outdoor unit and sub-unit.
E29	Error of sub outdoor unit in receiving serial communication signal from main outdoor unit.
E30	Serial transmission failure of outdoor unit.
E31	Communication failure with MDC
L02	This alarm message shows when an indoor unit for multiple-use is not connected to the outdoor unit.
L03	Duplication of main indoor unit address setting in group control.
L05	Duplicated indoor unit priority (priority indoor unit).
L06	Duplicated indoor unit priority (non-priority indoor unit) and outdoor unit.
L07	Group control wiring is connected to individual control indoor unit.

Alarm	Alarm Meaning
L08	Indoor unit address is not set.
L09	Capacity code of indoor unit is not set.
L04	Duplication of outdoor R.C. address setting.
L10	Capacity code of outdoor unit is not set.
L11	Incorrect wiring of remote group control wiring (in case of shared solenoid valve kit)
L17	Mis-matched connection of outdoor units that have different kinds of refrigerant.
F01	Indoor coil temp. sensor (E1)
F02	Indoor coil temp. sensor (E2)
F03	Indoor coil temp. sensor (E3)
F10	Indoor suction air (room) temp. sensor (TA)
F11	Indoor discharge air temp. sensor (BL)
F04	Comp. No. 1 discharge gas temp. sensor (DISCH1)
F05	Comp. No. 2 discharge gas temp. sensor (DISCH2)
F06	Outdoor No. 1 coil gas temp. sensor (EXG1)
F07	Outdoor No. 1 coil liquid temp. sensor (EXL1)
F08	Outdoor air temp. sensor (TO)
F12	Compressor intake temperature sensor (SCT)
F14	Temp. sensor at refrigerant gas outlet of dual-tube (SCG)
F16	High pressure sensor failure. High pressure trouble.
F17	Low-pressure sensor failure
F23	Outdoor No. 2 coil gas temp. sensor (EXG2)
F24	Outdoor No. 2 coil liquid temp. sensor (EXL2)
P01	Thermal protector in indoor unit fan motor is activated.
P09	Improper wiring connections of ceiling panel.
P10	Float switch is activated.

<b>Alarm</b>	<b>Alarm Meaning</b>
P11	Faulty drain pump. Drain pump locked.
P12	Operation of protective function of fan inverter.
P14	O2 sensor (detects low oxygen level) activated
P02	Compressor thermal protector is activated. Power supply voltage is unusual. (The voltage is more than 260 V or less than 160 V between L and N phase.)
P03	Incorrect discharge temperature. (Comp. No. 1)
P04	High pressure switch is activated.
P05	Negative (defective) phase.
P16	DCCT overcurrent
P17	Incorrect discharge temperature. (Comp. No. 2)
P22	Outdoor unit fan motor is unusual.
P29	Inverter for compressor is unusual. (DC compressor does not operate.)
P31	When alarm message in other indoor units occurs in case of group control, unalarmed state of indoor units are inoperative.
F29	EEPROM on indoor unit PCB failure
F31	EEPROM on the main or sub outdoor unit PCB has failed.
H01	Compressor No. 1 current trouble (overcurrent)
H03	Current is not detected when comp. No. 1 is ON.
H05	Compressor No. 1 discharge temp. sensor disconnected
H11	Compressor No. 2 current trouble (overcurrent)
H12	Compressor No. 2 current trouble (locked)
H13	Compressor No. 2 CT sensor disconnected or short circuit
H15	Compressor No. 2 discharge temp. sensor disconnected
H06	Low pressure switch is activated.
H08	Comp. No. 1 oil sensor
H27	Comp. No. 2 oil sensor
H31	IPM trip (IPM current or temperature)

#### Nominal and UK conditions

Nominal capacities (kW) specified in this price book are calculated under ISO-T1 (JIS) standard conditions as follows:

#### Cooling

Indoor temperature 27°CDB, 19°CWB

Outdoor temperature 35°CDB

#### Heating

Indoor temperature 20°CDB

Outdoor temperature 7°CDB, 6°CWB

UK cooling capacities (kW) specified in this price book are calculated under the following conditions:

Indoor temperature 23°CDB, 16°CWB

Outdoor temperature 30°CDB

UK heating capacities (kW) specified in this price guide are calculated under the following conditions:

Indoor temperature: 20°CDB

Outdoor temperature: 0°CWB

#### Electrical

Information relating to local power supplies are shown for guidance only and must be subject to IEE regulations as well as site requirements. All three phase supplies to be TPNE.

