

# Change and check the indoor temperature with your mobile phone

## Reduces energy consumption

Change the temperature when you are not at home and reduce energy consumption.

## Secures the property

Reduces the risk of damage and water leaks during the winter with low-temperature alarms.

## Increases the comfort

Change the temperature with a simple text message (SMS) and prepare a warm arrival to the home.

## Easy to install

Use a regular SIM card from any mobile operator<sup>1)</sup> and use the device right out of the box.

## Are you worried about water leaks during the winter? Did you forget to lower the heat when you went from the summer house? Want to reduce unnecessary power consumption?

SMS-954 is a GSM device that can control your heat pump from Panasonic and remotely change and check the temperature by SMS from a mobile phone. You have control over the operation and may also be alarmed if the temperature drops or you get a power failure in the house.

Insert a normal SIM card from any mobile operator, install the unit in the same room as the heat pump, aim the unit to the indoor unit and make your personal settings by SMS. Easy installation, ready in just 5 minutes, works 24/7.

### FUNCTIONS

Mode:	AUTO, HEAT, COOL, DRY, ON/OFF
Temperature <sup>2)</sup> :	8, 10, 16-30°C
Fan Speed:	AUTO-1-2-3-4-5
Air Swing:	AUTO-1-2-3-4-5
Alarm:	Temperature, Power, Battery
Status Check:	Temperature, Mode, Setup
Address Book:	Five (5) Receivers

### SPECIFICATIONS

FW Version:	SMS-954
Communication:	SMS, GSM (2G)
Wireless Transfer:	IR, Infrared Light
Power Input:	230V AC / 12V DC, 1A
Backup Battery:	4.8 Ni-mh, 600mAh
Dimensions:	150x95x26mm
Weight:	205g

1) Does not work with operator only providing 3G.

2) Low temperature heating only works with heat pumps with +8 / 10°C HEAT function.

3) Works with all models with production year 2006 or newer.