#### Energy labelling

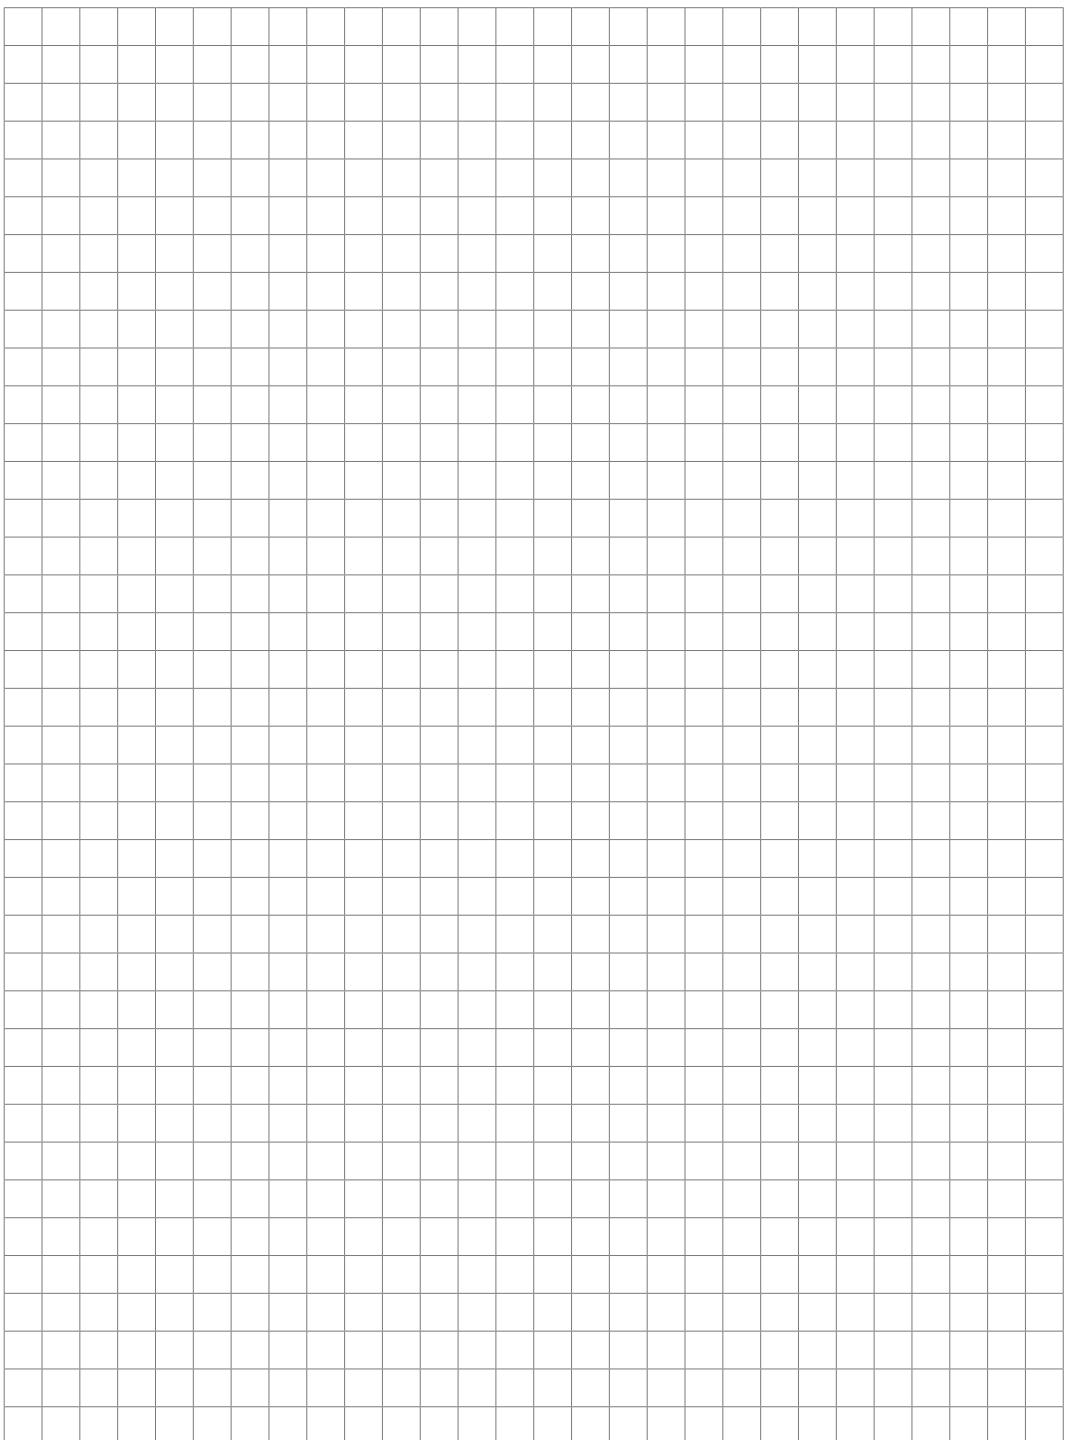

All ENER - Lot 10 information is available at [http://www.panasonicproclub.com/GB\\_en/tools/energy-label-generator/](http://www.panasonicproclub.com/GB_en/tools/energy-label-generator/)

#### Pipe size

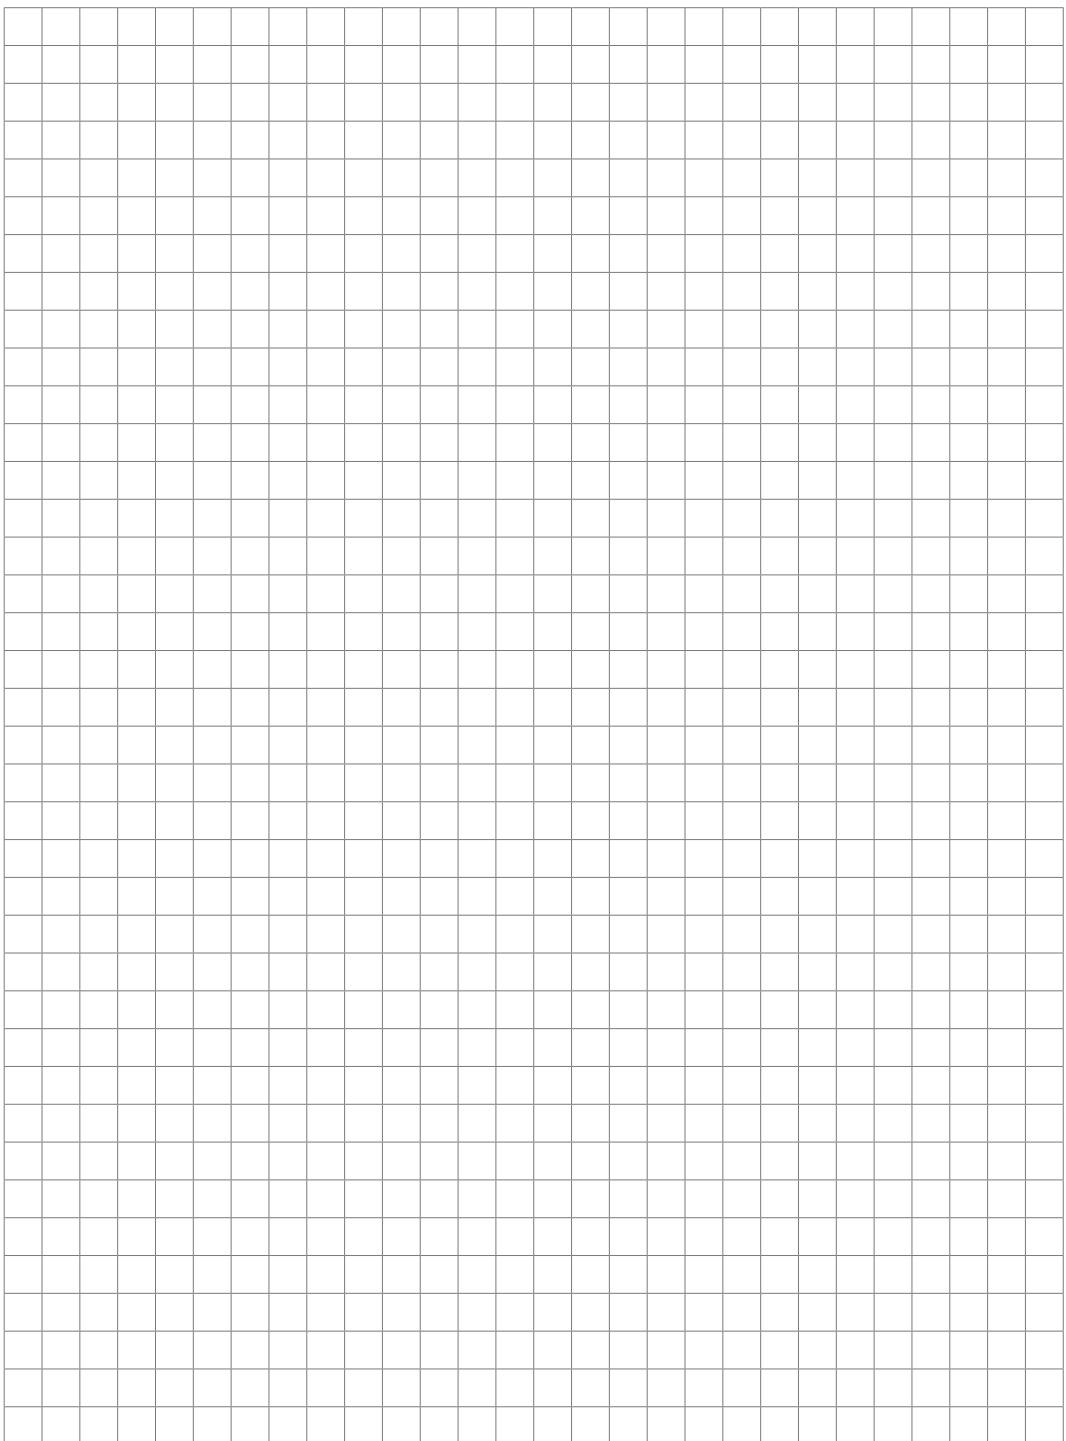

- » 1/4in = 6.35mm
- » 3/8in = 9.52mm
- » 1/2in = 12.70mm
- » 5/8in = 15.88mm
- » 3/4in = 19.05mm
- » 7/8in = 22.22mm
- » 11/8in = 28.58mm
- » 13/8 = 34.93mm

#### Conversion data

- » kW x 3412 = btu/h
- » °C x 1.8 + 32 = °F
- » l/s x 3.6 = m<sup>3</sup>/h
- » bar x 14.51 = psi
- » m<sup>2</sup> x 10.76 = ft<sup>2</sup>

## Heating & Cooling Solutions

Panasonic Appliances Air Conditioning Europe (PAPAEU)

Panasonic UK, a branch of Panasonic Marketing Europe GmbH

Maxis 2, Western Road, Bracknell, Berkshire, RG12 1RT

Do not add or replace refrigerant other than the specified type. Manufacturer is not responsible for the damage and deterioration in safety due to usage of the other refrigerant.

The outdoor units in this catalogue contains fluorinated greenhouse gases with a GWP higher than 150.
